Amazon Basics Clamber-Foldable 3-Step Ladder User Manual

Model: Clamber-102

IMPORTANT SAFETY INFORMATION

Read and understand all instructions before using this ladder. Failure to follow these instructions may result in serious injury or death.

- **Maximum Load Capacity:** Do not exceed the maximum load capacity of **120 kg (264 lbs)**. This includes the user and any tools or materials.
- **Inspect Before Use:** Always inspect the ladder for damage, loose fasteners, or missing parts before each use. Do not use a damaged ladder.
- **Stable Surface:** Ensure the ladder is placed on a firm, level, and non-slippery surface. Do not use on uneven ground or soft surfaces.
- **Proper Setup:** Fully open the ladder and ensure the safety-clutch lock is engaged before climbing.
- **Maintain Three Points of Contact:** Always maintain three points of contact (two hands and one foot, or two feet and one hand) when climbing or descending.
- **Face the Ladder:** Always face the ladder when climbing up or down.
- **Do Not Overreach:** Keep your body centered between the side rails. Do not overreach, as this can cause the ladder to tip.
- **Avoid Electrical Hazards:** Do not use the ladder near live electrical wires or equipment. Metal ladders conduct electricity.
- **One Person Only:** This ladder is designed for use by one person at a time.
- **Children and Pets:** Keep children and pets away from the ladder during use and storage.

PRODUCT OVERVIEW

The Amazon Basics Clamber-Foldable 3-Step Ladder is designed for household tasks, offering stability and ease of use. Constructed from industrial-grade steel, it features ribbed steps for grip, a knee guard for support, and non-marring PVC shoes to protect floors.

Key Features:

- **Foldable Design:** Easy to store and transport.
- **Safety-Clutch Lock:** Prevents accidental folding and wobbling.
- **Ribbed Steps:** Provides a secure footing.
- **Knee Guard:** Offers additional support and safety.
- **Non-Marring PVC Shoes:** Protects floor surfaces from scratches.
- **Durable Construction:** Made from ultra-sturdy, industrial-grade steel.

**Super Lightweight
& Foldable**

**Wobble Free
Climbing**

**Dual Protection
to Prevent Jiggling**

Image: Additional features such as lightweight and foldable design, wobble-free climbing, and dual protection against jiggling.

SETUP AND UNFOLDING

1. Place the folded ladder on a flat, stable surface.
2. Grasp the top handle and the top step.
3. Gently pull the front and rear sections of the ladder apart until they are fully extended.
4. Ensure the safety-clutch lock mechanism (located near the top step) is fully engaged and secured. You should hear a click or feel it lock into place.
5. Verify that all four non-marring PVC shoes are firmly on the ground and the ladder is stable before use.

OPERATING INSTRUCTIONS

Follow these guidelines for safe and effective use of your step ladder:

- **Climbing:** Always climb facing the ladder. Use the knee guard for added support.
- **Foot Placement:** Place your feet firmly on the center of the ribbed steps. The ribbed surface is designed for enhanced grip.
- **Safety Lock:** The unique safety-clutch lock prevents the ladder from jiggling or folding while in use. Ensure it is engaged before climbing.
- **Working Height:** Do not stand on the topmost step unless it is specifically designed as a platform. For this 3-step ladder, the top step is the highest safe standing level.
- **Reaching:** Avoid leaning too far to the sides. If you cannot reach an item comfortably, descend the ladder and reposition it closer to your work area.

FOLDING AND STORAGE

1. Ensure no one is on the ladder and all tools are removed.
2. Locate the "LIFT TO FOLD" mechanism on the top step.
3. Lift the mechanism to disengage the safety-clutch lock.
4. Gently push the front and rear sections of the ladder together until it is fully folded.
5. Store the folded ladder in a dry, secure location, away from children and pets. Its compact design allows for storage in narrow spaces.

MAINTENANCE

- **Cleaning:** Wipe the ladder clean with a damp cloth and mild detergent. Avoid abrasive cleaners or solvents that could damage the finish or PVC parts.
- **Inspection:** Regularly check all rivets, bolts, and hinges for tightness. Ensure the non-marring PVC shoes are intact and not worn. Inspect steps for cracks or damage.
- **Lubrication:** Periodically apply a small amount of lubricant to the hinge points to ensure smooth folding and unfolding.
- **Storage:** Store the ladder in a dry place to prevent rust, especially since it is made of steel.

TROUBLESHOOTING

Ladder feels wobbly:

Ensure the ladder is fully unfolded and the safety-clutch lock is engaged. Check that all four feet are on a firm, level surface. Inspect for any loose fasteners or damaged components.

Difficulty folding/unfolding:

Ensure the "LIFT TO FOLD" mechanism is fully actuated. Check for any obstructions in the hinge areas. Apply a small amount of lubricant to the hinges if movement is stiff.

PVC shoes are slipping:

Ensure the floor surface is clean and dry. The non-marring PVC shoes are designed for grip, but extreme conditions or worn shoes can reduce effectiveness. Replace worn shoes if necessary.

SPECIFICATIONS

Model Number	Clamber-102
Number of Steps	3
Material	Industrial-Grade Steel (Iron)
Color	Black and Orange
Product Dimensions (Unfolded)	64 cm (W) x 105 cm (H)
