2.3 Charging the Controller

To charge the controller, connect the included USB Type-C cable to the charging port on the controller and the other end to a USB power source (e.g., console, PC, or USB wall adapter). The indicator light will show charging status and turn off when fully charged.

3. OPERATING INSTRUCTIONS

3.1 Power On/Off

- **Power On:** Press and hold the Home button for 3 seconds.
- **Power Off:** Press and hold the Home button for 5-8 seconds. The controller will automatically power off after 5 minutes of inactivity.

3.2 Turbo Function

The Turbo function allows for rapid, repeated input of a button press, which can be beneficial in certain games.

1. Press and hold the Turbo button.

2. While holding the Turbo button, press the desired action button (e.g., A, B, X, Y, LB, RB, LT, RT). The Turbo function is now activated for that button.

3. To deactivate Turbo for a specific button, repeat the process: press and hold the Turbo button, then press the action button again.

4. MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the controller. Avoid using harsh chemicals or abrasive materials.

- **Storage:** Store the controller in a cool, dry place away from direct sunlight and extreme temperatures.

- **Battery Care:** To prolong battery life, avoid fully discharging the controller frequently. Charge the controller regularly, even if not in active use.

5. TROUBLESHOOTING

5.1 Connection Issues

- **Controller not connecting:** Ensure the 2.4GHz USB adapter is securely plugged into the console/PC. Make sure the controller is charged. Try re-pairing by powering off and on the controller.

- **Intermittent connection:** Ensure there are no strong wireless interference sources nearby. Try moving closer to the console/PC.

5.2 Controller Firmware Upgrade

If you experience persistent connection issues, particularly with Xbox consoles, a firmware upgrade may be required. The upgrade process is performed on a Windows PC.

If you can't connect your Xbox, upgrade your controller
