

Sennheiser HD 500 BAM

Sennheiser HD 500 BAM Plug-in Boom Arm Microphone

Instruction Manual

INTRODUCTION

The Sennheiser HD 500 BAM is a plug-in boom arm microphone designed to enhance your compatible Sennheiser headphones for gaming, streaming, podcasting, and communication. This manual provides essential information for the proper setup, operation, and maintenance of your HD 500 BAM microphone.

CONTENTS OF DELIVERY

Before proceeding with installation, please ensure all components are present in the package:

- Boom arm microphone with 1.50 m cable (3.5 mm jack plug)
- In-line volume and mute controls
- Y-adapter for computer use
- 3 replaceable foam popscreens
- User information (Quick Guide, Safety Guide)

**Upgrade your voice to
match the clarity you get
from our headphones**

Meet the HD 500 BAM, the compact add-on microphone that seamlessly transforms your audiophile Sennheiser headphones into an expert-level communication device.

SETUP

The HD 500 BAM is designed for easy installation with compatible Sennheiser headphones. Follow these steps to connect your microphone:

1. **Identify Compatible Headphones:** Ensure your headphones are from the Sennheiser HD 500 series or HD 620S. Compatible models include:
 - HD 505 Copper
 - HD 518
 - HD 550
 - HD 558
 - HD 559
 - HD 560S
 - HD 569
 - HD 579
 - HD 598 / HD 598 Cs / HD 598 SE
 - HD 599 / HD 599 SE
 - HD 620S

Note: This microphone is not compatible with other headphone brands.

2. **Remove Existing Cable:** Disconnect the existing audio cable from your compatible Sennheiser headphones. Most Sennheiser HD 500 series and HD 620S headphones feature a twist-to-lock mechanism for cable removal. Twist the cable connector counter-clockwise and pull to detach.
3. **Attach HD 500 BAM:** Insert the 3.5 mm jack of the HD 500 BAM boom arm microphone into the headphone's audio input port. Twist the connector clockwise to securely lock it into place. No tools, magnets, or adhesive patches are required.
4. **Connect to Device:** Connect the other end of the HD 500 BAM cable to your desired playback device. If connecting to a computer with separate microphone and headphone jacks, use the included Y-adapter. For devices with a single 3.5 mm jack (e.g., consoles, tablets, smartphones), connect directly. An additional adapter may be required for some smartphones or tablets (e.g., USB-C to 3.5 mm adapter for Apple iOS or Samsung devices).

HD 500 BAM
Add-on Boom Arm Microphone

A mic to unmute your Sennheiser headphones

Imagine you're enjoying music on your Sennheiser headphones. But then you want to join an online game. The HD 500 BAM lets you keep the lifelike soundstage and brilliant sound you love — while communicating with perfect clarity in-game and on calls.

Image: Step-by-step diagram for connecting the HD 500 BAM to headphones.

OPERATING THE MICROPHONE

In-line Controls

The HD 500 BAM features an in-line control unit on the cable for convenient access to volume and mute functions.

- **Volume Control:** Use the integrated dial to adjust the audio output volume to your headphones. Rotate the dial upwards to increase volume and downwards to decrease volume.
- **Mute Switch:** Slide the switch to mute or unmute the microphone. When the microphone is muted, the red indicator will be visible.

Cardioid

Pickup pattern for HD 500 BAM

A microphone with a cardioid pickup pattern captures sound primarily from the **front** while reducing noise from the sides and rear.

This pickup pattern allows the microphone to focus on your voice while reducing background noise, such as keyboard clicks, the fan whirring, or the cat meowing.

A microphone with a cardioid pattern is particularly suitable, when it's placed in a way always clearly pointing towards the user's mouth – like on a boom arm – and will result in great, low background noise voice clarity.

Omnidirectional

A microphone with an omnidirectional pickup pattern captures sound equally from **all directions**.

This pickup pattern means the microphone can pick up your voice, but will also capture background sounds, which can lead to reduced vocal clarity.

A microphone with an omnidirectional pattern is best, when the product design doesn't allow for a clearly mouth facing position, or when it is desired to pickup sounds from multiple people speaking.

Foam popscreens

Protection: The foam protects the microphone from dust, moisture, and other contaminants that can damage the microphone or affect its performance over time.

Pop filtering: The foam covers reduce plosive sounds, such as hard consonants, which can create distortion in the recording.

Noise reduction: The foam dampens breathing noises, providing clarity for the voice and making it ideal for calls and gaming chats.

