7. Troubleshooting

Problem	Possible Cause	Solution
Cat tree feels wobbly.	Screws are loose; not secured to wall; uneven floor.	Tighten all screws. Ensure anti-tip kit is properly installed. Place on a flat, level surface.
Cat is not using the tree.	Unfamiliarity; location not appealing; preference for other surfaces.	Place near a window or in a favorite spot. Use catnip or treats to entice. Gently place cat on tree.
Scratching posts are worn out quickly.	Heavy use; multiple cats.	This is normal wear and tear. Consider replacing worn sisal posts if available from the manufacturer.
