

Qubo 3C-HCASV031

Qubo 3-Channel Dashcam Trio User Manual

Model: 3C-HCASV031

1. INTRODUCTION

The Qubo 3-Channel Dashcam Trio is an advanced vehicle recording system designed to capture comprehensive footage from the front, rear, and interior of your vehicle. Featuring 2K QHD resolution for the front camera and Full HD for the rear and cabin cameras, along with built-in Wi-Fi and GPS, this system provides detailed records of your journeys and incidents. This manual provides essential instructions for installation, operation, maintenance, and troubleshooting to ensure optimal performance of your dashcam.

2. SETUP

2.1 Package Contents

Before installation, verify that all components are present:

- Qubo 3-Channel Dashcam Main Unit (Front Camera)
- Rear Camera
- Cabin Camera
- Power Cable (Car Charger)
- Rear Camera Connection Cable
- Mounting Adhesives/Brackets
- User Manual

2.2 SD Card Installation

The dashcam supports microSD cards up to 1TB. A high-speed V30 rated card is required for reliable recording across all three channels.

1. Ensure the dashcam is powered off.
2. Locate the microSD card slot on the main unit.
3. Insert the microSD card with the contacts facing the correct direction until it clicks into place.
4. Upon first use or after prolonged use, it is recommended to format the SD card via the Qubo App or dashcam settings.

Expandable storage up to

1TB

HIGHEST IN THE CATEGORY

To drive without worrying about losing footage

32 GB | 64 GB | 128 GB | 256 GB
512 GB | 1 TB

Non-Compatible SD Cards

Use only authentic SD Cards for flawless performance

Image: The Qubo 3-Channel Dashcam main unit displaying the microSD card slot and examples of compatible V30 high-speed SD cards, supporting up to 1TB storage.

2.3 Mounting the Dashcam

Mount the dashcam securely to ensure stable footage. The main unit (front camera) typically mounts on the windshield behind the rearview mirror. The rear camera mounts on the rear windshield, and the cabin camera can be integrated with the main unit or mounted separately to cover the interior.

- Clean the mounting surface thoroughly before applying adhesive.
- Ensure the front camera has an unobstructed view of the road.
- Position the rear and cabin cameras to cover desired areas without obstructing driver visibility.
- Route cables neatly along the vehicle's trim to avoid interference with driving.

3-Channel Dashcam for 360° Coverage

Simultaneous recording from all 3 cameras

2.4 Power Connection

Connect the dashcam to your vehicle's power source using the provided car charger and power cable. The dashcam will typically power on and begin recording automatically when the vehicle starts.

2.5 App Installation and Pairing

Download the Qubo Pro App from the Google Play Store or Apple App Store to manage your dashcam settings, view live footage, and access recordings.

1. Search for 'Qubo Pro' in your device's app store.
2. Install the app and create an account if prompted.
3. Power on the dashcam.
4. Open the Qubo Pro App and follow the on-screen instructions to connect to your dashcam via Wi-Fi. The dashcam will broadcast a Wi-Fi network for connection.

3. OPERATING INSTRUCTIONS

3.1 Automatic Recording

Once powered on, the Qubo Dashcam Trio automatically begins recording. Footage is saved to the installed microSD card.

3.2 Recording Modes

- **Always-On Recording:** Continuous recording while the vehicle is in operation.
- **Auto-Replace Recording:** When the SD card is full, the oldest footage is automatically overwritten by new recordings.
- **Auto Save on Impact (G-Sensor):** The built-in G-Sensor detects sudden impacts or collisions and automatically locks the corresponding footage to prevent it from being overwritten. These 'Event Files' are stored separately.
- **Instant Clip Recording:** Use the app or a physical button (if available) to manually save a short clip of current footage.

footage to prevent overwriting.

3.3 Live View and Playback

You can view live footage from all cameras directly on the dashcam's 3.2-inch IPS LCD screen or through the Qubo Pro App on your smartphone. The app also allows you to review recorded videos, download clips, and check trip data.

