Kollgux Dog Bark Pro

Kollgux Dog Bark Pro Collar Instruction Manual

Model: Dog Bark Pro

Introduction

Thank you for choosing the Kollgux Dog Bark Pro Collar. This intelligent anti-bark device is designed to help manage and reduce excessive barking in dogs of various sizes, from small to large. It features advanced AI bark recognition and multiple correction modes to provide a safe, effective, and humane training experience. Please read this manual thoroughly before use to ensure proper operation and the safety of your pet.

Image: Illustrating the Kollgux collar's effectiveness in reducing barking by up to 95% and its ability to detect barks, howls, and whines.

Safety Information

Your pet's safety and comfort are paramount. Please observe the following guidelines:

- Do not leave the collar on your dog for more than 12 consecutive hours.
- Regularly check your dog's neck for signs of irritation, redness, or pressure sores. If any are found, discontinue use until the skin heals.
- Ensure the collar is fitted correctly, not too tight or too loose. You should be able to fit two fingers comfortably between the collar and your dog's neck.
- This device is intended for healthy dogs. Consult a veterinarian before use if your dog has any health conditions.
- The static correction mode should be used with caution and only after other modes have been attempted. Start with the lowest static level.
- This collar is not a toy. Keep it out of reach of children.

- The collar is IPX6 waterproof, but it is not designed for prolonged submersion.

Package Contents

Please verify that all items are present in your package:

- Kollgux Dog Bark Pro Collar Unit
- Adjustable Nylon Strap
- USB Charging Cable
- Long Contact Points (for long-haired dogs)
- Short Contact Points (for short-haired dogs)
- Silicone Covers for Contact Points (2 sets)
- User Manual

Setup Guide

1. Charging the Device

Before initial use, fully charge the collar. Connect the USB charging cable to the collar's charging port and a standard USB power adapter. The LED indicator will show charging status. A full charge takes approximately 2 hours and provides up to 20 days of use.

Image: The Kollgux collar connected to a USB charger, illustrating its fast charging time and extended battery life.

2. Attaching Contact Points and Silicone Covers

Select the appropriate contact points (long for long-haired dogs, short for short-haired dogs) and screw them firmly onto the collar unit. Place the silicone covers over the contact points for added comfort and to prevent skin irritation.

3. Fitting the Collar

Place the collar around your dog's neck so that the contact points are positioned underneath, touching the skin. Adjust the

strap to ensure a snug but comfortable fit. You should be able to slide two fingers between the collar and your dog's neck. The collar should not be too loose, as this can reduce effectiveness, or too tight, which can cause discomfort or skin irritation.

Operating Instructions

The Kollgux Dog Bark Pro Collar features an intelligent AI chip for accurate bark detection and offers four adjustable correction modes.

1. Powering On/Off

Press and hold the power button for 3 seconds to turn the device on or off. The display will illuminate when powered on.

2. Understanding Correction Modes

The collar offers 4 adjustable modes to suit different dog temperaments and training needs:

- **Beep Mode (Levels 1-5):** Emits an audible tone. Suitable for sensitive dogs or initial training.
- **Vibration Mode (Levels 1-5):** Provides a gentle vibration. Can be used alone or in combination with beep.
- **Beep + Vibration Mode (Levels 1-5):** Combines an audible tone with vibration.
- **Beep + Vibration + Static Mode (Levels 1-9):** Combines beep, vibration, and a static pulse. This mode is for more stubborn barkers. Static levels are customizable from 1 to 9.

Image: Visual representation of the four adjustable correction modes and their recommended usage for different dog sensitivities.

3. Adjusting Sensitivity and Correction Levels

Use the buttons on the collar unit to cycle through modes and adjust intensity levels. Start with the lowest effective level and gradually increase if necessary. The collar's display will show the current mode and level settings.

4. AI Bark Recognition Technology

The collar is equipped with an advanced AI chip that learns and distinguishes your dog's unique barking pattern from other environmental noises like wind, cars, or other dogs. This technology minimizes false triggers, ensuring corrections are only applied when your dog barks excessively.

