## TROUBLESHOOTING

Problem	Possible Cause	Solution
Cat tree feels wobbly or unstable.	Loose connections; uneven floor; anti-tip kit not installed.	Ensure all screws are tightened. Place on a level surface. Install the anti-tip wall strap securely.
Cats are not using the scratching posts.	Preference for other surfaces; unfamiliarity.	Gently guide your cat's paws to the sisal posts. Use catnip spray on the posts to attract them.
Dangling toys are broken or detached.	Vigorous play; wear and tear.	Reattach if possible. If broken, remove to prevent choking hazards and replace with new cat-safe toys.
