## Spedal Luggage Tracker Tag

# Spedal Android Luggage Tracker Tag User Manual

Model: Luggage Tracker Tag

## INTRODUCTION

The Spedal Luggage Tracker Tag is a versatile device designed to help you locate your belongings quickly and efficiently. Compatible with both Google Find My Device and Apple Find My networks, this tracker offers global location capabilities and a loud alert sound to ensure you never lose track of your important items. Its compact, TSA-approved design and long-lasting replaceable battery make it ideal for travel and everyday use.

## Never Lose Sight of What Matters

Attach to keys, backpacks, luggage, pet collars, and more – perfect for home, travel, or everyday use.

## PACKAGE CONTENTS

- Spedal Luggage Tracker Tag (quantity as purchased, e.g., 2 units for a 2-pack)
- CR2032 Battery (pre-installed or included)
- Lanyards (if included)
- User Manual (this document)

## SETUP INSTRUCTIONS

---

### 1. Battery Installation

The Spedal Luggage Tracker Tag uses a standard CR2032 coin cell battery, which is typically pre-installed. If you need to install or replace the battery:

1. Locate the battery compartment on the back of the tracker.
2. Gently twist or pry open the cover using a small tool or coin.
3. Insert a new CR2032 battery with the positive (+) side facing up.
4. Close the battery compartment cover securely.

A fresh CR2032 battery provides up to 2 years of operation.

### 2. Pairing with Your Device

The Spedal Tracker Tag is compatible with both Google Find My Device (for Android 9+ phones) and Apple Find My network (for iPhones). You can only connect to one network at a time. Switching between networks requires a device reset.

### For Android Devices (Google Find My Device):

1. Ensure your Android phone (Android 9 or higher) has Bluetooth enabled.
2. Download and install the "Find Hub" app from the Google Play Store.
3. Open the Find Hub app and follow the on-screen instructions to add a new device.
4. Press and hold the button on your Spedal Tracker Tag until it enters pairing mode (indicated by a light or sound).
5. Select your tracker from the list of available devices in the app to complete pairing.

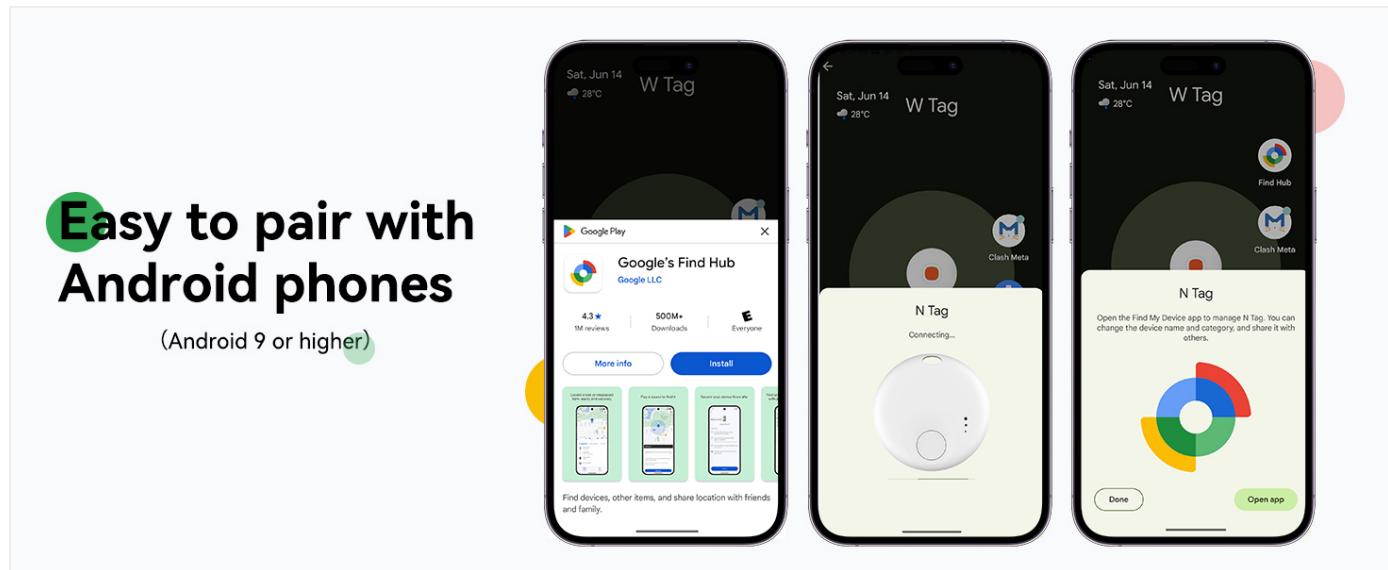

Image: Step-by-step visual guide for pairing the tracker with an Android phone using the Find Hub app.