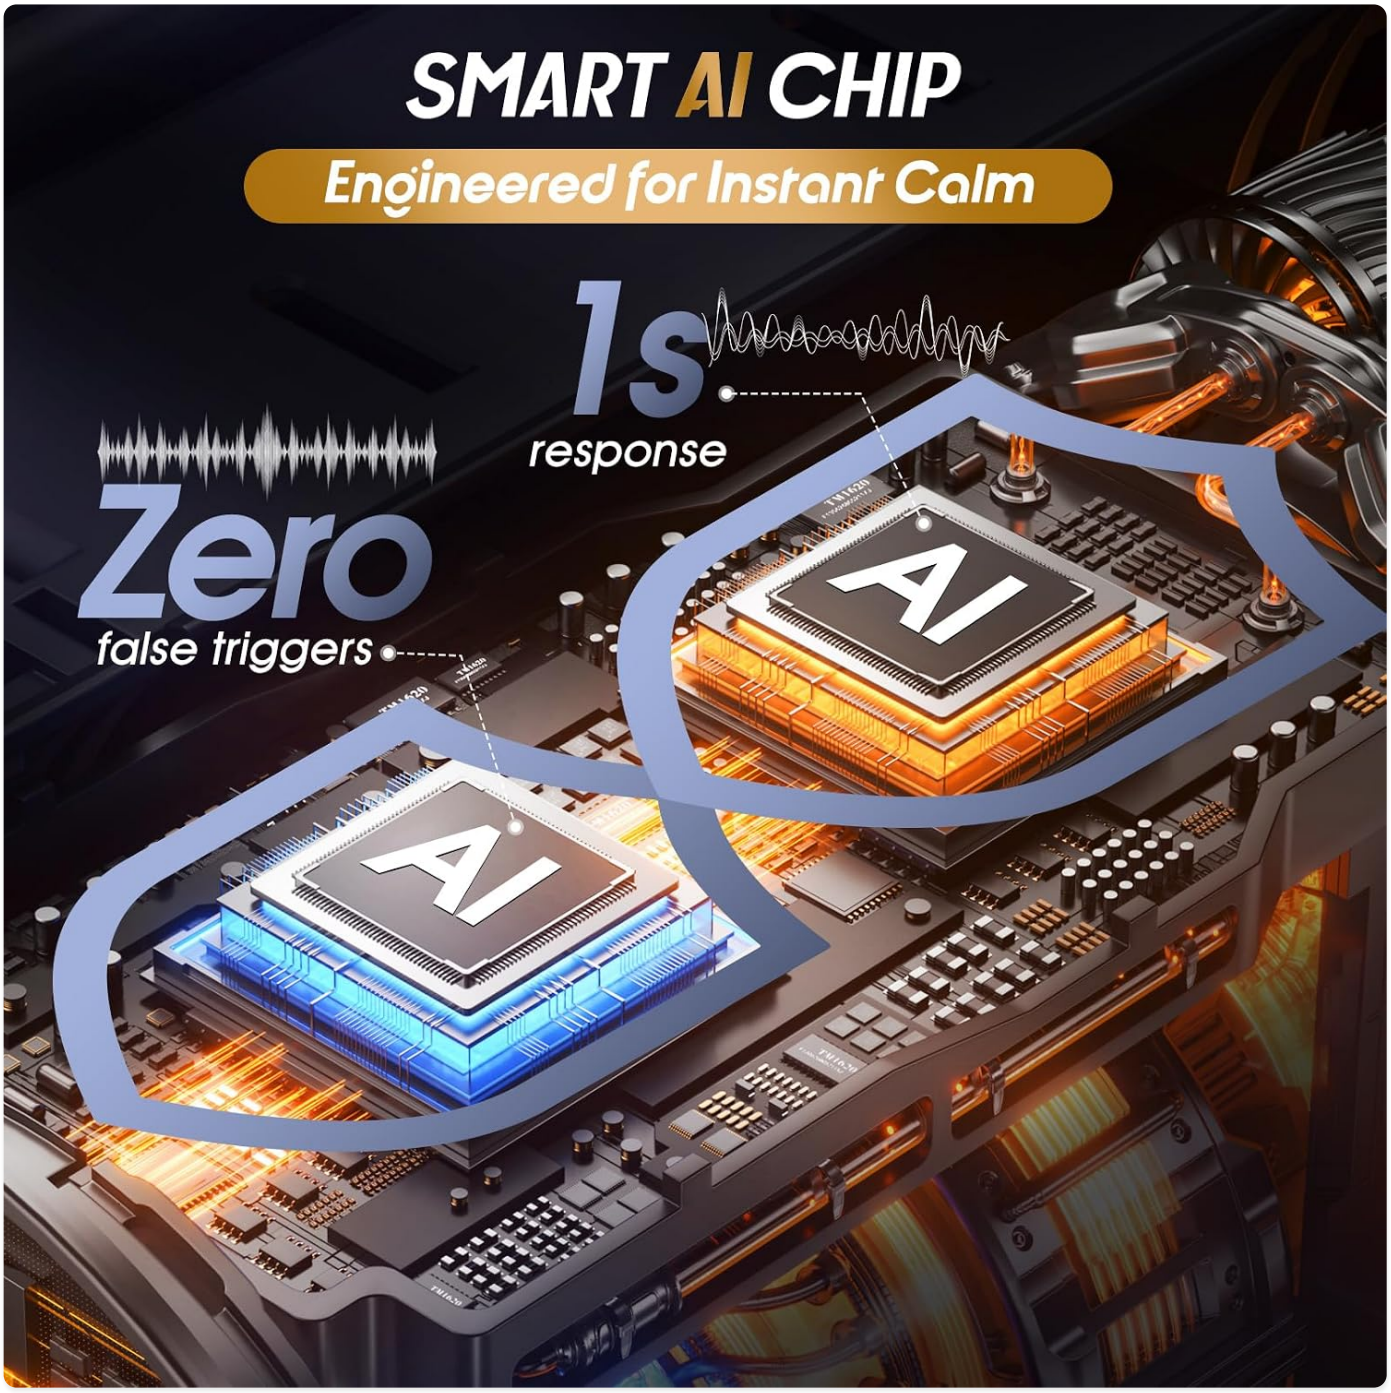

Image: Depiction of the smart AI chip, highlighting its rapid response time and ability to prevent false triggers.

5. Automatic Sleep Mode

The collar features an intelligent automatic sleep mode to prevent over-stimulation. If the collar detects continuous barking for a prolonged period, it will temporarily enter sleep mode to protect your dog.

Maintenance

Proper maintenance ensures the longevity and effectiveness of your Kollgux Dog Bark Pro Collar.

- **Cleaning:** Regularly clean the collar unit and strap with a damp cloth. Avoid using harsh chemicals or abrasive cleaners. Ensure the charging port is dry before charging.
- **Contact Points:** Periodically check the contact points for dirt or debris. Clean them gently to ensure proper skin contact.
- **Strap Inspection:** Inspect the nylon strap for wear and tear. Replace if damaged to ensure secure fitting.

- **Storage:** When not in use for extended periods, store the collar in a cool, dry place. Charge the battery every few months to maintain its health.

Troubleshooting

If you encounter issues with your Kollgux Dog Bark Pro Collar, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Collar not activating when dog barks.	• Collar is off. • Battery is low or dead. • Collar is too loose. • Contact points are not touching skin. • Sensitivity setting is too low.	• Turn on the collar. • Charge the battery fully. • Tighten the collar to ensure proper contact. • Ensure contact points are appropriate for fur length and making contact. • Increase the sensitivity level.
Collar activating without dog barking (false triggers).	• Sensitivity setting is too high. • External noises are mimicking bark frequency.	• Decrease the sensitivity level. • Ensure the AI chip has time to learn your dog's bark.
Dog shows signs of discomfort or irritation.	• Collar is too tight. • Contact points are causing irritation. • Correction level is too high. • Collar worn for too long.	• Loosen the collar slightly. • Ensure silicone covers are used. Check for sores and discontinue use if present. • Reduce the correction level. • Limit wear to 12 hours per day and reposition daily.
Battery not holding charge.	• Faulty charging cable or adapter. • Battery degradation over time.	• Try a different USB cable and adapter. • Contact customer support if the issue persists after trying a different cable/adapter.

Specifications

Feature	Detail
Brand	Kollgux
Model	Dog Bark Pro
Correction Modes	4 (Beep, Vibration, Beep+Vibration, Beep+Vibration+Static)
Static Levels	1-9 (customizable)
Battery Life	Up to 20 days (after 2-hour charge)
