The bed frame is now ready for your mattress. No box spring is required.

OPERATING AND USAGE

- **Mattress Placement:** Place your Full XL mattress directly onto the metal slats. The frame is compatible with all mattress types.
- **Weight Capacity:** The bed frame is constructed from heavy-duty metal and can support up to 3,200 pounds, ensuring exceptional stability and durability.
- **Under-Bed Storage:** The 14-inch height provides ample space for under-bed storage, allowing you to organize items efficiently.

MAINTENANCE

- **Cleaning:** Wipe the metal frame with a soft, damp cloth. Avoid abrasive cleaners or harsh chemicals that could damage the finish.

- **Regular Inspection:** Periodically inspect all bolts and connections to ensure they remain tight. Re-tighten as necessary to maintain the frame's stability and noise-free performance.
- **Moving the Frame:** If moving the bed frame, it is recommended to remove the mattress and, if possible, disassemble the frame to prevent damage.

TROUBLESHOOTING

- **Squeaking Noises:** If the frame develops squeaking noises, check all bolts and connections. Tighten any loose hardware. Ensure the mattress is properly seated on the slats.
- **Instability/Wobbling:** Verify that all legs are firmly on the ground and all frame connections are securely tightened. Uneven flooring can sometimes cause wobbling; consider using furniture pads under the legs if needed.
- **Slats Shifting:** Ensure all slats are correctly positioned within their designated supports. If slats continue to shift, check for any damage to the slat supports or the slats themselves.