### For iOS Devices (Apple Find My Network):

1. Ensure your iPhone has Bluetooth enabled.
2. Open the Apple Find My app.
3. Go to the "Items" tab and tap "Add Item" or the "+" icon.
4. Press and hold the button on your Spedal Tracker Tag until it enters pairing mode.
5. Follow the on-screen instructions in the Find My app to connect your tracker.

**Note:** If you switch between Android and iOS, you will need to reset the tracker and pair it again with the new device/network.

## OPERATING INSTRUCTIONS

### 1. Locating Your Items

There are two primary ways to locate your items:

- **Within Bluetooth Range (up to 100m / 330ft indoors, 500ft outdoors):** Use the "Find Nearby" feature in your respective app (Google Find Hub or Apple Find My) to get proximity hints.
- **Outside Bluetooth Range (Global Network):** If your item is far away, the tracker leverages the vast network of anonymous Android and iOS devices. When another device passes by your tracker, its location is securely updated in your app.

## Notify When Left Behind

"Get left-behind alerts by device and location. Set specific rules per device and location."

## 2. Ringing Your Tracker

If your item is nearby but out of sight, you can make the tracker emit a loud sound (up to 80dB) to help you pinpoint its exact location. Open your tracking app and select the "Play Sound" option for the desired tracker. Follow the sound to retrieve your item.

## Share Device Access with People

Let multiple Android phones track the same item—perfect for families, roommates, or travel groups.

Image: The tracker emitting a sound alert, as controlled by the smartphone app.

### 3. Sharing Location and Lost Mode

- Share Device:** You can share access to your tracker's location with family members or friends through the app. This is useful for shared items like luggage during a trip.
- Lost Mode:** If your item is lost, activate "Lost Mode" in the app. You will receive automatic notifications when another user's device detects your tag nearby, helping you recover it.

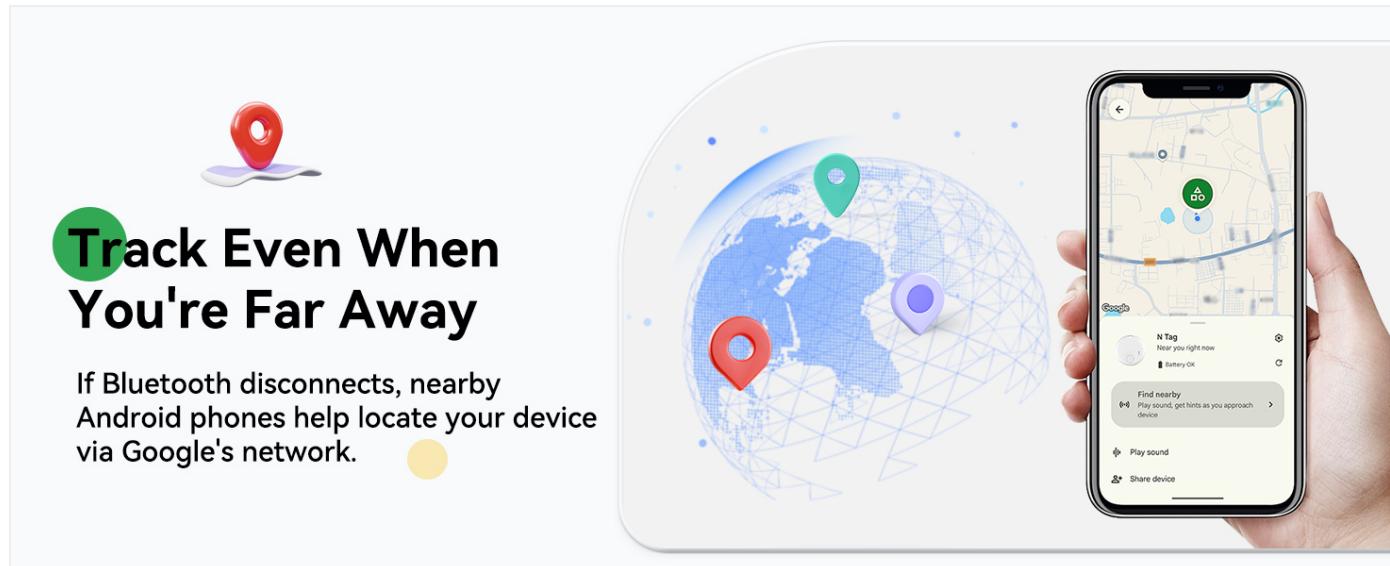

Image: Visualizing how multiple phones can track a single Spedal tracker tag.

