GarveeHome 72-inch Metal Storage Cabinet with Wheels, Locking Doors, and 2 Drawers Instruction Manual

Model: 1235656

INTRODUCTION

This manual provides detailed instructions for the assembly, operation, and maintenance of your GarveeHome 72-inch Metal Storage Cabinet. Please read this manual thoroughly before assembly and use to ensure safe and correct operation. Keep this manual for future reference.

SAFETY INFORMATION

WARNING: Failure to follow these safety instructions may result in injury or damage to the product.

- Do not exceed the load limit of 200 LBS (approximately 90.7 kg) per shelf. Overloading can cause structural failure and injury.
- Ensure the cabinet is securely mounted or locked in place using the casters' brakes before loading or use to prevent unintended movement.
- Be cautious of pinch points and sharp edges during installation and handling of metal components. Wear appropriate protective gloves.
- Use appropriate safety gear, such as gloves and eye protection, when moving or assembling the cabinet.
- Assemble the cabinet on a flat, stable surface to prevent tipping.
- Keep children and pets away from the assembly area.
- Do not climb on or hang from the cabinet.

PACKAGE CONTENTS

Verify that all components are present before beginning assembly. If any parts are missing or damaged, contact customer support.

- Cabinet Panels (Top, Bottom, Sides, Back)
- Adjustable Shelves (3 pieces)
- Doors (2 pieces)
- Drawers (2 pieces)
- Wheels/Casters (4 pieces, 2 with locks)
- Drawer Slides (for 2 drawers)
- Locking Mechanisms and Keys (for doors and drawers)
- Assembly Hardware (screws, bolts, nuts, etc.)
- Instruction Manual

ASSEMBLY INSTRUCTIONS

The GarveeHome storage cabinet features a knockdown design for straightforward assembly. It is recommended to have at least two people for assembly. Estimated assembly time is approximately 40 minutes.

Required Tools (Not Included):

- Phillips Head Screwdriver
- Wrench (if applicable for bolts)
- Rubber Mallet (optional, for gentle tapping)

Step-by-Step Assembly:

1. **Unpack and Identify Parts:** Carefully unpack all components and lay them out on a clean, soft surface to prevent scratches. Refer to the parts list to identify each piece.
2. **Assemble the Base:** Attach the bottom panel to the side panels using the provided hardware. Ensure all connections are secure.
3. **Install Casters:** Attach the four wheels to the bottom panel. Ensure the two lockable casters are positioned at the front for easy access. Tighten securely.

