Lamshaw Screen Protector for Fanvace K22 MP3 Player - Instruction Manual

Model: K22 Screen Protector

1. INTRODUCTION

This instruction manual provides comprehensive guidance for the installation, features, and care of your Lamshaw TPU Screen Protector, specifically designed for the Fanvace K22 4-inch MP3 Player. Please read these instructions carefully before proceeding with installation to ensure optimal performance and longevity of your screen protector.

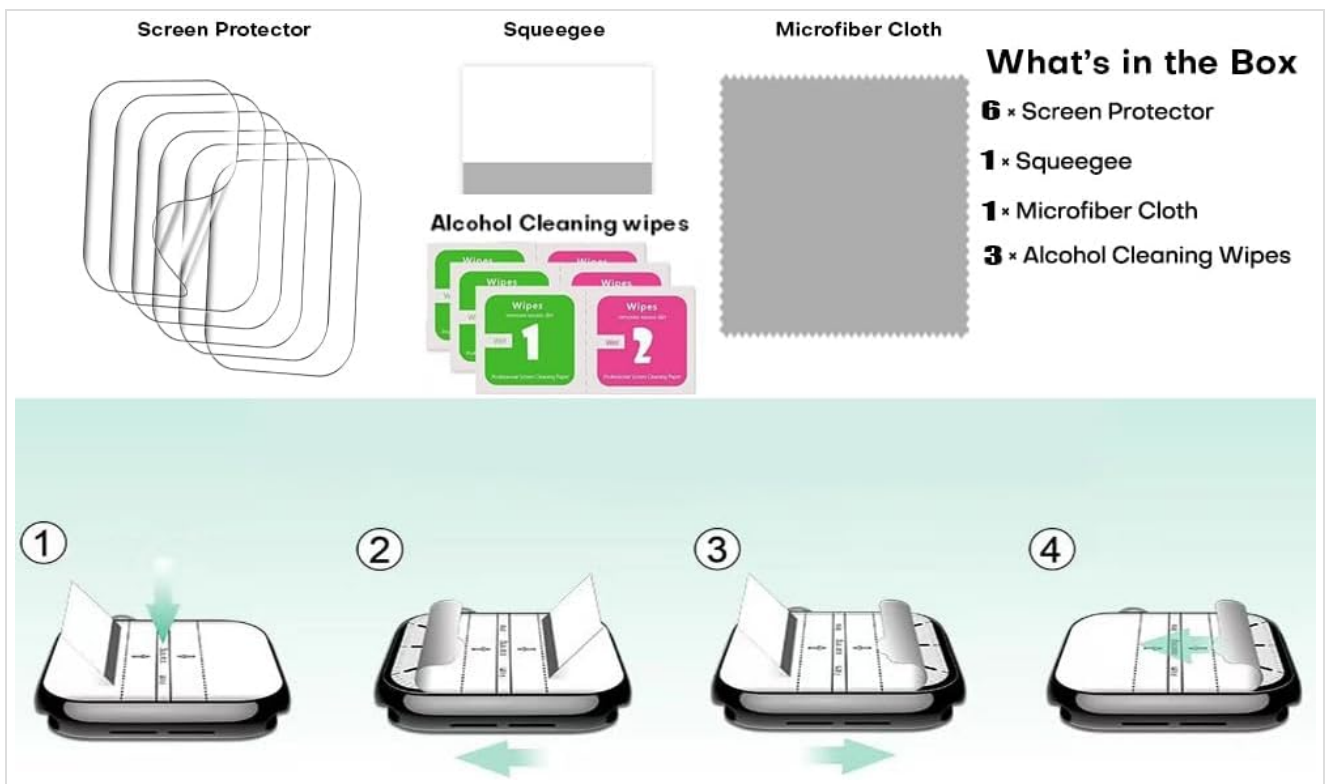

2. COMPATIBILITY

This screen protector is designed exclusively for the **Fanvace K22 4-inch MP3 Player**. Ensure your device model matches before installation to guarantee a perfect fit and proper functionality.

