- For stubborn marks, use a mild soap solution and dry immediately with a clean cloth.

Inspection:

- Periodically inspect all structural components, including bed frames, railings, and stairs, for any signs of wear, damage, or loose connections.
- Check all screws, bolts, and fasteners every 3-6 months and re-tighten as necessary to maintain stability.
- Ensure the trundle bed wheels are clean and roll smoothly.

TROUBLESHOOTING

This section addresses common issues you might encounter with your bunk bed.

Issue: The bed feels wobbly or unstable.

- **Solution:** Check all assembly hardware (screws, bolts, nuts) and tighten them securely. Ensure the bed is placed on a level surface.

Issue: Drawers in the stairs are difficult to open or close.

- **Solution:** Ensure the drawers are not overloaded. Check for any obstructions in the drawer slides. Clean the slides if necessary.

Issue: Squeaking noises from the bed frame.

- **Solution:** Re-tighten all fasteners. Sometimes, applying a small amount of lubricant (e.g., silicone spray) to metal-on-metal or wood-on-wood contact points can help, but ensure it is safe for wood and children.
