5.2 Operating the Pop-up Trundle Bed

The daybed includes a pop-up trundle bed that can be used as a separate twin bed or raised to the same height as the main daybed to create a larger sleeping surface.

- **To Extend the Trundle:** Gently pull the trundle frame out from underneath the main daybed. The trundle is equipped with lockable wheels for easy movement.
- **To Raise the Trundle:** Locate the pop-up mechanism on the trundle frame. Lift the frame upwards until it locks into the raised position. Ensure both sides are securely locked.
- **To Lower the Trundle:** Release the locking mechanism (refer to the specific instructions in your assembly guide for details on how to release the lock). Gently push the trundle frame downwards until it is flat.
- **To Retract the Trundle:** Once lowered, push the trundle frame back underneath the main daybed. Lock the wheels if desired to prevent accidental movement.

6. MAINTENANCE

- **Cleaning the Metal Frame:** Wipe the metal frame with a soft, damp cloth. Avoid abrasive cleaners or harsh chemicals that may damage the powder-coated finish.
- **Cleaning the Upholstered Headboard:** The headboard features a luxury leather covering. For general cleaning, wipe with a soft, dry cloth. For spills, use a slightly damp cloth with mild soap and wipe dry immediately. Avoid excessive moisture.
- **Hardware Check:** Periodically inspect all bolts and screws to ensure they remain tight. Re-tighten as needed to maintain stability and prevent squeaking.
- **Trundle Wheels:** Keep the trundle wheels free of debris to ensure smooth operation.

7. TROUBLESHOOTING

If you encounter any issues with your Homeeasy Daybed, refer to the following common troubleshooting tips:

- **Squeaking Noises:** Squeaking often indicates loose connections. Re-tighten all assembly hardware, especially bolts connecting the frame components. Ensure the bed is on a level surface.
- **Trundle Not Moving Smoothly:** Check the trundle wheels for any obstructions or debris. Ensure the wheels are not locked if you intend to move it. Lubricate wheel axles if necessary.
- **Trundle Not Popping Up/Down:** Verify that the pop-up mechanism is free of obstructions. Ensure you are correctly engaging or disengaging the locking levers as per the assembly instructions.
- **Charging Station Not Working:** Check if the power cord is securely plugged into a functional wall outlet. Test the outlet with another device. Ensure devices are properly connected to the outlets/USB ports.
- **Instability:** Ensure all parts are correctly assembled and all hardware is fully tightened. Verify that the bed is placed on a flat, even floor.