360 °Universal Wheels

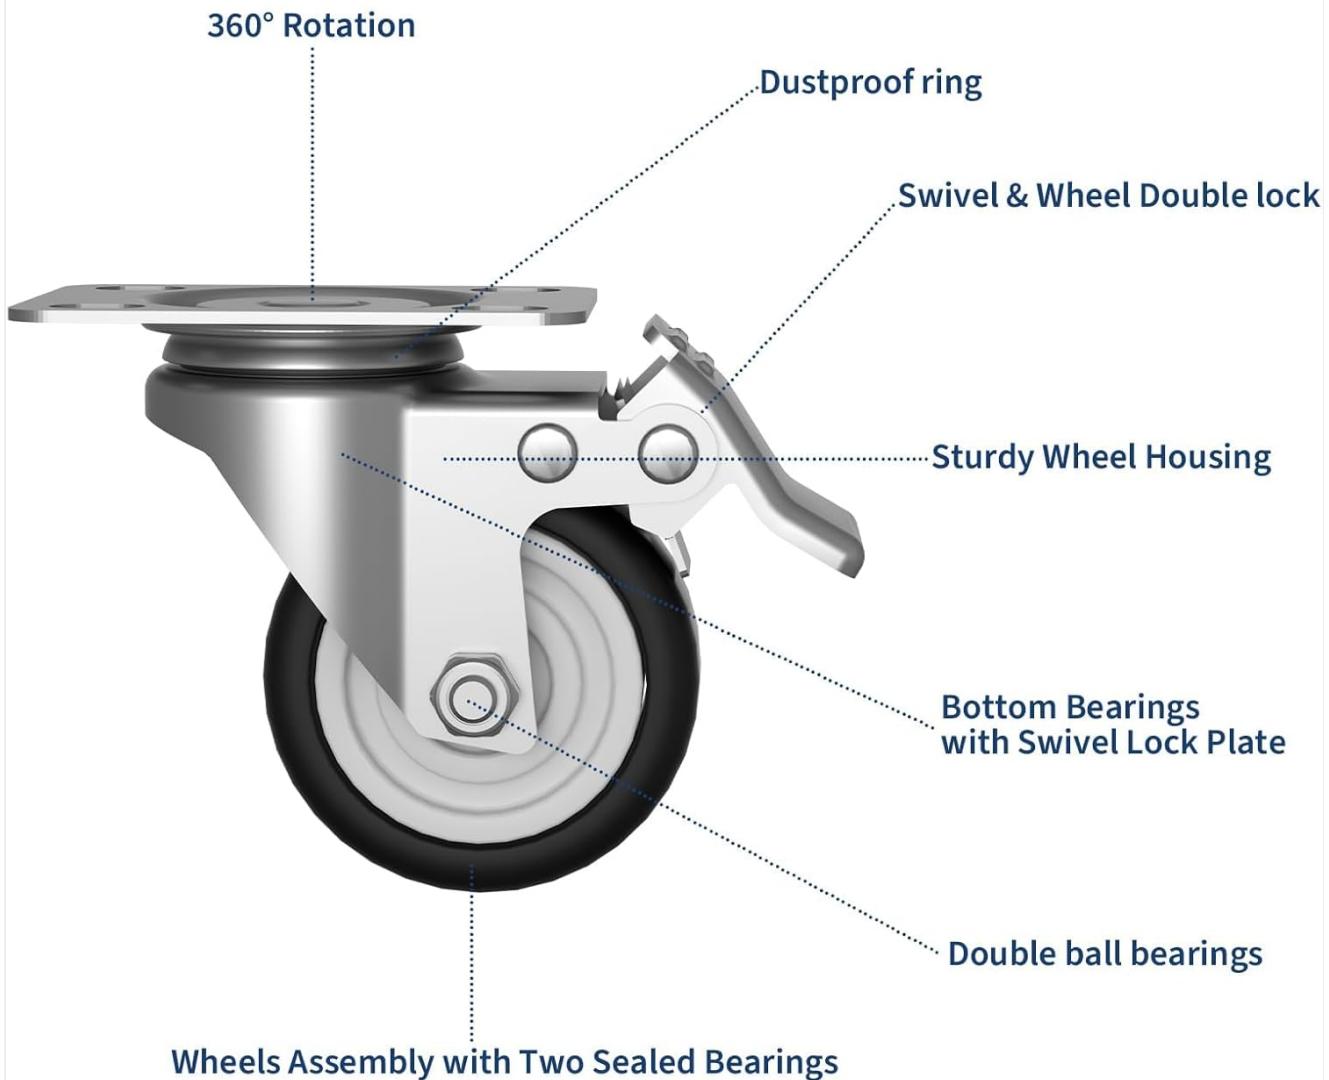

Image: Detailed view of the 360-degree universal wheel assembly, highlighting the swivel and wheel double lock mechanism.

4. **Attach Back Panel and Top Panel:** Secure the back panel to the assembled frame, then attach the top panel.
5. **Assemble Drawers:** Follow the specific instructions for assembling the two drawers, including attaching the drawer slides. Install the drawer slides onto the cabinet frame.

Smooth Drawer Sliding

Three segment track, solid track push-pull

Image: Close-up of the smooth drawer sliding mechanism, featuring a three-segment track and stainless steel ball bearings for solid push-pull operation.

6. **Install Doors:** Attach the two doors to the cabinet frame using the provided hinges. Adjust as necessary for proper alignment.
7. **Insert Adjustable Shelves:** Place the adjustable shelves into the desired positions. The shelves can be moved up or down to accommodate different item heights.

ADJUSTABLE SHELVES AS NEEDED

The partition can be adjusted up and down freely, allowing you to feel different items and choose the appropriate height

Image: Illustration demonstrating the adjustable shelves feature, allowing flexible positioning to suit various storage needs.

