

AlfaBot N2

AlfaBot N2 Automatic Nut Milk Maker User Manual

Model: N2

1. INTRODUCTION

The AlfaBot N2 Automatic Nut Milk Maker is designed to simplify the process of creating fresh, homemade plant-based milks. This versatile appliance can produce almond milk, oat milk, soy milk, yogurt, and grain-based beverages with ease. Featuring a powerful motor, durable stainless steel blades, and a 1000ml (35 oz) capacity, it is suitable for daily family use. The machine incorporates a delay start setting for convenience and a self-cleaning function for easy maintenance. Constructed from food-grade materials, including SUS 304 stainless steel for the interior, the AlfaBot N2 ensures safe and reliable operation.

2. SAFETY INSTRUCTIONS

Please read all safety instructions carefully before using the AlfaBot N2 Nut Milk Maker to prevent injury or

damage to the appliance.

- Always ensure the lid is properly aligned and locked before operation. An E2 error may be displayed if the lid is not securely fastened, indicating a safety measure.
- Do not immerse the main unit, power cord, or plug in water or other liquids.
- Keep the appliance out of reach of children.
- Use only the provided power cord and connect to a grounded electrical outlet.
- Avoid touching moving parts during operation.
- Do not operate the appliance if the power cord or plug is damaged, or if the appliance malfunctions or has been damaged in any manner.
- Allow the appliance to cool down before cleaning or storing.
- Exercise caution when handling hot liquids and steam.

4. PRODUCT OVERVIEW

The AlfaBot N2 is designed for efficient and convenient plant-based milk production.

Key Features:

- **Powerful Motor & 10 Stainless Steel Blades:** Ensures thorough blending and fine grinding of ingredients for smooth milk.
- **1000ml (35 oz) Capacity:** Ideal for preparing multiple servings of fresh milk.
- **5 Versatile Modes:** Dedicated settings for Nuts, Beans, Yogurt, Juice, and Grains.
- **Delay Start Setting:** Program the machine to start up to 12 hours in advance.
- **One-Touch Self-Cleaning:** Simplifies the cleaning process after use.
- **Food-Grade Materials:** Interior made of SUS 304 stainless steel for safety and durability.
- **Double Layer Heat Insulation:** Maintains temperature and ensures safe handling.

5. SETUP

Before first use, follow these steps:

1. **Unpack:** Carefully remove all components from the packaging.
2. **Clean:** Wash the interior of the nut milk maker, the lid, and all accessories (filter funnel, measuring spoon, filter bags, cleaning brush) with warm, soapy water. Rinse thoroughly and dry completely. Do not immerse the main unit in water.
3. **Placement:** Place the nut milk maker on a stable, flat, and dry surface, away from heat sources and direct sunlight.
4. **Power Connection:** Connect the power charger to the appliance and then plug it into a standard electrical outlet.

6. OPERATION

Basic Steps for Making Plant-Based Milk:

1. **Add Ingredients:** Place your desired nuts, beans, or grains into the stainless steel interior. Refer to the

recipe book for recommended quantities.

2. **Add Water:** Pour water into the machine up to the indicated maximum fill line.
3. **Secure Lid:** Ensure the lid is properly aligned and locked into place.
4. **Select Mode:** Press the 'Menu/Temp' button to cycle through the available modes (Nut, Beans, Yogurt, Juice, Grains) until your desired mode is selected.
5. **Start:** Press the 'Delay/Stop' button to begin the selected program.

Figure 6.1: Three Easy Steps. This image visually demonstrates the simple process: 1) Add preferred ingredients, 2) Add water, and 3) Select mode to start.

Operating Modes:

The AlfaBot N2 offers five specialized modes:

- **Nut Mode:** For making milks from various nuts like almonds, cashews, and walnuts.
- **Beans Mode:** Specifically designed for soy milk and other bean-based beverages.
- **Yogurt Mode:** For preparing homemade plant-based yogurts.
- **Juice Mode:** For blending fresh fruit juices.
- **Grains Mode:** Suitable for oat milk, rice milk, and other grain-based drinks.

Figure 6.2: 5 Basic Modes. This image displays the AlfaBot N2 alongside various plant-based milks and juices, illustrating the versatility of its five operating modes: Millet Milk, Fruit Juice, Soy Milk, Grains Milk, Yogurt, and Nut Milk.

Delay Start Function:

The delay start feature allows you to set a timer for the machine to begin operation at a later time, up to 12 hours. This is useful for preparing ingredients in advance and having fresh milk ready when you need it.

Figure 6.3: Delay Start Setting. This image shows the machine with a visual representation of setting a delay from 8:00 PM to 8:00 AM, allowing users to enjoy morning beverages.

7. MAINTENANCE AND CLEANING

Regular cleaning ensures the longevity and hygienic operation of your AlfaBot N2 Nut Milk Maker.

Self-Cleaning Mode:

After each use, utilize the one-touch self-cleaning function:

1. Empty any remaining contents from the machine.
2. Add clean water up to the maximum fill line.
3. Select the 'Self Clean' mode on the control panel.
4. Press the 'Delay/Stop' button to start the cleaning cycle.
5. Once the cycle is complete, discard the water and rinse the interior.

Manual Cleaning:

For thorough cleaning, especially of the lid and blades:

- Always unplug the appliance before cleaning.

- Use the provided cleaning brush to remove any residue from the blades and interior walls.
- Wash the lid and removable accessories (filter funnel, filter bags, measuring spoon) with warm, soapy water. Rinse and dry thoroughly.
- Wipe the exterior of the main unit with a damp cloth. Do not use abrasive cleaners or immerse the main unit in water.

Figure 7.1: One-Touch Self-cleaning. This image shows the interior of the machine during the self-cleaning process, with water swirling, and includes the cleaning brush and filter bags as accessories.

8. TROUBLESHOOTING

If you encounter issues with your AlfaBot N2, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Machine does not start	Power cord not properly connected; Lid not securely locked.	Ensure power cord is firmly plugged in. Verify the lid is correctly aligned and locked into place.
E2 Error displayed	Lid is not properly closed or aligned.	Open the lid and re-align it with the handle, ensuring it clicks into the locked position.

Problem	Possible Cause	Solution
Milk is too thin or watery	Insufficient ingredients; Too much water.	Increase the quantity of nuts/beans/grains or reduce the amount of water. Refer to the recipe book for optimal ratios.
Milk is gritty or pulpy	Ingredients not fully processed; Filter bag not used.	Ensure ingredients are properly soaked (if required). For extra smooth milk, use the provided filter funnel and bag after processing.
Lid leaks during operation	Lid not properly sealed; Overfilling.	Ensure the lid is securely locked and the silicone seal is correctly seated. Do not exceed the maximum fill line.

9. SPECIFICATIONS
