**Figure 4.1:** The power bank offers powerful compatibility, meeting the fast charging requirements of mainstream devices with PD and QC3+ support.

# Intelligente Digitalanzeige

**Figure 4.2:** The intelligent digital display shows the battery percentage. It blinks when the battery level is below 5% and turns off 15 seconds after a full charge.

## 5. SETUP

### 5.1 Initial Charging of the Power Bank

Before first use, fully charge the power bank. Connect the provided USB-A to USB-C cable to the power bank's input port and connect the other end to a compatible USB wall charger (not included). For the fastest charging, use a charger of 18W or higher and a fast-charging compatible cable. The power bank can be fully charged in approximately 4 hours under optimal conditions (YILANS lab test data).

## 6.2 Checking Battery Level

Press the power button once to activate the digital display, which will show the current battery percentage. The display will turn off automatically after a few seconds to conserve power.

## 7. MAINTENANCE

Proper maintenance ensures the longevity of your power bank:

- Clean the power bank with a dry, soft cloth. Do not use abrasive cleaners or solvents.
- Store the power bank in a cool, dry place away from direct sunlight and extreme temperatures.

- If not used for extended periods, charge the power bank at least once every three months to maintain battery health.

## 8. TROUBLESHOOTING

If you encounter issues with your power bank, refer to the following common solutions:

- **Power bank not charging:** Ensure the charging cable and wall adapter are working correctly and are securely connected. Try a different cable or adapter.
- **Device not charging from power bank:** Check if the power bank has sufficient charge. Ensure the cable connecting your device to the power bank is functional and properly connected.
- **Slow charging:** Verify that both the power bank and your device support fast charging protocols (PD3.0, QC4.0) and that you are using a compatible fast-charging cable.
- **Digital display not working:** Press the power button to activate the display. If it remains off, the power bank might be completely discharged or require service.
