# 4. SETUP

---

## 4.1 Charging the Power Bank

Before initial use, fully charge the power bank. Use a compatible USB-C wall charger (not included) and one of the provided 240W USB-C cables or the built-in USB-C cable to connect the power bank's input port to a power source.

1. Connect one end of a USB-C cable to the power bank's input port (or use the built-in cable).
2. Connect the other end of the USB-C cable to a USB-C wall charger.
3. Plug the wall charger into a power outlet.
4. The digital display on the power bank will show the charging progress. It is fully charged when the display shows "100%".

*Note: For optimal charging speed of the power bank, use a fast charging wall adapter.*

## 5.1 Charging Devices with the Power Bank

The power bank can charge various devices using its built-in USB-C cable or its additional USB-C and USB-A output ports.

### 1. Using the Built-in USB-C Cable:

- Pull out the built-in USB-C cable from its storage slot.
- Connect the USB-C end directly to your compatible device's charging port.
- The power bank will automatically begin charging your device.

### 2. Using External USB-C or USB-A Cables:

- Connect one end of a charging cable (e.g., one of the provided 240W USB-C cables) to an output port on the power bank (USB-C or USB-A).
- Connect the other end of the cable to your device's charging port.
- The power bank will automatically begin charging your device.

The digital display will show the remaining battery percentage of the power bank during device charging.

## 5.2 Using the 240W USB-C Cables

The included 240W USB-C to USB-C cables are designed for high-speed charging of compatible devices. They can be used with the power bank or with a separate USB-C wall charger.

1. Connect one end of the 240W USB-C cable to a compatible power source (e.g., a 240W wall adapter, or the power bank's USB-C output port).

2. Connect the other end of the cable to your device's USB-C charging port.
3. Ensure both the power source and the device support the desired charging wattage for optimal performance.

## **6. MAINTENANCE**

---

### **6.1 Cleaning**

- Ensure the power bank is disconnected from all power sources and devices before cleaning.
- Wipe the surface of the power bank and cables with a soft, dry, lint-free cloth.
- Do not use abrasive cleaners, solvents, or chemical agents.

### **6.2 Storage**

- Store the power bank and cables in a cool, dry place, away from direct sunlight and extreme temperatures.
- Avoid storing in environments with high humidity.
- If storing for an extended period, charge the power bank to approximately 50-75% every 3 months to maintain battery health.
