JJC LC-GR4

JJC Aluminum Lens Cap for Ricoh GR IV Digital Camera

Model: LC-GR4 | Brand: JJC

1. INTRODUCTION AND OVERVIEW

The JJC Aluminum Lens Cap (Model LC-GR4) is specifically designed to provide robust protection for your Ricoh GR IV, GR IV HDF, and GR IV Monochrome digital camera lenses. Crafted from durable aluminum alloy with a soft EVA interior, this lens cap safeguards your camera lens from scratches, moisture, and dust when not in use. Its precise fit ensures reliable protection without compromising the camera's sleek design.

2. SETUP AND INSTALLATION

Follow these steps to properly install the JJC Aluminum Lens Cap on your Ricoh GR IV camera:

1. **Initial Application:** For the first use, gently place the lens cap onto the camera lens. Allow it to remain on the lens for approximately 12 hours to ensure the soft EVA interior conforms perfectly and creates a secure fit.
2. **Attachment:** Align the lens cap with the front of your camera lens. Gently press it onto the lens until it sits snugly. There is no need to screw or twist the cap; it attaches directly via friction fit.
3. **Removal:** To remove, simply pull the cap directly off the lens. Avoid twisting.

Easy to Attach

Secure Fit for Your Lens

Warm Tips:

1. Take the lens cap off directly, do not need to rotate.

2. Please put the lens cap on your lens and wait for 12H in first use.

3. OPERATING INSTRUCTIONS

The JJC Aluminum Lens Cap is designed for straightforward use to protect your camera lens:

- **Lens Protection:** Always keep the lens cap on your camera lens when the camera is not in use. This prevents dust, moisture, and accidental scratches from affecting the lens surface.
- **Filter Compatibility:** This lens cap is designed to be compatible with certain JJC filters (sold separately). If you use a compatible filter, the lens cap can still be attached over it, providing an additional layer of protection.

Compatible with the JJC F-WMCUVG3 Filter (Sold Separately)

Video Guide: Installation and Usage

Video 1: This video demonstrates the correct method for attaching and removing the JJC Aluminum Lens Cap on a Ricoh GR IV camera, showcasing its secure fit and ease of use.

4. MAINTENANCE

To ensure the longevity and effectiveness of your JJC Aluminum Lens Cap, follow these simple maintenance guidelines:

- **Cleaning the Exterior:** Wipe the aluminum exterior with a soft, dry cloth to remove fingerprints or smudges. For stubborn dirt, a slightly damp cloth can be used, followed by immediate drying.
- **Cleaning the Interior:** Periodically check the soft EVA interior for dust or debris. Use a soft brush or a lint-free cloth to gently clean the interior surface. Avoid using abrasive materials or harsh chemicals, as these can damage the EVA lining.
- **Storage:** When not in use, store the lens cap in a clean, dry environment to prevent dust accumulation.

5. TROUBLESHOOTING

If you encounter any issues with your JJC Aluminum Lens Cap, consider the following:

- **Cap Does Not Fit Securely:** Ensure the lens cap is correctly aligned with the camera lens. If it feels loose, verify that you have the correct model (LC-GR4) for your Ricoh GR IV camera. The initial 12-hour period for the EVA lining to conform is crucial for a snug fit.
- **Camera Lens Error:** Always remove the lens cap before powering on your camera. If the camera is turned on with the cap still attached, the extending lens mechanism may encounter resistance, potentially causing a lens error or preventing the lens from fully extending.
- **Dust Accumulation:** While the cap is designed to be dustproof, fine dust can still accumulate over time. Refer to the Maintenance section for cleaning instructions.

6. SPECIFICATIONS

Feature	Detail
Model	LC-GR4
Compatibility	Ricoh GR IV, GR IV HDF, GR IV Monochrome Digital Camera
Material	Aluminum Alloy (Exterior), Soft EVA (Interior)
Dimensions	Diameter: 60.2mm, Thickness: 11.5mm
Weight	23.1g
Protection Features	Anti-Scratch, Anti-Fingerprint, Dustproof
