2. SAFETY INFORMATION

Before operating your new freezer, please read all safety instructions carefully to prevent personal injury or property damage. Always ensure the freezer is placed on a stable, level surface and is properly grounded. Do not store explosive substances such as aerosol cans with a flammable propellant in this appliance. This appliance is intended for household use only.

3. SETUP AND INSTALLATION

3.1 Unpacking

- Remove all packaging materials, including foam and adhesive tape.
- Inspect the freezer for any shipping damage. Report any damage to the retailer immediately.

3.2 Placement

- Place the freezer on a firm, level floor that is strong enough to support the unit when fully loaded.
- Ensure adequate air circulation around the freezer. Allow at least 4 inches (10 cm) of space on the sides and back, and 12 inches (30 cm) at the top.
- This model is 'Garage Ready', designed to operate effectively in extreme ambient temperatures from 0°F to 110°F (-17°C to 43°C).

3.3 Electrical Connection

- Plug the freezer into a dedicated, grounded 120V, 60Hz electrical outlet. Do not use extension cords or adapter plugs.
- Allow the freezer to stand upright for at least 2-4 hours before plugging it in to allow the refrigerant to settle.

4. OPERATING INSTRUCTIONS

4.1 Initial Power-On

- Once plugged in, the 'Power' indicator light (red) will illuminate, and the 'Operation' indicator light (green) will turn on when the compressor is running.
- Allow the freezer to cool for approximately 4 hours before placing food inside.

4.2 Adjusting Temperature

- The adjustable thermostat is located on the front of the unit.
- Turn the dial to your desired setting. '1' is the warmest setting, and '7' is the coldest. For general use, a setting between '3' and '5' is recommended.

4.3 Interior Basket

- The freezer includes a removable vinyl-coated wire basket for organized storage of smaller or frequently accessed items.
- To remove, simply lift the basket upwards.

5. MAINTENANCE

5.1 Defrosting

- Manual defrosting is required when frost accumulation reaches approximately 0.25 inches (6 mm).
- To defrost, unplug the unit, remove all food, and open the lid. Place a shallow pan under the defrost drain plug located on the side of the unit to collect water.
- Once defrosted, clean and dry the interior thoroughly before plugging the unit back in and returning food.

5.2 Cleaning

- Clean the exterior with a mild detergent and a soft cloth. The vinyl-coated exterior is easy to wipe down.
- For the interior, use a solution of two tablespoons of baking soda to one quart of warm water. Rinse and dry thoroughly.

6. TROUBLESHOOTING

If your freezer is not operating correctly, check the following common issues before contacting customer support:

- **Freezer not running:** Check if the power cord is securely plugged into a live outlet. Ensure the circuit breaker has not tripped.
- **Temperature is not cold enough:** Verify the thermostat setting is appropriate. Avoid frequent door openings. Ensure the freezer is not overloaded.
- **Excessive noise:** Check if the freezer is level. Ensure there is enough space around the unit for proper air circulation.

For more detailed troubleshooting or persistent issues, please refer to the complete owner's manual or contact Frigidaire customer support.