### 4. Left Behind Notifications

Configure "Left Behind" alerts in your app to receive notifications if you move away from your tracker, preventing accidental loss. You can set specific rules based on location or device.

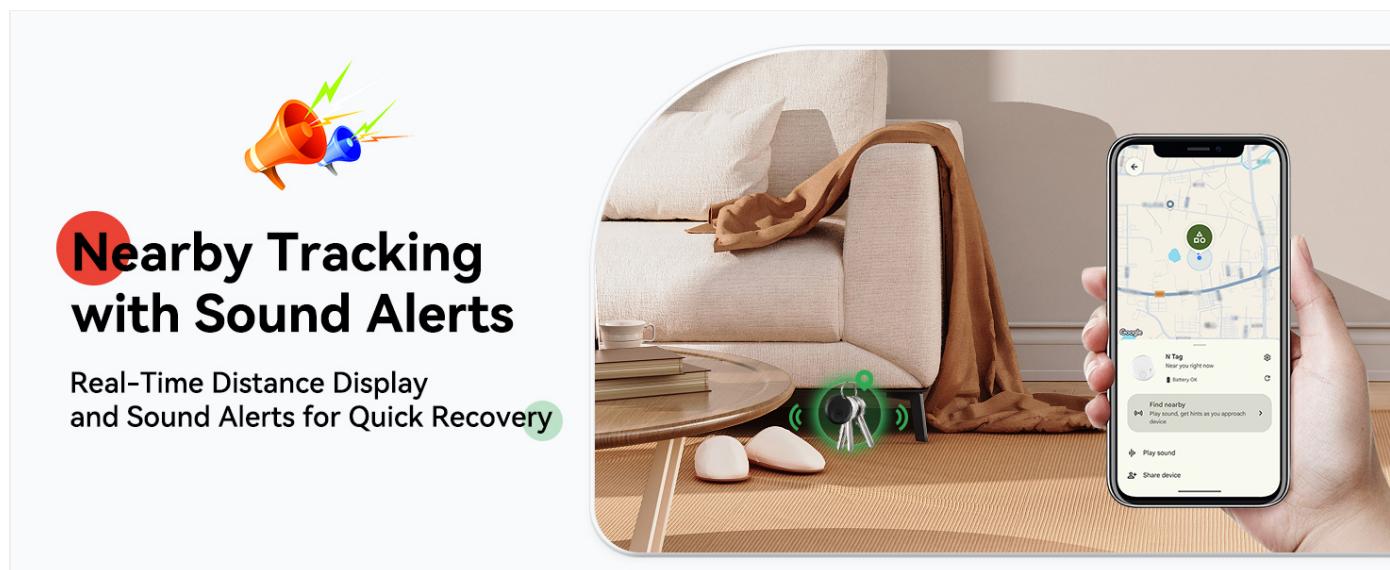

Image: Example of a "Left Behind" notification on a smartphone, showing the tracker's ability to alert users when an item is out of range.

## MAINTENANCE

### Battery Replacement

The Spedal Luggage Tracker Tag uses a replaceable CR2032 coin cell battery. When the battery level is low (indicated in your tracking app), replace it as follows:

1. Locate the battery compartment on the back of the tracker.
2. Gently twist or pry open the cover.
3. Remove the old CR2032 battery.
4. Insert a new CR2032 battery with the positive (+) side facing up.
5. Close the battery compartment cover securely.

Ensure the battery is inserted correctly to maintain functionality. Dispose of old batteries responsibly.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
Tracker not connecting/pairing	Bluetooth off, low battery, incorrect pairing mode, already paired to another device/network.	<ul style="list-style-type: none"> <li>• Ensure Bluetooth is enabled on your phone.</li> <li>• Check battery level or replace the CR2032 battery.</li> <li>• Ensure the tracker is in pairing mode (press and hold button).</li> <li>• If previously paired to another device/network, perform a factory reset (refer to manufacturer's website for specific reset instructions).</li> </ul>
Tracker not ringing loudly	Low battery, obstruction, app volume settings.	<ul style="list-style-type: none"> <li>• Replace the CR2032 battery.</li> <li>• Ensure the tracker is not heavily muffled by other items.</li> <li>• Check app settings for sound volume.</li> </ul>
Inaccurate location tracking	Weak signal, limited network coverage, GPS interference.	<ul style="list-style-type: none"> <li>• Ensure your phone has a stable internet connection.</li> <li>• Location accuracy depends on the density of nearby Android/iOS devices.</li> <li>• Move to an open area for better GPS signal if applicable.</li> </ul>
