Karbor MF833

Karbor MF833 4G LTE WiFi Hotspot User Manual

Model: MF833

1. INTRODUCTION

The Karbor MF833 4G LTE WiFi Hotspot provides portable internet access, allowing you to stay connected in over 80 countries without the need for a physical SIM card or contract. This device supports up to 10 simultaneous connections and offers flexible data plans, making it ideal for travelers and remote workers. This manual provides detailed instructions for setting up, operating, and maintaining your MF833 hotspot.

4. SETUP GUIDE

4.1. Initial Device Setup

1. **Insert Battery and Power On:** Open the back cover of the device and insert the provided Lithium-Ion battery. Close the cover. Press and hold the power button until the screen illuminates.
2. **Download Karbor WiFi App:** Search for 'Karbor WiFi' in your smartphone's app store (Apple App Store or Google Play Store) and download the application.
3. **Create Account and Add Device:** Open the Karbor WiFi app, create a new account, and log in. Follow

the in-app instructions to add your MF833 device, typically by scanning the QR code located on the back cover of the hotspot.

4.2. Claiming Free Data and Purchasing Plans

Your Karbor MF833 includes 1GB of free global data. To activate this and purchase additional data plans:

1. **Claim Free Data:** Within the Karbor WiFi app, navigate to the 'Claim Traffic' section. Enter your Amazon Order ID to claim your complimentary 1GB data.
2. **Purchase Data Plans:** You can purchase additional data plans directly through the Karbor WiFi app by selecting the 'Shop' icon after adding your device. Alternatively, visit the official Karbor top-up website: <https://topup.karbor.shop>.

Download App or Scan the QR Code to Get More Data Plans

For the Contiguous US only. Excludes Alaska, Hawaii, and all U.S. territories

| | | |
|---|----------------|---------------|
|  1GB | \$4.9 | 30-day |
|  3GB | \$ 12.9 | |
|  5GB | \$ 18.9 | |
|  10GB | \$ 29 | |
|  30GB | \$ 59 | |
|  50GB | \$ 79 | |

5. OPERATION

5.1. Connecting to WiFi

To connect your devices to the Karbor MF833 hotspot:

1. **Via Karbor WiFi App:** Open the Karbor WiFi app, tap the '+' icon, go to 'WiFi Setting', select the Karbor WiFi network, and enter the password displayed on the hotspot's screen or back cover.
2. **Via QR Code:** Remove the back cover of the hotspot. Use your phone's native camera to scan the QR code. This will automatically connect your device to the WiFi network. The QR code contains the network

name (SSID) and password. Example: WIFI:S:Karbor_BDF7;T:WPA;P:39989837;H:false;;

3. **Manual Connection:** On your device (smartphone, tablet, laptop), go to WiFi settings, enable WLAN, select the Karbor WiFi network (e.g., 'Karbor_XXXX'), and enter the password displayed on the hotspot's screen.

5.2. Setting Up the APN (Access Point Name)

In some cases, you may need to manually configure the APN settings. This is typically done through the device's web interface.

1. **Connect to the WiFi:** Ensure your device is connected to the Karbor MF833 WiFi network.
2. **Access Web Interface:** Open a web browser on your connected device and enter 192.168.10.1 in the URL bar.
3. **Login:** Enter the username 'karbor' and password 'password' (default credentials, please change if prompted for security).
4. **Navigate to APN Settings:** In the web interface, toggle the WiFi switch to 'OFF' to disconnect. Then, go to 'Network Settings' > 'Wi-Fi Settings'. Select 'APN', then 'Manual', and finally 'Add New' to configure APN settings as required by your service provider.

6. MAINTENANCE

To ensure the longevity and optimal performance of your Karbor MF833 hotspot, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to clean the device. Avoid liquid cleaners or abrasive materials.
- **Storage:** Store the device in a cool, dry place away from direct sunlight and extreme temperatures.
- **Battery Care:** For optimal battery life, avoid fully discharging the battery frequently. If storing for extended periods, charge the battery to about 50% and recharge every few months.
- **Software Updates:** Regularly check the Karbor WiFi app for any available firmware updates for your device to ensure the best performance and security.

7. TROUBLESHOOTING

If you encounter issues with your Karbor MF833 hotspot, refer to the following common problems and solutions:

- **No Internet Connection:**
 - Check if you have an active data plan and sufficient data balance via the Karbor WiFi app.
 - Ensure the device is in an area with 4G LTE coverage.
 - Restart the hotspot and your connected device.
 - Verify APN settings (refer to Section 5.2).
- **Cannot Connect to WiFi:**
 - Ensure the hotspot is powered on and within range.
 - Double-check the WiFi password.
 - Restart both the hotspot and your connecting device.
 - Check if the maximum number of connected devices (10) has been reached.
- **Slow Connection Speed:**
 - Move to an area with better signal strength.
 - Reduce the number of connected devices.
 - Check for any background downloads or streaming on connected devices.
- **Device Not Turning On:**
 - Ensure the battery is correctly inserted and charged.
 - Connect the device to a power source using the provided USB cable.
