Setup and Installation

Professional installation is recommended. Ensure the vehicle's power is disconnected before beginning installation.

Wiring Diagram

Refer to the following diagram for proper wiring connections. Incorrect wiring can damage the unit or vehicle.

Image: Detailed wiring diagram for the backup camera video input and general power/speaker connections for the car stereo.

Backup Camera Connection

The backup camera requires connection to the vehicle's reverse light for automatic activation. Connect the camera's power wire to the positive lead of the reverse light and the ground wire to a suitable chassis ground.

Your browser does not support the video tag.

Operating Instructions

CarPlay & Android Auto

1. Connect your smartphone to the stereo using a USB cable via the dedicated USB port.

2. The stereo will automatically detect and launch CarPlay (for iPhone) or Android Auto (for Android phones).
3. Follow on-screen prompts to grant necessary permissions on your phone.
4. Use the touchscreen or voice commands (Siri/Google Assistant) for navigation, music, calls, and messages.

Bluetooth Pairing

1. On the stereo, navigate to the Bluetooth menu.
2. On your smartphone, enable Bluetooth and search for available devices.
3. Select "CAR-BT" (or similar name displayed on the stereo) from your phone's Bluetooth list.
4. Confirm the pairing code (usually 0000) on both devices if prompted.
5. Once connected, you can make hands-free calls and stream audio.

FM Radio

- Select the "FM" or "Radio" icon on the main menu.
- Use the on-screen controls to scan for stations, manually tune, or select preset stations.

EQ Settings

- Access the "EQ" or "Sound Setup" option from the main menu or settings.
- Adjust frequency bands, bass, treble, and select from preset equalization modes (Jazz, Classic, Rock, Pop, Flat, User).

Maintenance

- **Cleaning:** Use a soft, dry cloth to clean the touchscreen and unit. Avoid abrasive cleaners or solvents.
- **Software Updates:** Periodically check the manufacturer's website for any available software updates to ensure optimal performance.
- **Cable Connections:** Ensure all cables are securely connected to prevent intermittent issues.

Troubleshooting

Problem	Possible Cause	Solution
No power	Incorrect wiring, blown fuse	Check power connections, inspect vehicle fuses.
No sound	Speaker wires disconnected, volume too low, incorrect audio source	Verify speaker connections, increase volume, select correct audio input.
CarPlay/Android Auto not connecting	Faulty USB cable, phone permissions not granted, incompatible phone OS	Try a different USB cable, check phone settings for permissions, ensure phone OS is up-to-date.

Problem	Possible Cause	Solution
Backup camera not displaying	Incorrect wiring to reverse light, camera cable loose	Check camera power and video signal connections, ensure reverse gear is engaged.
