4. SETUP AND CONNECTION

4.1. Wireless Connection (2.4GHz Adapter)

1. Plug the 2.4GHz wireless adapter into an available USB port on your Xbox console or PC (Windows 7 or above). The receiver's indicator light will blink slowly.
2. Press the Home button on the controller to power it on.
3. Hold the small button next to the USB-C charging port on the controller until its lights blink rapidly.
4. Hold the button on the 2.4GHz wireless adapter until its light flashes rapidly.
5. Wait for the controller and receiver to connect. Once connected, the controller will vibrate once, and both the controller's Home button and the receiver's indicator light will stay solidly lit.

4.2. Wired Connection

To use the controller in wired mode, simply connect the USB-C charging cable from the controller to a USB port on your Xbox console or PC. The controller will automatically connect, and the indicator light will remain on, signifying a successful connection.

Note: The controller itself does not have Bluetooth and requires the 2.4G receiver for wireless connection. Not compatible with TV and Phone.

5. OPERATING INSTRUCTIONS

5.1. RGB Lighting Modes

The controller features 7-color RGB lighting around the joysticks with multiple modes. The lighting setting key is located on the back of the controller.

CONNECT AND PLAY ON MAJOR PLATFORMS

A complete series of PC, STEAM and XBOX hosts, connected and played on major platforms, with powerful functions and simple and rough methods

5.2. Turbo Function

The Turbo function allows for rapid, repeated button presses. There are three states for each button: Normal, Hold Turbo, and Auto Turbo.

Image: The YUYIU controller illustrating the Turbo Burst function, designed to enable easier skill execution in games.

- **Setting Turbo:** In any mode, press the desired action button (A/B/X/Y/L1/L2/R1/R2) and the Turbo key (first press) to set the Turbo function. The Turbo light will flash.
- **Setting Auto Turbo:** Press the action button and Turbo key again (second press) to activate Auto Turbo. The Turbo light will flash. In Auto Turbo mode, pressing and holding the button stops rapid shots, and letting go resumes them.
- **Clearing Turbo:** Press the action button and Turbo key a third time to clear the Turbo function for that specific button.
- **Adjusting Turbo Speed:** Hold the Turbo button and press the D-pad Up/Down to adjust the rapid-fire speed (2 preset rates).

5.3. Programmable Keys (Macro)

The "ML" and "MR" buttons on the back of the controller can be programmed to map 1-16 basic function keys (A/B/X/Y/LB/RB/L3/R3/D-PAD) for customized gameplay.

- **Entering Programming Mode:** Press and hold the programming key (located between ML and MR buttons) for 3 seconds. The controller will vibrate once.
- **Recording a Macro:** While in programming mode, press the sequence of buttons you wish to record.
- **Assigning and Exiting:** Press either the ML or MR back button to confirm the recorded sequence and exit programming mode. The combo is now assigned to that back button.
- **Executing Macro:** Press the assigned ML or MR button once to execute your recorded combo.
