7. MAINTENANCE

Cleaning:

- Wipe surfaces with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners, as they may damage the finish.
- For spills, clean immediately to prevent staining.

General Care:

- Periodically check all screws and fasteners to ensure they are tight. Retighten if necessary.
- Avoid placing extremely hot or cold items directly on the countertop without protective coasters.
- Keep the cabinet away from direct sunlight and excessive moisture to prevent warping or discoloration.

8. TROUBLESHOOTING

Loose Parts:

If any parts feel loose after assembly or during use, gently retighten the corresponding screws or fasteners. Do not overtighten.

Doors or Drawers Not Aligning:

Minor adjustments to hinges or drawer slides may be necessary to ensure proper alignment. Refer to the assembly manual for specific adjustment instructions.

Power Outlets Not Working:

- Ensure the cabinet's main power cord is securely plugged into a functional wall outlet.
- Check if the wall outlet itself is receiving power (e.g., by plugging in another device).
- Avoid overloading the power strip with too many high-wattage devices.
