INTRODUCTION

The Haowolf X16 Bone Conduction Headphones utilize advanced bone conduction technology to transmit sound through your cheekbones, bypassing the eardrums. This design allows for clear audio while keeping your ears open to ambient sounds, enhancing safety during outdoor activities. These headphones are IPX8 waterproof, making them suitable for various environments, including swimming and high-intensity workouts. They feature Bluetooth 5.4 for stable connectivity and offer up to 10 hours of playtime on a single charge.

Aware & Safe

All-Day Power

Go Anywhere

Long Power Life

Enjoy an unprecedentedly comfortable listening experience with long-lasting Power life—no need to worry about frequent charging.

SETUP

1. Initial Charging

Before first use, fully charge your headphones. Connect the magnetic charging cable to the charging port on the headphones and plug the USB end into a power source (e.g., computer USB port, USB wall adapter). The LED indicator will show charging status.

2. Wearing the Headphones

Place the headphones over your ears so that the transducers rest on your cheekbones, just in front of your ears.

Adjust the headband for a comfortable and secure fit. The open-ear design ensures comfort and situational awareness.

3. Bluetooth Pairing

1. **Power On:** Press and hold the Power button for 3-5 seconds until the LED indicator flashes blue and red, indicating pairing mode.
2. **Activate Bluetooth:** On your smartphone or device, go to Bluetooth settings and turn on Bluetooth.
3. **Select Device:** Look for "X16" in the list of available devices and select it to pair.
4. **Confirmation:** Once paired, the LED indicator will turn solid blue, and you will hear a voice prompt confirming the connection.

Internal Storage Mode (32GB)

The X16 headphones feature 32GB of internal storage, allowing you to store music directly on the device. This is particularly useful for activities like swimming where Bluetooth connectivity may be limited or a phone is not accessible.

1. **Connect to Computer:** Use the magnetic charging cable to connect the headphones to your computer.
2. **Transfer Files:** The headphones will appear as a removable drive. Drag and drop your audio files (e.g., MP3) into the drive.
3. **Switch Modes:** Once disconnected, the headphones will automatically switch to internal storage playback mode if no Bluetooth device is connected.

MAINTENANCE

Cleaning

Wipe the headphones with a soft, damp cloth after each use, especially after workouts or swimming, to remove sweat, chlorine, or salt water. Do not use abrasive cleaners or harsh chemicals.

Waterproofing (IPX8)

The X16 headphones are rated IPX8, meaning they can be submerged in water up to 2 meters for up to 30 minutes. While designed for swimming, ensure the charging port is completely dry before charging to prevent damage. For optimal performance in water, use the internal storage mode as Bluetooth signals do not transmit well through water.

What's in the Box

Packaging Box
Bone Conduction Headphones
Earplugs
User Manual
Silicone Cord
Charging Cable

Storage

Store the headphones in the provided carrying pouch in a cool, dry place away from direct sunlight and extreme temperatures. Avoid placing heavy objects on top of the headphones.

TROUBLESHOOTING

No Power

- Ensure the headphones are fully charged.
- Check the charging cable and adapter for damage.

Cannot Pair via Bluetooth

- Make sure the headphones are in pairing mode (LED flashing blue and red).
- Ensure Bluetooth is enabled on your device.
- Move the headphones closer to your device.
- Forget "X16" from your device's Bluetooth list and try pairing again.
- Restart both the headphones and your device.

Low Sound Quality or No Sound

- Adjust the volume on both the headphones and your connected device.
- Ensure the headphones are correctly positioned on your cheekbones.
- Check if the headphones are connected to the correct device.
- If using internal storage, ensure audio files are not corrupted.

Bluetooth Disconnects Frequently

- Ensure there are no obstacles between the headphones and your device.
- Move closer to your device (Bluetooth range is typically up to 10 meters).
- Avoid environments with strong electromagnetic interference.
