Maintenance

To ensure the longevity and appearance of your sofa table, follow these maintenance guidelines:

- **Cleaning:** Wipe the table surface with a soft, damp cloth. Avoid using abrasive cleaners, harsh chemicals, or excessive moisture, as these can damage the finish.
- **Spills:** Clean up spills immediately to prevent staining or damage to the wood finish.
- **Environmental Factors:** Avoid placing the table in direct sunlight or near heat sources, which can cause fading or warping. Maintain a stable room temperature and humidity.
- **Regular Checks:** Periodically check all screws and connections to ensure they remain tight. Re-tighten if necessary.

Troubleshooting

If you encounter any issues with your SUPERJARE Sofa Table, refer to the following common problems and solutions:

- **Table Wobbles:**
 - Check that all screws are securely tightened.
 - Adjust the leveling feet on the bottom of the legs to compensate for uneven floors.
 - Ensure the anti-tip kit is properly installed and secured to the wall.
 - If your wall has a trim, the table may not sit perfectly flush, which can cause slight wobbling. Consider using wall stoppers or spacers to create a stable fit.
- **Power Outlets Not Working:**
 - Verify that the table's main power cord is securely plugged into a functional wall outlet.
 - Check if the wall outlet itself is working by plugging in another device.
 - Ensure the power outlet units are correctly installed and connected within the table.
- **Gap Between Table Sections:**
 - Ensure the sheet metal connectors are properly installed and tightened to pull the two sections together.
 - Verify that the table is placed on a flat, level surface.
