# IMUSA LP-1213 Ultrasonic Humidifier User Manual

Model: LP-1213 | Brand: IMUSA

## 1. INTRODUCTION

Thank you for purchasing the IMUSA LP-1213 Ultrasonic Humidifier. This device is designed to improve air quality and comfort by adding moisture to your environment. It features a large 2.5L capacity, adjustable mist levels, quiet operation, and convenient remote control. Please read this manual thoroughly before use to ensure proper operation and maintenance.

This humidifier is suitable for various settings, including bedrooms, living rooms, offices, and other indoor spaces, providing relief from dryness and enhancing overall well-being.

## 2. SAFETY PRECAUTIONS

- Always place the humidifier on a firm, flat, water-resistant surface away from direct sunlight and heat sources.
- Do not immerse the base unit in water or other liquids.
- Ensure the power cord is not damaged and is plugged into a suitable electrical outlet.
- Keep out of reach of children and pets.
- Do not add water above the maximum fill line.
- Unplug the humidifier before filling, cleaning, or moving it.
- The humidifier features an automatic shut-off function when water levels are low to prevent dry burning.
- This product is PSE certified, meeting Japanese electrical safety standards.
- Use only water-soluble aroma oils as directed in the aromatherapy section.

### 3. PACKAGE CONTENTS

Verify that all items are present in the package:

- IMUSA LP-1213 Humidifier Unit
- Remote Control

## 5. SETUP

### 5.1 Placement

Place the humidifier on a flat, stable surface at least 15 cm (6 inches) away from walls and furniture. Ensure it is not placed on carpets or absorbent surfaces that could block the air inlet.

## 5.2 Filling the Water Tank

The LP-1213 humidifier offers two convenient ways to fill the water tank:

1. **Top-Fill:** Pour water directly into the top opening without removing the lid.
2. **Tank Removal:** Remove the top lid, lift the water tank from the base, and fill it directly from a faucet.

Always use clean, cool tap water. Do not add hot water or water with additives other than water-soluble aroma oils.

Image: Water filling methods.

## 5.3 Adding Aroma Oil

To use the aromatherapy function, add a few drops of water-soluble aroma oil into the designated aroma oil compartment located on the top of the humidifier. Do not add oil directly into the water tank.

## 6. OPERATION

The humidifier can be operated using the touch panel on the front or the included remote control.

### 6.1 Touch Panel Controls

- **Power/Mist Button:** Short press to turn on/off and cycle through mist levels (Low, Medium,

High). Long press to power off.

- **Timer/Sleep Button:** Short press to set the off-timer (2H, 4H, 8H). Long press to activate Sleep Mode.
- **Light Button:** Short press to turn on the RGB light and cycle through colors.
- **Brightness Button:** Short press to adjust the brightness of the LED light.

Image: Control panel functions.

## 6.2 Remote Control

The remote control allows you to operate all functions from a distance. Point the remote control towards the humidifier's display panel.

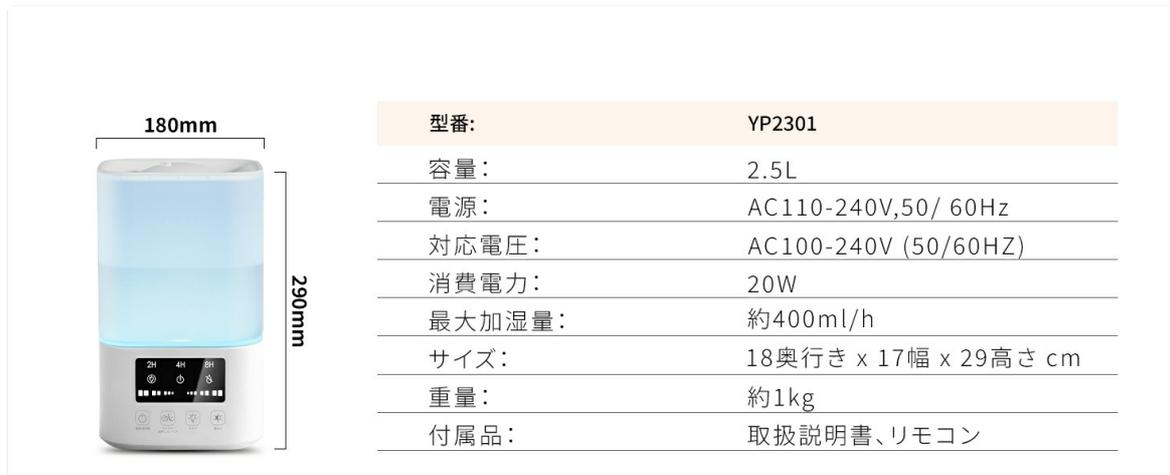

Image: Remote control operation.

## 6.3 Sleep Mode

Long press the Timer/Sleep button to activate Sleep Mode. In this mode, the display lights will dim, and the humidifier will operate at its lowest mist setting for quiet operation.

## 6.4 LED Light Function

Press the Light button to turn on the 7-color LED light. Each press will cycle through different colors. A long press may activate a gradual color-changing mode. Press again to turn off the light.

## 7. MAINTENANCE

Regular cleaning is essential to maintain optimal performance and hygiene.

### 7.1 Daily Maintenance

- Empty and rinse the water tank daily.
- Wipe the inside of the tank with a clean cloth.

### 7.2 Weekly Cleaning

- Unplug the humidifier and disassemble the water tank from the base.
- The water tank is fully washable. Clean the inside of the tank and the base unit with a soft brush and mild detergent.
- Rinse thoroughly to remove any detergent residue.
- Wipe all surfaces dry before reassembling.
- Do not use abrasive cleaners or harsh chemicals.

## 8. TROUBLESHOOTING

| Problem                            | Possible Cause  | Solution   |
|------------------------------------|---|--|
| No mist is being produced.         | Water tank is empty. Unit is not powered on. Mist outlet is blocked. Transducer is dirty. | Refill water tank. Ensure unit is plugged in and powered on. Check for obstructions and clean the mist outlet. Clean the transducer with a soft brush. |
| Weak mist output.                  | Low water level. Mist level set too low. Mineral buildup on transducer.                   | Refill water tank. Increase mist level setting. Clean the transducer.  |
| Unusual odor.                      | Stagnant water. Dirty water tank.   | Empty and clean the water tank thoroughly. Use fresh water daily.  |
| Water leakage.                     | Water tank not properly seated. Damaged tank or seal.                                     | Ensure the water tank is correctly placed on the base. Check for cracks or damage; contact support if found.   |
| Humidifier turns off unexpectedly. | Water tank is empty (auto shut-off). Timer function activated.                            | Refill water tank. Check timer settings and adjust if necessary.   |

If the problem persists after attempting these solutions, please contact customer support.
