4. INSTALLATION GUIDE

This section provides a general overview of the installation process. For detailed, step-by-step instructions, please refer to the dedicated User Guide included in your package.

4.1. Compatibility Verification

Before installation, ensure your door meets the following requirements:

- **Door Thickness:** Suitable for doors with a thickness of 5 to 8 cm.
- **Lock Cylinder Dimensions:** Refer to the diagram below for specific measurements.

Figure 4: Compatibility verification for door and lock dimensions.

4.2. Handle Reversibility

The lock handle is reversible to accommodate both left and right-opening doors. To change the handle direction, locate the reversing screw on the back of the lock panel. Use the provided tool to adjust the handle's orientation as needed. Ensure the arrow on the reversing screw points to the correct direction for your door.

4.3. Installation Steps Overview

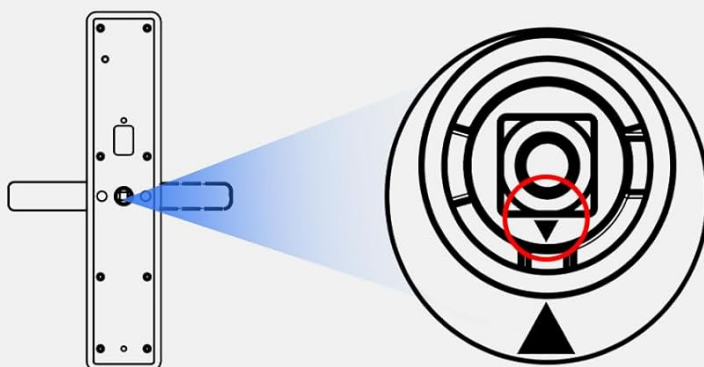

1. **Prepare the Door:** Ensure the door is properly drilled according to the template provided in the detailed user guide.
2. **Install the Mortise Lock:** Insert the mortise lock into the door edge and secure it with screws. Ensure the security pillar is positioned correctly (usually at the bottom).
3. **Install the Exterior Panel:** Route the connecting cables through the door. Align the exterior panel with the

mortise lock and secure it.

4. **Connect Cables:** Connect the cables from the exterior panel to the interior panel.
5. **Install the Interior Panel:** Secure the interior panel to the door, ensuring all cables are tucked away and not pinched.
6. **Install Batteries:** Insert 4 AAA batteries into the battery compartment of the interior panel.
7. **Test the Lock:** Verify that all functions (handle movement, locking/unlocking mechanisms) operate smoothly before closing the battery cover.

5. OPERATING INSTRUCTIONS

The LOKOOY Q6 WIFI Smart Lock offers six convenient methods for unlocking your door:

5.1. Unlocking Methods

- **Fingerprint:** Utilize the high-sensitivity semiconductor fingerprint sensor for quick access (recognition time less

than 0.5 seconds). The lock supports up to 200 fingerprints.

- **IC Card:** Tap a registered IC card on the lock's sensor to unlock. The lock supports over 300 IC cards.
- **Password:** Enter a pre-set password on the touchscreen keypad. The lock supports over 200 user codes, including permanent, disposable, periodic, and temporary passwords.
- **Bluetooth App:** Use the TTLOCK app on your smartphone to unlock the door via Bluetooth when you are within range.
- **WIFI App:** Connect the lock directly to your 2.4GHz WIFI network. This allows for remote unlocking and management from anywhere with an internet connection, without needing a separate gateway.
- **Mechanical Key:** For emergency situations or preference, use the physical mechanical keys provided.

5.2. TTLOCK App Features

The TTLOCK app provides comprehensive control and management of your smart lock:

- **Keyless Access:** Unlock your door with a tap on your smartphone.
- **User Management:** Easily add, modify, or delete user fingerprints, IC cards, and passwords.

- **Real-time Notifications:** Receive instant alerts on your phone when the door is unlocked or if an alarm is triggered.
- **Access History:** View a detailed log of who entered and when.
- **Generate Passwords:** Create various types of passwords (permanent, temporary, one-time, recurring) for different users.
- **Voice Control:** Compatible with smart assistants like Alexa for voice-activated unlocking (e.g., "Hey Alexa, unlock the door.").

6. ALARM FUNCTIONS

The LOKOOY Q6 Smart Lock is equipped with several alarm features to enhance security:

- **Anti-Force Alarm:** If the lock body is tampered with or forced abnormally, an alarm will sound to deter intruders and protect your home.
- **Low Battery Alarm:** When the battery level drops below 20%, the lock will provide a voice reminder to replace the batteries.
- **Error Alarm:** After 5 consecutive incorrect password entries, the smart lock will automatically lock for 120 seconds. During this lockout period, the lock can still be unlocked via the TTLOCK app.

7. MAINTENANCE

7.1. Battery Replacement

The lock requires 4 AAA batteries for power. Based on typical daily usage, batteries may need replacement approximately every 8 months. In case of complete power depletion, the lock features a USB interface for emergency charging using a portable power bank.

7.2. Care and Cleaning

To maintain the lock's performance and appearance, clean it regularly with a soft, dry cloth. Avoid using abrasive cleaners or solvents that could damage the finish or electronic components. The lock is designed with IP65 water and dust resistance, as well as resistance to high/low temperatures and shocks, making it suitable for both indoor and outdoor use.

8. TROUBLESHOOTING

For detailed troubleshooting steps, please consult the comprehensive User Guide provided with your product. Below are some common issues and general advice:

- **Lock Not Responding:** Check battery levels. If batteries are low, replace them or use emergency USB power.
- **Fingerprint/Card/Password Not Recognized:** Ensure your fingerprint, IC card, or password is correctly registered in the TTLOCK app. Clean the fingerprint sensor if necessary.
- **Incorrect Password Lockout:** If the lock enters a 120-second lockout after multiple incorrect password attempts, wait for the timer to expire or unlock using the TTLOCK app.
- **Connectivity Issues:** Ensure your WIFI network is 2.4GHz and stable. Re-pair the lock with the TTLOCK app if connection problems persist.