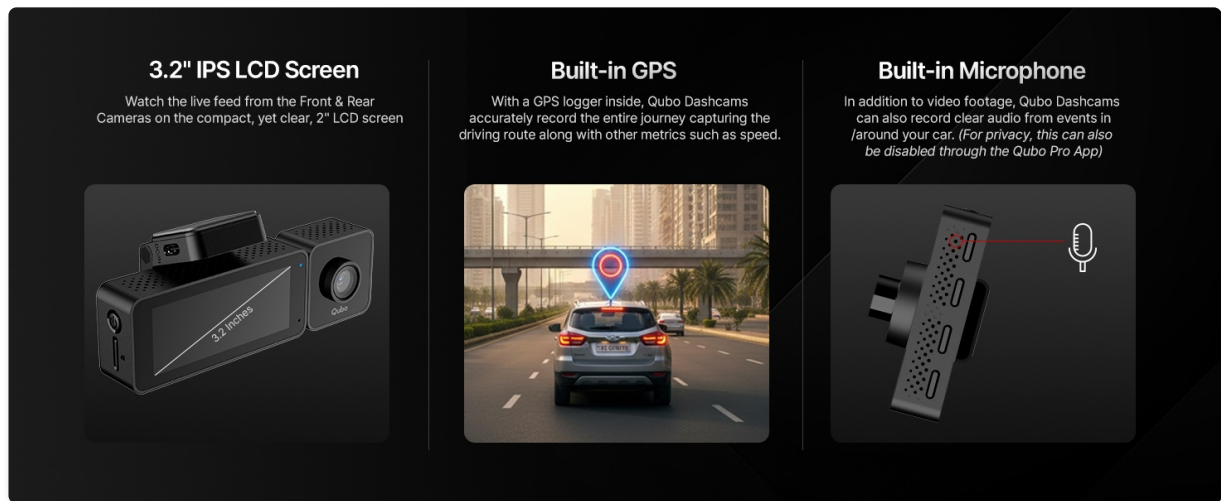

Image: Diagrams highlighting the Qubo Dashcam's 3.2-inch IPS LCD screen for live viewing, built-in GPS for tracking, and integrated microphone for audio recording.

3.4 GPS Tracking and Trip History

The built-in GPS module records your vehicle's location and speed. This data, along with your trip history, can be reviewed through the Qubo Pro App, providing a comprehensive log of your journeys.

3.5 Night Vision

The dashcam features IR Night Vision for the cabin camera and advanced image processing for low-light conditions, ensuring clear recordings even in challenging lighting environments.

4. MAINTENANCE

4.1 SD Card Management

- Regularly format your microSD card (e.g., once a month) to maintain optimal performance and prevent data corruption. This can usually be done through the Qubo Pro App or the dashcam's settings menu.
- Replace the microSD card if you notice frequent errors, corrupted files, or a significant decrease in recording quality.

4.2 Cleaning

- Gently wipe the camera lenses with a soft, lint-free cloth to ensure clear footage. Avoid abrasive materials or harsh chemicals.
- Keep the dashcam unit free from dust and debris.

4.3 Firmware Updates

Periodically check for firmware updates via the Qubo Pro App. Updates can improve performance, add

new features, and resolve known issues. Follow the app's instructions carefully during the update process.

5. TROUBLESHOOTING

If you encounter issues with your Qubo 3-Channel Dashcam Trio, refer to the following common solutions:

- **Dashcam not powering on:** Ensure the power cable is securely connected to both the dashcam and the car's power outlet. Check the car charger for proper function.
- **Recording issues (no recording, corrupted files):** Format the microSD card. If the issue persists, try a new, high-speed V30 rated microSD card. Ensure the card is inserted correctly.
- **Wi-Fi connectivity problems:** Ensure the dashcam is powered on and within range of your smartphone. Restart both the dashcam and your phone. Re-pair the device through the Qubo Pro App.
- **Poor video quality:** Clean the camera lenses. Ensure the dashcam is securely mounted and not vibrating excessively. Check if the recording resolution settings are optimal in the app.
- **Adhesive issues:** Ensure the mounting surface is clean and dry before applying adhesive. For persistent issues, consider using stronger automotive-grade adhesive tape.
- **App not responding:** Close and reopen the Qubo Pro App. Clear the app's cache or reinstall it if necessary.

5.1 Factory Reset

If troubleshooting steps do not resolve the issue, a factory reset may be necessary. Refer to the Qubo Pro App or the dashcam's settings menu for the factory reset option. **Note:** A factory reset will erase all custom settings and may require re-pairing with the app.

6. SPECIFICATIONS

Engineered for Indian Roads

Powered by Supercapacitor that's safer & more durable across a wide temperature range

The image shows the Qubo Dashcam Trio components: a front camera, a rear camera, and a central unit with a screen. The background is split into two scenes: a snowy mountain road on the left and a desert road on the right, both with cars driving.

Delivers the same level of high performance from **-20°C to 85°C**

Safer than **Li-Ion Batteries**

Image: The Qubo Dashcam Trio positioned on a road, illustrating its robust design and ability to maintain high performance across a wide temperature range (-20°C to 85°C).

Feature	Detail
Model Number	3C-HCASV031
Front Camera Resolution	2K QHD
Rear Camera Resolution	FHD 1080p
Cabin Camera Resolution	FHD 1080p
Front Camera Field of View (FOV)	140°
Rear Camera Field of View (FOV)	120°
Cabin Camera Field of View (FOV)	120°
Storage Support	Up to 1TB microSD (V30 required)

Feature	Detail
Connectivity	Built-in Wi-Fi, Built-in GPS
Power Source	Supercapacitor
Operating Temperature	-20°C to 85°C
Product Dimensions	12.57 x 4.29 x 3.8 cm
Item Weight	109 g
Manufacturer	Hero Electronix Pvt. Ltd.

7. WARRANTY AND SUPPORT

7.1 Warranty Information

For detailed warranty terms and conditions, please refer to the warranty card included with your product or visit the official Qubo website. Keep your purchase receipt as proof of purchase for warranty claims.

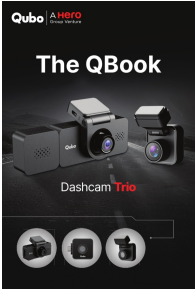

7.2 Customer Support

For technical assistance, installation support, or any other inquiries, please contact Qubo customer support:

- **Toll-free helpline:** 9319095757
- **Manufacturer:** Hero Electronix Pvt. Ltd.
- Qubo offers installation and service support across 70+ cities.
