YETI Roadie 24

YETI Roadie 24 Hard Cooler Instruction Manual

PRODUCT OVERVIEW

The YETI Roadie 24 Hard Cooler is engineered for portability and durability, making it an ideal companion for various outdoor activities and travel. Its innovative tall and slim design allows it to accommodate standard wine bottles upright and fit conveniently behind car seats, optimizing space. Constructed with Rotomolded technology for exceptional toughness, it features a comfortable HeftyHauler Handle for easy transport and QuickLatch mechanisms for quick, one-handed access. This cooler is built to maintain internal temperatures, keeping contents cold for extended periods.

THE ROADIE® 24 HARD COOLER

YETI

KEY FEATURES

- **Optimized Design:** The Roadie 24 is built tall to accommodate wine bottles and slim enough to fit behind car seats, maximizing space efficiency.
- **HeftyHauler Handle:** Designed for comfortable and easy hauling, even when the cooler is fully loaded.
- **Rotomolded Construction:** Features a thinner, lighter-weight design for easier transport while maintaining exceptional durability.
- **QuickLatch System:** Flexible and simple latches allow for quick, one-handed access to the cooler's contents.
- **Capacity:** Holds 18 cans with a 2:1 ice-to-can ratio or 24 lbs of ice. Dimensions are 16.5" L x 14.5" W x 17.5" H.

ROTOMOLDED CONSTRUCTION

Evolved to be thinner and lighter-weight for easier transport, while still incredibly tough.

PERMAFROST INSULATION

Trusted in our Tundra coolers, capable of keeping ice for days.

WINE-FRIENDLY PACKING

Internal height is 13" - so a standard bottle of wine fits upright, and that goes for 2L soda bottles as well.

NEVERFAIL HINGE SYSTEM

Interlocking design with hinge pins prevents snapping or breaking.

QUICKLATCH

Flexible, simple, and built for quick, one-handed cooler access.

SETUP AND FIRST USE

Pre-Chilling for Optimal Performance

For maximum ice retention, it is recommended to pre-chill your Roadie 24 Cooler before loading it with contents. Place a sacrificial bag of ice or several YETI ICE packs inside the cooler for a few hours prior to use. This lowers the internal temperature of the cooler, ensuring your main ice supply lasts longer.

Efficient Loading

When loading your cooler, aim for an optimal 2:1 ice-to-contents ratio by volume. Fill any empty spaces with additional ice, YETI ICE, or even towels to minimize air pockets, which can reduce ice retention.

OPERATING INSTRUCTIONS

Securing the Lid

Always ensure both QuickLatch mechanisms are fully engaged to create a tight, airtight seal. This is crucial for preventing cold air from escaping and warm air from entering, thereby maximizing ice life.

Transporting the Cooler

Utilize the HeftyHauler Handle for comfortable and balanced transport. The handle is designed to support the cooler's weight, even when full. For vehicle transport, the slim design allows it to fit behind most driver's or passenger's seats.

Image: The YETI Roadie 24 Cooler positioned neatly behind a car seat, highlighting its space-saving design for travel.

Maximizing Ice Retention

To prolong ice retention, keep the cooler in a shaded area whenever possible. Minimize the frequency and duration of lid openings. The Roadie 24's internal height is specifically designed to allow standard wine bottles to stand upright, preventing spills and optimizing space.

HEFTYHAULER HANDLE

Designed for easy hauling and comfortable carrying.

Image: A visual representation of the YETI Roadie 24's capacity, indicating it can hold 18 cans or 24 pounds of ice.

MAINTENANCE AND CARE

Cleaning

After each use, empty all contents and clean the interior and exterior of your cooler with mild soap and warm water. Rinse thoroughly to remove all soap residue. For stubborn stains or odors, a solution of baking soda and water can be used.

Drying and Storage

Allow the cooler to air dry completely with the lid open to prevent the growth of mold, mildew, and unpleasant odors. Store the cooler in a cool, dry place, ideally with the lid slightly ajar for continued ventilation.

Gasket Inspection

Periodically inspect the freezer-quality gasket around the lid. Ensure it is clean and free of debris or damage. A clean, intact gasket is essential for maintaining the cooler's airtight seal and optimal performance.

TROUBLESHOOTING

Poor Ice Retention

- **Pre-chill:** Ensure the cooler was pre-chilled before loading.
- **Seal Check:** Verify that the QuickLatches are fully engaged and the lid gasket is clean and undamaged.
- **Lid Openings:** Minimize how often and how long the lid is opened.
- **Fill Volume:** Ensure the cooler is adequately filled with ice and contents, leaving minimal air space.

Unpleasant Odors or Stains

- **Deep Clean:** Clean the interior thoroughly with a mixture of baking soda and water.
- **Ventilation:** After cleaning, leave the lid open for an extended period in a well-ventilated area.
- **Baking Soda:** For persistent odors, place an open box of baking soda inside the closed cooler for a few days.

SPECIFICATIONS

Feature	Detail
Brand	YETI
Model	Roadie 24
Color	Agave Teal
Material	High Density Polyethylene (HDPE)
Capacity	24 Pounds (ice) / 18 Cans (2:1 ice-to-can ratio)
Special Feature	Portable
Included Components	Handle, QuickLatch
Item Package Dimensions (L x W x H)	18.6 x 17.3 x 14.7 inches
Package Weight	7.08 Kilograms
UPC	888830297988
Part Number	10022390000

WARRANTY AND SUPPORT

The YETI Roadie 24 Hard Cooler is built to last and comes with a manufacturer's warranty. For detailed information regarding warranty coverage, terms, and conditions, please visit the official YETI website. For any product-related inquiries, technical assistance, or support, please contact YETI customer service directly. Always retain your proof of purchase for any warranty claims.
