6. Troubleshooting

This section addresses common issues you might encounter with your bed frame.

6.1. LED Lights Not Working

- **Check Power:** Ensure the bed frame is plugged into a live electrical outlet.
- **Controller/App:** Verify that the LED lights are turned on via the app or inline controller. Check battery if using a remote.
- **Connections:** Inspect all LED strip connections to ensure they are securely plugged in.

6.2. Charging Station Not Functioning

- **Power Supply:** Confirm the bed frame's main power cord is plugged into a working wall outlet.
- **Device Compatibility:** Ensure your device is compatible with the charging station's output (125V/12A for AC, 5V/2A for USB).
- **Cable Integrity:** Try a different charging cable to rule out a faulty cable.

6.3. Bed Frame Squeaks or Is Unstable

- **Tighten Hardware:** Re-check and tighten all bolts and screws throughout the frame. Loose connections are a common cause of noise.
- **Level Surface:** Ensure the bed frame is on a flat, level surface. Uneven flooring can cause stress on the frame.
- **Mattress Placement:** Verify the mattress is correctly seated on the platform and not causing uneven pressure.

6.4. Drawers Not Sliding Smoothly

- **Obstructions:** Check for any items or debris obstructing the drawer tracks.
- **Alignment:** Ensure the drawers are correctly aligned within their designated slots.
- **Overloading:** Avoid overloading the drawers, as this can cause them to stick or become difficult to move.