3. PACKAGE CONTENTS

Verify that all items listed below are present in your package:

Original Touch Response

Responds quickly without any lag or mistake

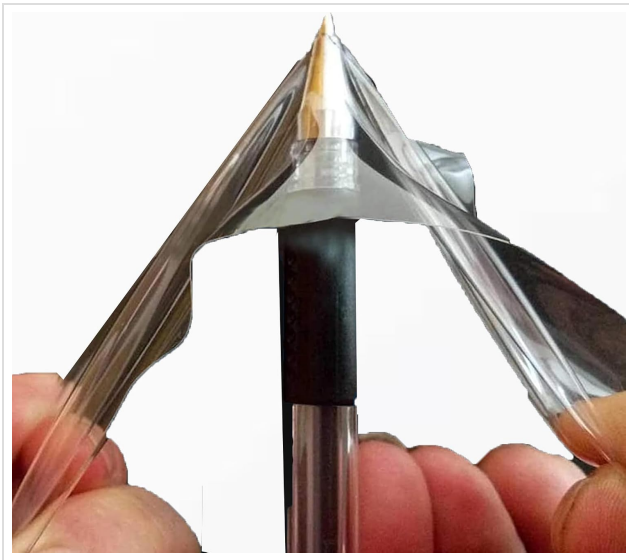

This image demonstrates the screen protector's ability to maintain original touch sensitivity, ensuring quick and accurate responses without lag or errors.

Special Oleophobic Coating

Keep clean and clear against smudges and oil residue

This image showcases the special oleophobic coating, which helps keep the screen clean and clear by repelling smudges, fingerprints, and oil residue.

This image illustrates the ultra-thin and flexible nature of the TPU screen protector, highlighting its durability and ability to conform to screen curvatures.

5. INSTALLATION INSTRUCTIONS

Follow these steps carefully for optimal installation. It is recommended to perform the installation in a dust-free environment.

5.1. Preparation

1. Clean the screen of your Fanvace K22 MP3 Player thoroughly using the provided alcohol cleaning wipe (wet wipe) to remove any dust, dirt, or oil.
2. Use the dry wipe to dry the screen completely, ensuring no residue or moisture remains.
3. Use the microfiber cloth to gently polish the screen and remove any remaining lint.

5.2. Applying the Screen Protector

The screen protector consists of three layers. The middle layer is the actual protector. The outer layers are protective films labeled "Back 1" (red) and "Front 2" (black).

1. **Step 1:** Carefully peel off the **Red "Back 1"** layer from one end of the screen protector. This exposes the adhesive side of the actual protector.
2. **Step 2:** Align the exposed adhesive edge of the screen protector with one edge of your MP3 player's screen. Slowly and steadily lower the protector onto the screen, ensuring proper alignment.
3. **Step 3:** As you apply the protector, use the provided squeegee to gently push out any air bubbles towards the edges. Work from the center outwards.
4. **Step 4:** Once the protector is fully applied and aligned, carefully peel off the **Black "Front 2"** layer. This will reveal the clear, protected screen surface.

Easy Installation

Please watch our online video
before your installation

This image illustrates the initial step of peeling off the first protective layer (labeled 'Back 1') from the screen protector, preparing it for application onto the device screen.

5.3. Troubleshooting Installation Issues

If you encounter issues during installation, such as the middle layer not adhering correctly:

- If the middle layer (the actual protector) seems to peel off with the "Front 2" layer, it indicates that the adhesive side meant for the screen was not fully exposed or adhered.
- In this situation, gently wrinkle the Red "Back 1" layer again. Separate it into two layers to ensure the middle protective film is fully detached from "Back 1" and remains on the screen.
- Re-attempt peeling the Black "Front 2" layer, ensuring the middle layer stays on the device screen.

6. MAINTENANCE

To ensure the longevity and clarity of your screen protector:

- Clean the screen protector regularly with a soft, lint-free cloth.
- For stubborn smudges, use a screen cleaner specifically designed for electronics, applied to the cloth, not directly to the screen.

- Avoid using abrasive materials or harsh chemicals, as these can damage the oleophobic coating and the protector itself.

7. TROUBLESHOOTING

7.1. Bubbles After Installation

- **Small Bubbles:** Many small bubbles will naturally disappear within 24-48 hours due to the self-healing properties of the TPU material.
- **Large Bubbles:** Gently push them towards the nearest edge using the squeegee or a soft card wrapped in the microfiber cloth.
- **Dust Particles:** If a bubble is caused by a dust particle, carefully lift the nearest edge of the protector with a piece of tape, use another piece of tape to lift the dust particle, and then reapply the protector.

7.2. Reduced Touch Sensitivity

- Ensure the screen protector is applied smoothly without any gaps or air pockets.
- If sensitivity issues persist, re-installation might be necessary, ensuring proper alignment and bubble removal.
