Voice Control

The image shows the HUPEJOS V100-2CH dash cam system. The main front unit is a black rectangular device with a 4-inch touch screen. The screen displays a live feed of a road with a car in the distance, along with various status icons and a speedometer showing 30 mph N. The unit is mounted on a black suction cup. To the left of the main unit is a separate rear camera unit, which is a small black cylindrical device with a lens. Dimensions are indicated: the main unit is 4.29 inches wide and 2.52 inches high, and the rear camera is 1.82 inches wide. The rear camera has a 360-degree rotation range and a 180-degree field of view. The STARVIS 2 logo is prominently displayed in the bottom right corner of the main unit's image area.

### 3. SETUP AND INSTALLATION

Follow these steps for proper installation and initial setup of your dash cam.

1. **Prepare the Windshield:** Clean the chosen area on your windshield thoroughly. Apply an electrostatic sticker to the desired mounting spot to protect your windshield and ensure easy removal.
2. **Mount the Main Unit:** Attach the suction cup mount to the electrostatic sticker. Secure the main dash cam unit to the mount. Adjust the camera angle as needed.

3. **Install Rear Camera:** Mount the rear camera on the rear windshield using an electrostatic sticker and adhesive pad. Ensure the camera has a clear view.
4. **Connect Rear Camera:** Connect the 19.6ft rear camera cable to the 'REAR' port on the main unit and route the cable discreetly along the vehicle's interior trim using the provided trim tool.
5. **Power Connection:** Insert the 64GB memory card into the SD card slot. Connect the car charger adapter to your vehicle's 12V power outlet and the Type-C cable to the 'POWER' port on the main unit. Route the power cable neatly.
6. **Initial Power On & Format SD Card:** Once powered, the dash cam will turn on. Navigate to the settings menu via the touch screen and format the SD card before first use.

### G-Sensor & Loop Recording

Built-in G-sensor automatically locks and saves video footage when a collision or sudden impact is detected. These locked files are protected from being overwritten.

Combined with the every 3min loop recording function, when the storage space is full, it will continue to record and overwrite old files that have not been locked.

Supports a maximum 512GB SD card (64GB SD card included)

## 4. OPERATING INSTRUCTIONS

### 4.1. 4" Touch Screen Operation

The 4-inch IPS touch screen provides intuitive control over the dash cam's functions. Tap icons to access menus, adjust settings, and review footage directly on the device.

Image: Touch screen interface for easy navigation.

### 4.2. Voice Control

Control your dash cam hands-free using simple voice commands. This feature enhances safety by allowing you to manage recording without taking your hands off the wheel.

- "Take Photo"
- "Video Stop"
- "Turn on WiFi"
- "Video Start"
- "Turn on Screen"

- "Show Front Camera"

Image: Voice control commands for hands-free operation.

### 4.3. 5G WiFi & App Control

Connect your dash cam to your smartphone via built-in 5G WiFi for seamless footage transfer and management using the dedicated app. The Wi-Fi range is 6-7 meters.

- View live footage
- Download recorded videos
- Adjust camera settings
- Share footage instantly

Image: Smartphone app interface for 5G WiFi control.

### 4.4. GPS Tracking

The integrated GPS module accurately records your vehicle's location, speed, and route data, providing crucial evidence for accident documentation and insurance claims. You can view GPS data on Google Maps via the app or the free GXPlayer on PC (Windows and Mac).

Image: Built-in GPS tracking visualization.

### 4.5. Loop Recording & G-Sensor

The dash cam features intelligent loop recording, which automatically overwrites the oldest unlocked files when the memory card is full, ensuring continuous recording. The built-in G-sensor detects sudden impacts or collisions, automatically locking and saving the current footage to prevent it from being overwritten.

4.6. 24H Parking Surveillance Mode

For round-the-clock vehicle security, the 24-hour parking surveillance mode activates automatically upon detecting motion or impact. This feature requires a separate hardwire kit (ASIN: B0DBVDDT73) for continuous power supply.

Image: 24/7 Parking Surveillance Mode options.

5. NIGHT VISION CAPABILITIES

Equipped with STARVIS 2 sensors (IMX675 front, IMX307 rear) and Dual HDR technology, the dash cam delivers superior night vision, capturing clear and detailed footage even in low-light conditions for reliable evidence.

Mounting Type	Windshield Mount (Suction Cup)
Field Of View	150 Degrees
Product Dimensions	1.82 x 4.29 x 2.52 inches
Item Weight	4.5 ounces

## 7. MAINTENANCE

To ensure the longevity and optimal performance of your dash cam, regular maintenance is recommended:

- **Clean Lenses:** Regularly clean the front and rear camera lenses with a soft, lint-free cloth to prevent blurry footage.
- **Format SD Card:** Format the SD card monthly to maintain optimal recording performance and prevent data corruption. This can be done through the dash cam's settings menu.
- **Check Connections:** Periodically ensure all cables and mounts are securely connected.

## 8. TROUBLESHOOTING

If you encounter any issues, try the following steps:

- **Dash Cam Not Powering On:** Check the car charger connection and ensure the vehicle's power outlet is functioning.
- **Recording Issues:** Ensure the SD card is properly inserted and formatted. If issues persist, try a different compatible SD card.
- **Poor Video Quality:** Clean the camera lenses. Ensure the camera is securely mounted and not vibrating.
- **Wi-Fi Connection Problems:** Ensure Wi-Fi is enabled on the dash cam and your smartphone. Check the Wi-Fi range (6-7 meters).
- **GPS Not Tracking:** Ensure the dash cam has a clear view of the sky for satellite reception.
- **System Freeze/Unresponsive:** Use a thin object (like a paperclip) to press the reset button located on the main unit.

## 9. WARRANTY AND SUPPORT

Your HUPEJOS 4K Dual Dash Cam V100-2CH comes with an 18-month guarantee. For any questions, technical support, or warranty claims, please contact HUPEJOS customer support.
