2. SAFETY GUIDELINES

Please read and follow these safety instructions carefully before installing components into your PC case:

- Always disconnect the power supply from the wall outlet before performing any installation or maintenance.
- Wear an anti-static wrist strap to prevent electrostatic discharge (ESD) damage to sensitive components.
- Handle components with care to avoid damage. Be aware of sharp edges inside the case.
- Keep small parts and screws away from children.
- Ensure proper ventilation around the assembled PC to prevent overheating.

3. PACKAGE CONTENTS

Verify that all the following items are included in your package:

- darkFlash DB460M Micro-ATX PC Gaming Case
- Accessory Box (containing screws, standoffs, cable ties, etc.)
- User Manual (this document)

5.2. Motherboard Installation

1. Install the I/O shield into the rear opening of the case (if not pre-installed on your motherboard).
2. Align your Micro-ATX motherboard with the pre-installed standoffs.
3. Secure the motherboard using the provided screws from the accessory kit.

5.3. Power Supply Unit (PSU) Installation

1. Position the PSU in the dedicated bottom-mount compartment.
2. Secure the PSU to the rear of the case using the provided screws.

5.4. Storage Drive Installation

The DB460M supports 2 x 3.5" HDDs and 2 x 2.5" SSDs.

- **3.5" HDDs:** Locate the drive cage beneath the PSU shroud. Slide the drives into the trays and secure them with screws.
- **2.5" SSDs:** Mount SSDs to the designated brackets on the motherboard tray or behind the PSU shroud, securing them with screws.

5.5. Graphics Processing Unit (GPU) Installation

1. Remove the necessary PCI-E slot covers from the rear of the case.
2. Insert your GPU into the appropriate PCI-E slot on the motherboard.
3. Secure the GPU with the provided screws. The case supports GPUs up to 420mm in length.

SUPPORTS ULTRA-LONG GPU

Spacious interior design easily accommodates GPU up to 420mm.

6. GENERAL OPERATION

Once all components are installed and connected, close the tempered glass side panel. Connect your peripherals, monitor, and power cable. Press the power button on the front panel to start your system.

7. CARE AND MAINTENANCE

To ensure the longevity and optimal performance of your darkFlash DB460M case, follow these maintenance tips:

- **Cleaning:** Use a soft, dry cloth to wipe down the exterior of the case. For the tempered glass panel, use a glass cleaner and a microfiber cloth.
- **Dust Filters:** Regularly check and clean the dust filters (if applicable) to maintain optimal airflow and prevent dust buildup inside the case.
- **Internal Cleaning:** Periodically open the case and use compressed air to remove dust from components and internal surfaces. Ensure the system is powered off and unplugged before cleaning.

8. TROUBLESHOOTING

If you encounter issues with your PC build, consider these common troubleshooting steps:

- **No Power:** Ensure the PSU is switched on, the power cable is securely connected, and all front panel power connectors are correctly attached to the motherboard.
- **Fans Not Spinning:** Check that all fan cables are properly connected to the motherboard or fan controller. Verify fan settings in BIOS/UEFI.
- **No Display:** Confirm that the monitor cable is connected to the graphics card (not the motherboard integrated graphics, unless intended) and that the GPU is fully seated and powered.
- **Overheating:** Ensure all fans are installed correctly and spinning in the right direction for optimal airflow. Clean dust filters and internal components.
