5. MAINTENANCE

Regular maintenance helps ensure the longevity and optimal performance of your adjustable bed.

- **Cleaning the Fabric:** For the upholstered headboard and side rails, use a soft, damp cloth to wipe away dust and light stains. For deeper cleaning, consult a professional upholstery cleaner or use a fabric-specific cleaning solution, testing on an inconspicuous area first.
- **Frame and Mechanism:** Periodically check all bolts and screws to ensure they are tight. Do not overtighten. Keep the adjustable mechanism free from dust and debris.
- **Power Cord:** Inspect the power cord regularly for any signs of damage, fraying, or loose connections. If damage is found, discontinue use and contact customer support.
- **Motor:** The motor is designed for quiet and durable operation and generally requires no user maintenance. Avoid exposing the motor to liquids.

6. TROUBLESHOOTING

If you encounter any issues with your adjustable bed, refer to the following common troubleshooting steps:

Motor Not Responding / Bed Not Adjusting

- **Check Power Connection:** Ensure the power cord is securely plugged into a working electrical outlet and into the bed's control box.
- **Check Remote Connection:** Verify that the wired remote control is securely connected to the bed's control box.
- **Reset Power:** Unplug the bed from the power outlet for 30 seconds, then plug it back in. This can reset the control system.
- **Obstructions:** Check for any objects or bedding that might be obstructing the movement of the adjustable base. Remove any obstructions.

Unusual Noises During Operation

- **Check for Loose Connections:** Ensure all bolts and screws are tight. Loose hardware can cause rattling or squeaking.
- **Lubrication:** Moving parts of the frame may occasionally benefit from a small amount of silicone-based lubricant if persistent squeaking occurs. Avoid oil-based lubricants.

- **Floor Surface:** Ensure the bed is on a level surface. Uneven floors can cause stress on the frame and lead to noise.

If these steps do not resolve the issue, please contact FLEXISPOT customer support for further assistance.