Enhanced sound quality: By reducing unwanted sounds, the foam cover allows the intended audio to stand out more clearly. Using a foam pop screen is a simple yet effective way to enhance the audio quality of your recordings.

Microphone Positioning

For optimal voice clarity and to minimize background noise, position the boom arm microphone approximately 1-2 inches from your mouth. The flexible boom arm allows for precise adjustment.

Unmute your Sennheiser headphones

The best thing about the HD 500 BAM is that it unlocks so much value from your headphones.

By adding this mic to your Sennheiser headphones, you get a high-end gaming headset with zero latency and a soundstage to rival anything on the market. Or an excellent option for work calls. You'll look great wearing your stylish cans recording podcasts and videos, too. It's time to stop switching headsets and start enjoying brilliant audiophile sound with everything you do.

Device Compatibility

The HD 500 BAM is compatible with a wide range of devices via its 3.5 mm plug. An adapter may be required for certain devices.

Device Type	Compatibility Details
Windows PCs	Direct connection or via Y-adapter for separate mic/headphone ports.
Apple (iOS)	Requires USB-C to 3.5 mm Headphone Jack Adapter.
Samsung	Requires USB-C Headphone Jack Adapter (e.g., EE-UC10J).

Device Type	Compatibility Details
Microsoft Xbox Controllers	Xbox Elite Wireless Controller Series 2, Xbox One Elite Wireless Controller Series 1, Xbox One Wireless Controller (1697), Xbox One Wireless Controller (1708), Xbox Series X Wireless Controller, Xbox Wireless Controller.
Nintendo Switch	Switch, Switch Lite, Switch OLED (all models).
Sony PlayStation Controllers	DualSense® Controller V1-V5, DualSense Edge™, DualShock 4.

Don't settle for less

This is an attractive piece of kit with a stable yet flexible boom arm. It feels right at home on the HD 500 series and HD 620S with high-quality materials to match.

And crucially, you'll only have one cable, not two! Because who wants cable management on their head? Speaking of keeping things neat and tidy, you also get 2 spare foam mic pop screens.

MAINTENANCE

To ensure the longevity and optimal performance of your HD 500 BAM microphone, follow these maintenance guidelines:

- **Foam Pop Screens:** The included foam pop screens protect the microphone from dust, moisture, and other contaminants. They also help reduce plosive sounds and breathing noises, improving sound quality. Replace pop screens as needed using the two spare ones provided.
- **Cleaning:** Gently wipe the microphone and cable with a soft, dry cloth. Avoid using harsh chemicals or abrasive materials.
- **Storage:** When not in use, store the microphone in a clean, dry place away from extreme temperatures.

Key features

- ▶ High-quality 10 mm condenser microphone ensures everyone hears you clearly
- ▶ Directional (cardioid) mic pattern transmits more voice and less background noise
- ▶ In-line volume and mute controls
- ▶ 1.50 m cable gives you freedom to move
- ▶ Universal 3.5 mm jack plug lets you connect to nearly any device including gaming consoles, PCs, and tablets
- ▶ Includes Y-adaptor for PC connection and 2 extra foam mic pop screens

TROUBLESHOOTING

If you encounter issues with your HD 500 BAM microphone, refer to the following common solutions:

• No Sound from Microphone:

- Ensure the microphone is securely twisted and locked into the headphone jack.
- Check that the mute switch on the in-line control is in the 'unmuted' position.
- Verify that the cable is correctly connected to your device, using the Y-adaptor if necessary for PC.
- Check your device's audio settings to ensure the correct microphone input is selected and volume levels are adequate.

• Low Microphone Volume or Poor Clarity:

- Adjust the microphone's position closer to your mouth (1-2 inches).
- Ensure the foam pop screen is clean and properly installed.
- Check your device's input gain or microphone volume settings.
- Confirm that the microphone is connected to a compatible device and port.

• Audio Only in One Ear (Headphones):

- Ensure the HD 500 BAM cable is fully inserted and locked into the headphone jack.
- If using the Y-adaptor, ensure both green (headphone) and pink (microphone) plugs are fully inserted into the correct ports on your PC.
- Test the microphone with another compatible headphone or device to rule out a specific headphone issue.

If these steps do not resolve the issue, please refer to the Sennheiser support website or contact customer service for further assistance.

SPECIFICATIONS

Below are the technical specifications for the Sennheiser HD 500 BAM Plug-in Boom Arm Microphone:

Feature	Detail
---------	--------

Feature	Detail
Model Name	HD 500 BAM
Item Model Number	700456
UPC	810091273593
