SETUP AND ASSEMBLY

Assembly of the Shintenchi Sectional Couch is designed to be straightforward and requires no additional tools. It is recommended to have two people for quicker assembly.

1. **Unpack Components:** Carefully remove all parts from their packaging. Lay them out on a clean, soft surface to prevent scratches.
2. **Cushion Decompression:** The cushions are vacuum-sealed. Allow them approximately 72 hours to fully

decompress and regain their intended shape and firmness.

3. **Identify Modules:** Refer to the assembly instructions provided in the box to identify Module A, Module B, and Module C. Match the parts to the pictures in the manual, as parts may not be explicitly labeled.
4. **Connect Sofa Sections:** Align the connecting brackets on the sides of Module A and Module B. Slide them together until they lock securely.
5. **Attach Legs:** Screw the wooden legs into the designated holes on the bottom of each sofa section and the ottoman. Ensure they are tightened firmly.
6. **Position Ottoman:** Place the movable ottoman (Module C) next to either sofa section to create an L-shaped configuration or use it independently.
7. **Insert Cushions:** Place the seat and back cushions onto the sofa frame. The seat cushions and back cushions are removable and have zippers. Secure them using the Velcro strips at the bottom of the cushions to prevent slipping.
8. **Collapsible Center Backrest (if applicable):** If your model includes a collapsible center backrest, ensure it is properly seated.

Tip: The retractable table feature within the collapsible backrest can be tricky to figure out. Refer closely to the manual's diagrams for proper deployment.

OPERATING INSTRUCTIONS

1. Storage Compartments

Each seat of the sectional couch and the ottoman features a hidden storage space. To access:

- Gently lift the seat cushion or ottoman lid.
- Place or retrieve items such as blankets, pillows, or other household goods.
- Ensure the lid is securely closed before sitting.

Amazing Storage

2. Collapsible Center Backrest

Certain configurations of the Shintenchi Sectional Couch include a collapsible center backrest that converts into a tray.

- To deploy the tray: Gently pull the center backrest forward and down. It will fold flat to reveal a surface suitable for drinks or small items.
- To return to backrest position: Lift the tray until it clicks back into its upright position.

3. Modular Configuration

The modular design allows for flexible arrangement of your sofa. The ottoman can be moved to either side to create a left-hand or right-hand facing chaise, or used as a standalone piece.

MAINTENANCE

1. Fabric Care

- The sofa fabric is 100% polyester, washable, and stretchable.
- For spills, immediately dab the affected area with a clean, damp cloth. Avoid rubbing, as this can spread the stain and damage the fabric fibers.
- For tougher stains, use a mild soap solution (e.g., a small amount of dish soap mixed with water) on a damp cloth and gently dab. Rinse by dabbing with a clean, damp cloth.
- The seat and back cushions have zippers, allowing their covers to be removed for cleaning. Follow care instructions on the label if available.
- Regularly vacuum the sofa using an upholstery attachment to remove dust and debris.

2. Cushion Care

- Periodically fluff and rotate cushions to maintain their shape and extend their lifespan.
- Ensure Velcro strips on the bottom of cushions are properly engaged to prevent shifting.

3. Frame and Legs

- Wipe the wooden legs with a dry or slightly damp cloth. Avoid harsh chemicals.
- Periodically check that all legs and connecting hardware are tight.

TROUBLESHOOTING

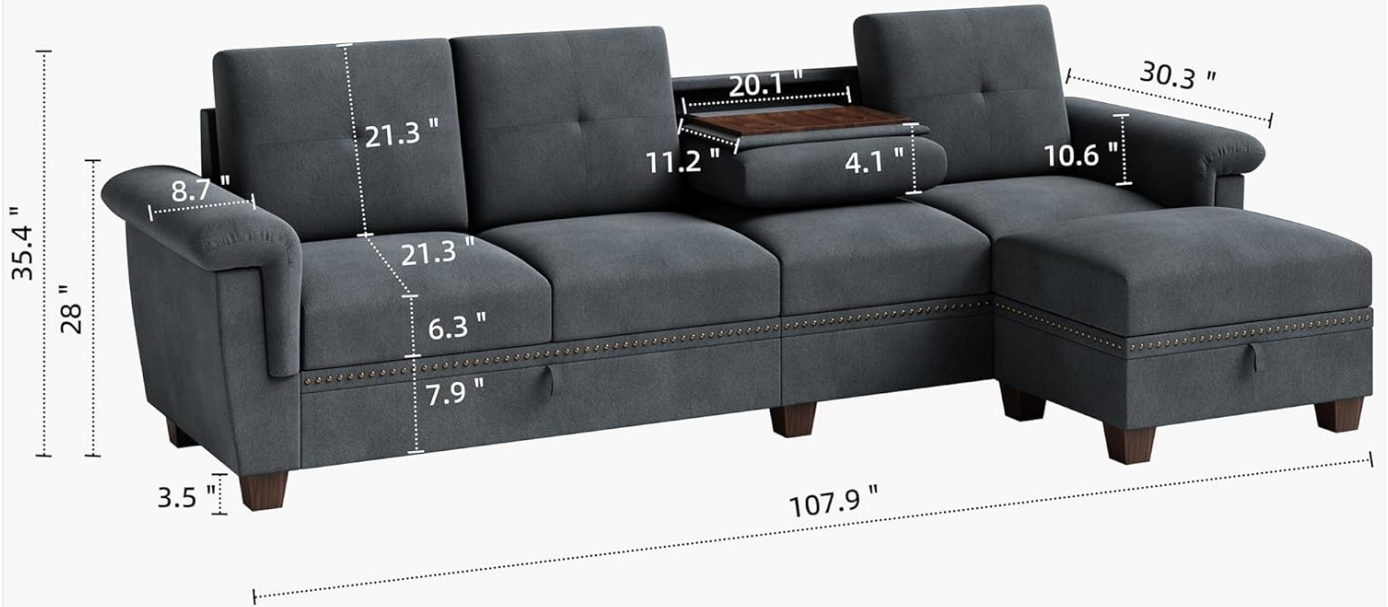

Issue	Possible Cause	Solution
Cushions appear wrinkly or not fully expanded.	Vacuum-sealed cushions require time to decompress.	Allow up to 72 hours for cushions to fully expand after unpacking. Fluff and gently knead them to aid decompression.
Cushions shift out of place when seated.	Velcro strips are not engaged or are worn.	Ensure the Velcro strips on the bottom of the cushions are firmly attached to the corresponding fabric on the sofa frame. If Velcro is worn, consider replacing it.
Backrest feels loose or unstable.	Connecting hardware may be loose or not fully engaged. Excessive force on the backrest.	Check all connecting points between sofa modules and ensure they are securely fastened. Avoid pushing back forcefully on the backrest.
Sofa slides easily on hard floors.	Felt pads on legs are not suitable for tile/hardwood, or legs are plastic.	Replace felt pads with rubber anti-slip pads or furniture grippers designed for hard surfaces.
Missing one or more shipping boxes.	Multi-box shipments may arrive separately.	Check tracking information for all boxes. If a box is confirmed lost, contact customer support with your order and tracking details.
