## 3.2 Attaching the Retro Bar

The Retro Bar provides physical controls. It attaches magnetically to the top of the Retro Case.

1. Align the Retro Bar with the top edge of the Retro Case.
2. The magnetic connection will secure it in place. Ensure the physical buttons align with your iPhone's camera controls.

## 3.3 Attaching the Leather Handle and Lanyard

For improved grip and portability, attach the leather handle and lanyard.

- The Leather Handle slides onto the side of the Retro Case, providing an ergonomic grip.
- Attach the Lanyard to the designated loop on the Retro Case for secure carrying.

### 3.4 Installing the Fotorgear App

For full functionality and customization, download the Fotorgear app from the App Store. The kit also works with the iPhone's native camera app and other compatible third-party apps like DAZZ Camera and Meitu.

## 4. OPERATING INSTRUCTIONS

### 4.1 Using Physical Controls

The Retro Bar features physical buttons and dials for intuitive camera control:

- **Shutter Button:** Press to capture photos or start/stop video recording.
- **Adjustment Dials (Knob1, Knob2):** These can be customized via the Fotorgear app to control functions such as manual focus, zoom, exposure compensation (EV), or filter selection.

## COMPATIBILITY

Fotorgear App

Native camera

The kit includes a detachable Retro Bar with a shutter and adjustment buttons. It connects to your iPhone for enhanced camera control, allowing you to easily adjust focus, capture photos, zoom, modify exposure compensation, and switch modes using the native camera.

\*For detailed instructions, please refer to the user manual.

## 5. MAINTENANCE

- Keep the Retro Case and Retro Bar clean by wiping with a soft, dry cloth.
- Avoid exposing the kit to extreme temperatures, moisture, or harsh chemicals.
- Store the kit in a protective pouch when not in use to prevent scratches.

## 6. TROUBLESHOOTING

### 6.1 Controls Not Responding

- Ensure the Retro Bar is securely attached to the Retro Case.

- Verify that the Fotorgear app or native camera app is open and active.
- Check your iPhone's Bluetooth settings to ensure the kit is connected (if applicable, though the description implies physical connection).
- Restart your iPhone and the Fotorgear app.

6.2 External Lenses/Filters Not Fitting

- Ensure you are using Fotorgear T-mount compatible lenses or standard 67mm filters with the provided adapter.
- Check for any obstructions or misalignment during attachment.