8. **Install Locks:** Secure the locking mechanisms for both the doors and drawers. Test all locks with the provided keys.
9. **Final Check:** Ensure all screws and connections are tight and the cabinet is stable.

FEATURES OVERVIEW

- **Heavy-Duty Construction:** Constructed from 0.6 mm thick cold-rolled steel with a durable powder-coated finish, providing scratch-resistant and rust-proof properties. Each shelf supports up to 200 LBS.

Image: Diagram illustrating the multi-layered construction of the cabinet's steel plates, including epoxy resin, high-temperature baking paint, and a polished hardened steel surface over a pickled phosphating steel base.

- **Spacious and Versatile Storage:** Features two doors, two drawers, and three adjustable shelves for organizing various items.

Each Board Can Bear 80 Pounds

The board is thicker and will not deform

Image: Interior view of the cabinet with indicators showing each shelf can bear up to 80 pounds, emphasizing the robust design.

- **Secure Locking System:** High-grade locks on both doors and drawers, each with two keys, for securing contents.
- **Smooth Mobility:** Equipped with four durable 360-degree universal wheels, including two lockable casters, for easy movement and secure positioning.
- **Rounded Edge Design:** Features a rounded edge wrapping process to minimize collision and injury risks.

Rounded edge wrapping process to prevent collision and injury

Image: Close-up of a cabinet corner illustrating the rounded edge wrapping process designed to prevent collision and injury.

- **Reinforced Shelves:** The bottom of each shelf panel is reinforced to provide stable support without deformation, ensuring a long service life.

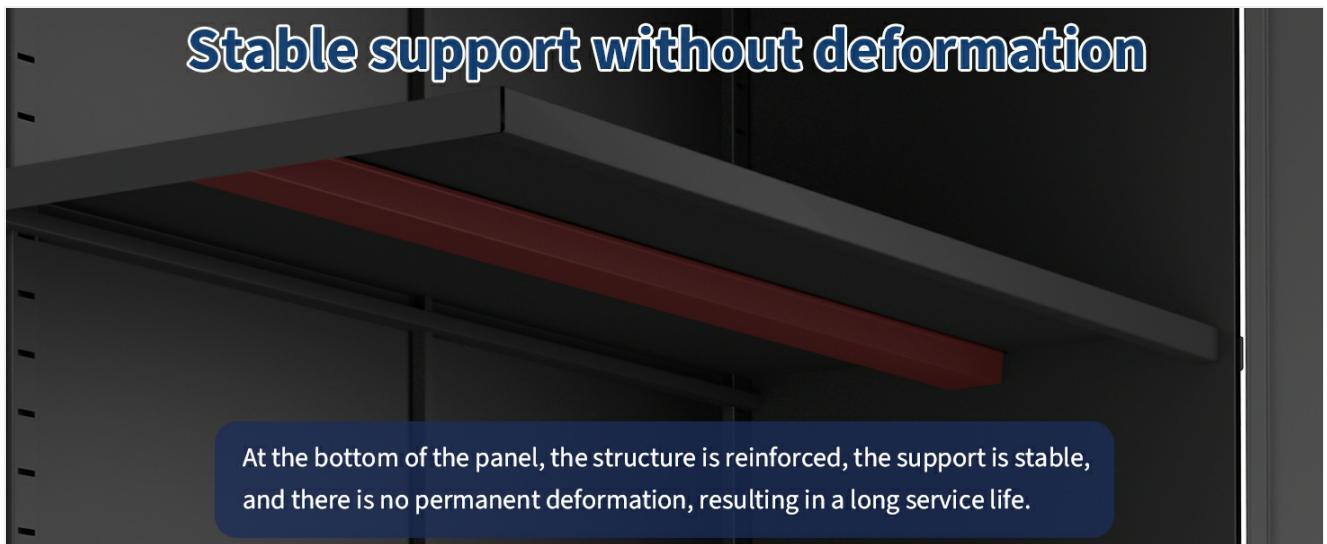

Image: Cross-section view of a cabinet shelf, highlighting the reinforced structure at the bottom of the panel for stable support and prevention of deformation.

