- **Inspection:** Before each use, inspect the chainsaw for any damage, loose parts, or worn components. Do not operate a damaged tool.
- **Environmental Conditions:** Avoid using the chainsaw in wet conditions or near flammable liquids/gases.

7. Troubleshooting

If you encounter issues with your chainsaw, refer to the following common troubleshooting tips:

- **Chainsaw Not Starting:** Ensure the battery is fully charged and properly inserted. Confirm the safety button is pressed simultaneously with the trigger.
- **Chain Not Moving Smoothly:** Check the chain tension and adjust if too tight or too loose. Verify the oil reservoir is filled and the auto-oiling system is functioning. Clean any debris from the chain and guide bar.
- **Reduced Cutting Performance:** The chain may be dull and requires sharpening or replacement. Ensure proper chain tension.
- **Overheating:** If the motor automatically shuts down, allow the chainsaw to cool down before resuming operation. Avoid continuous heavy use without breaks.
