Troubleshooting

LED Lights Not Working:

- **Check Power Connection:** Ensure the LED light strip is properly plugged into a working power source.
- **Remote Control Battery:** Replace the battery in the remote control if the lights are unresponsive.
- **App Connection:** If using the smartphone app, ensure Bluetooth is enabled and the app is correctly paired with the LED system.

Charging Station Not Functioning:

- **Verify Power:** Confirm the bed frame's main power cord is securely plugged into a live wall outlet.
- **Device Compatibility:** Ensure your devices are compatible with the USB and USB-C ports, and that AC devices are within the station's power limits.
- **Cable Integrity:** Try different charging cables to rule out faulty cables.

Bed Frame Noise:

- **Tighten Fasteners:** Loose bolts or screws are a common cause of squeaking. Re-tighten all assembly hardware.
- **Slat Placement:** Ensure all wooden slats are correctly seated and evenly spaced. The noiseless design prevents friction between metal and slats.
- **Level Surface:** Make sure the bed frame is on a level surface. Uneven floors can cause stress on the frame and lead to noise.

Storage Drawers Not Sliding Smoothly:

- **Check Wheels:** Inspect the drawer wheels for any obstructions or damage.
- **Drawer Tracks:** Ensure the drawer tracks are clear of debris and properly aligned.
- **Overloading:** Avoid overloading the drawers, as excessive weight can hinder smooth operation.