OPERATION

Using the Locking System:

- To lock the doors or drawers, insert the key into the lock and turn it clockwise until it stops. Remove the key.
- To unlock, insert the key and turn it counter-clockwise.
- Keep spare keys in a safe, accessible location.

Moving the Cabinet:

- Ensure all items inside the cabinet are stable and doors/drawers are closed and locked before moving.
- Unlock the two front casters by pressing down on the lock levers.
- Carefully push the cabinet to its new desired location.
- Once in position, engage the locks on the two front casters by pressing the lock levers down to secure the cabinet.

MAINTENANCE

- **Cleaning:** Wipe the cabinet surfaces with a soft, damp cloth and mild detergent. Avoid abrasive cleaners or solvents that could damage the powder-coated finish. Dry thoroughly.

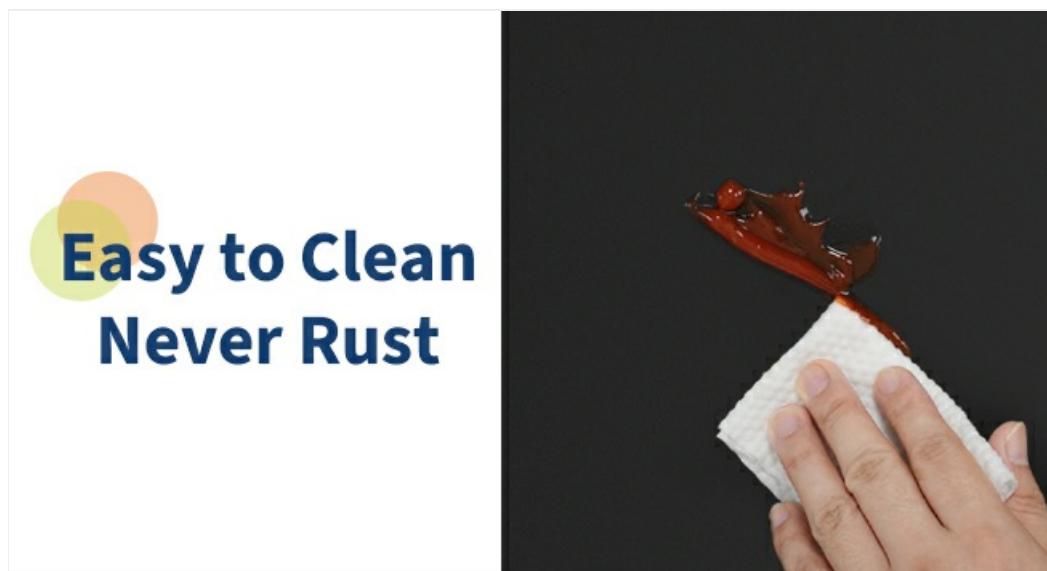

Image: A hand wiping a spill from the cabinet surface, demonstrating its easy-to-clean and rust-resistant properties.

- **Inspection:** Periodically check all screws, bolts, and connections to ensure they remain tight. Retighten if necessary.
- **Caster Care:** Keep the wheels free of debris to ensure smooth movement. Lubricate wheel axles if they become stiff.
- **Lock Care:** Apply a small amount of graphite lubricant to the lock mechanisms if they become difficult to operate.

TROUBLESHOOTING

- **Cabinet is Wobbly:**

- Ensure all assembly hardware is fully tightened.
- Verify the cabinet is on a flat, level surface. Adjust caster locks if needed.

- **Doors or Drawers Do Not Close Properly:**

- Check for obstructions inside the cabinet or drawer tracks.
- Inspect hinges and drawer slides for damage or misalignment. Adjust if possible.
- Ensure the cabinet itself is square and not twisted from uneven assembly.

- **Casters Do Not Roll Smoothly:**

- Check for debris (hair, dust, etc.) caught in the wheels.
- Ensure the caster locks are fully disengaged.
- Lubricate the wheel axles if necessary.

SPECIFICATIONS

No Smell, No Toxins – Just Clean Air

Recyclable Steel & Zero VOC Emissions
