6. MAINTENANCE

To ensure the longevity and optimal performance of your car stereo, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to clean the screen and exterior. Avoid abrasive cleaners or solvents that could damage the surface.
- **Temperature:** Avoid exposing the unit to extreme temperatures, both hot and cold, for extended periods.
- **Software Updates:** Periodically check for available software updates to ensure the system runs efficiently and has the latest features.
- **Cable Connections:** Ensure all cables remain securely connected. Loose connections can lead to intermittent issues.

7. TROUBLESHOOTING

If you encounter issues with your car stereo, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Unit does not power on	Loose power connection, blown fuse, incorrect wiring.	Check power cable connections. Inspect vehicle's fuse box and unit's fuse. Verify wiring against diagram.
No sound	Volume too low, mute activated, incorrect speaker wiring, faulty speaker.	Increase volume. Check if mute is active. Verify speaker connections. Test with different audio source.
Touchscreen unresponsive	System freeze, software issue.	Restart the unit (refer to manual for reset button location if available). If issue persists, contact support.
GPS signal weak/lost	GPS antenna obstruction, poor mounting location.	Ensure GPS antenna has a clear view of the sky. Check antenna connection.
Bluetooth connection issues	Device not discoverable, interference, incorrect pairing.	Ensure Bluetooth is enabled on both devices. Delete previous pairings and re-pair. Move away from other wireless devices.
Backup camera not displaying	Camera cable loose, reverse trigger wire not connected, faulty camera.	Check camera input cable. Verify reverse trigger wire connection. Test camera functionality.

If these steps do not resolve the issue, please contact customer support.
