3. SETUP AND INSTALLATION

This light kit is designed for integration with the Lego Black Pearl 10365 model. The Lego model itself is not included and must be purchased separately. For detailed, step-by-step installation instructions, please refer to the online PDF and video guides.

3.1 Accessing Online Instructions

A physical paper manual is not included. To access the comprehensive installation guide (PDF and video), please follow these steps:

1. Locate the website address printed in the small booklet included in your package.
2. Visit the specified website.
3. Enter the model number (10365) or the unique label characters found on the back of your package into the search bar to find the specific instructions for your kit.

3.2 General Installation Notes

- **Preparation:** Ensure your Lego model is fully assembled before installing the light kit.
- **Wire Management:** The light wires are designed to be thin and easily hidden within the Lego structure. Carefully route wires to avoid pinching or damage.
- **Component Placement:** Follow the online instructions precisely for optimal placement of LED lights and connecting components.
- **Power Connection:** Connect the power supply unit to a USB power source (e.g., power bank, USB wall adapter, computer USB port). The recommended voltage is less than 5V.

Image: Detailed close-up views of various sections of the Lego Black Pearl model, highlighting the intricate placement and illumination provided by the BrickBling LED lights, including lanterns and interior lighting.

4. OPERATING INSTRUCTIONS (RC VERSION)

This RC (Remote Control) version allows for convenient control of your light kit.

4.1 Powering On/Off

- Connect the power supply to a compatible USB power source.
- Use the 'ON/OFF' button on the remote control to switch the lights on or off.

4.2 Remote Control Functions

The remote control provides various functions to customize your lighting experience. Refer to the online instructions for a detailed diagram of the remote and its specific button functions, which may include:

- Brightness adjustment
- Lighting modes (e.g., steady, flashing, pulsing)
- Color selection (if applicable to your specific kit)

Image: The illuminated Lego Black Pearl model with the remote control visible in the corner, indicating the remote-controlled functionality of the light kit.

5. MAINTENANCE

Proper maintenance ensures the longevity and optimal performance of your BrickBling LED Light Kit.

- **Cleaning:** Use a soft, dry cloth to gently wipe dust from the LED lights and wires. Avoid using liquid cleaners directly on the electrical components.
- **Handling:** Handle the light kit and the illuminated Lego model with care to prevent damage to the delicate wires and LEDs.
- **Storage:** If storing the model for an extended period, disconnect the power supply. Store in a cool, dry place away from direct sunlight.

6. TROUBLESHOOTING

If you encounter issues with your BrickBling LED Light Kit, please refer to the following common solutions:

- **Lights Not Turning On:**
 - Ensure the power supply is securely connected to both the light kit and a working USB power source.
 - Verify that the USB power source is providing power (e.g., try a different USB port or adapter).

- Check all cable connections between the light components and expansion boards for looseness or incorrect insertion.
- Confirm the remote control batteries are functional and correctly inserted.

- **Some Lights Not Working:**

- Inspect the specific non-working light and its connecting wire for any visible damage or disconnections.
- Ensure the light is properly seated in its connector on the expansion board.

- **Remote Control Not Responding:**

- Replace the batteries in the remote control.
- Ensure there are no obstructions between the remote and the light kit's receiver.

If these steps do not resolve the issue, please consult the detailed troubleshooting section in the online instructions or contact BrickBling customer support for further assistance.

7. SPECIFICATIONS
