IMPORTANT SAFETY INFORMATION

Please read and understand all safety instructions before using this appliance. Failure to follow these instructions may result in electric shock, fire, or serious injury.

- This heater is hot when in use. To avoid burns, do not let bare skin touch hot surfaces.
- Keep combustible materials, such as furniture, pillows, bedding, papers, clothes, and curtains at least 3 feet (0.9 m) from the front of the heater and keep them away from the sides and rear.
- Extreme caution is necessary when any heater is used by or near children or invalids and whenever the heater is left operating and unattended.
- Do not operate any heater with a damaged cord or plug or after the heater malfunctions, has been dropped or damaged in any manner.
- Do not use outdoors.
- To disconnect heater, turn controls to OFF, then remove plug from outlet.
- Do not insert or allow foreign objects to enter any ventilation or exhaust opening as this may cause an electric shock or fire, or damage the heater.
- To prevent a possible fire, do not block air intakes or exhaust in any manner. Do not use on soft surfaces, like a bed, where openings may become blocked.
- This heater is equipped with a tip-over safety switch that automatically shuts off the unit if it is accidentally knocked over.
- The heater also features overheat protection, automatically turning off if internal components reach excessive temperatures.
- Constructed with V-0 flame-retardant materials for enhanced safety.

SETUP INSTRUCTIONS

Follow these steps to properly assemble the base of your Uthfy tower space heater.

1. Carefully remove all components from the packaging. Ensure you have the fuselage, front base plate, rear base plate, instruction manual, remote control, 8 self-tapping screws, and power cord.
2. Pass the power cord through the central hole in the base plate.
3. Assemble the front and rear base plates together around the bottom of the heater.
4. Align the screw holes on the assembled base plate with the corresponding holes on the heater's fuselage.
5. Secure the base plate to the fuselage using the provided self-tapping screws.
6. Secure the power cord in the buckle of the baseplate to prevent it from being pulled or damaged.

MAINTENANCE

Regular maintenance ensures optimal performance and longevity of your heater.

- **Cleaning:** Always unplug the heater before cleaning. Use a soft, damp cloth to wipe the exterior surfaces. Do not use abrasive cleaners or solvents.
- **Storage:** When not in use, store the heater in a cool, dry place. It is recommended to cover it to protect against dust.
- **Filter Cleaning:** Periodically check and clean the air intake filter to ensure efficient operation. Refer to the detailed manual for specific instructions on accessing and cleaning the filter.

TROUBLESHOOTING

If you encounter issues with your Uthfy space heater, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Heater does not turn on.	No power, tip-over switch activated, overheat protection activated.	Ensure power cord is securely plugged in. Check if the unit is upright. Allow unit to cool down if it was recently overheated.
Heater blows cold air.	Heating element issue, fan mode selected.	Ensure a heating mode (1000W or 1500W) is selected, not just the fan. If problem persists, contact customer support.
Heater turns off unexpectedly.	Overheat protection, tip-over switch, timer activated.	Check for obstructions around air inlets/outlets. Ensure unit is on a stable, flat surface. Verify timer settings.
Remote control not working.	Dead batteries, obstruction, out of range.	Replace batteries. Ensure no obstructions between remote and heater. Operate within recommended range.
