### Wi-Fi Connection

1. Open the VicoHome app and create an account or log in.
2. Follow the in-app instructions to add a new device. Select your camera model.
3. Ensure your smartphone is connected to a 2.4GHz Wi-Fi network. The camera does not support 5GHz Wi-Fi.
4. The app will guide you to connect the camera to your Wi-Fi network, often by displaying a QR code on your phone screen for the camera to scan.

### Mounting Options

The VSTARCAM CS24B can be placed on a tabletop or mounted to a wall or ceiling using the included mounting screws. Ensure the mounting location has a stable Wi-Fi signal.

## Dual Storage Options, Remote Playback

24/7 continuous recording and convenient remote playback allow you better to monitor your babies or pets.

## Storage Options

Footage can be securely stored using either cloud storage (subscription may be required) or a local SD card (up to 256GB, not included). The app allows for remote playback of recorded videos.

Image: The camera offers dual storage options: 7 days of free cloud storage and local Micro SD card storage (up to 256GB, card not included).

## Multi-Camera View & Family Sharing

The VicoHome app supports managing multiple cameras simultaneously, allowing you to monitor different areas of your home from a single interface. You can also securely share camera access with family members.

Image: The VicoHome app displays a multi-camera view across different devices (Android, iOS, Windows) and illustrates the family sharing feature with a QR code.

## 6. MAINTENANCE

- **Cleaning:** Gently wipe the camera lens and body with a soft, dry cloth. Avoid using harsh chemicals or abrasive materials.
- **Firmware Updates:** Regularly check the VicoHome app for available firmware updates to ensure optimal performance and security.
- **Battery Care:** For battery-powered cameras, ensure regular charging to maintain functionality. Avoid fully depleting the battery frequently.

## 7. TROUBLESHOOTING

- **Camera Offline:** Check Wi-Fi connection, ensure camera is powered on, and verify router settings (2.4GHz only).
- **Poor Image Quality:** Ensure the lens is clean, check Wi-Fi signal strength, and adjust camera placement if necessary.
- **Motion Alerts Not Received:** Verify motion detection settings in the app, check notification permissions on your phone, and ensure the camera is online.
- **Two-Way Audio Issues:** Check microphone and speaker volume settings in the app, and ensure there is no obstruction to the microphone/speaker.
- **Camera Not Connecting to App:** Try resetting the camera (refer to the manual for reset button location) and repeat the setup process.
