Height Adjustment

The console table features an adjustable height mechanism, allowing you to set the tabletop between approximately 25.2 inches and 37.0 inches. To adjust the height:

1. Locate the adjustment pins on the table legs.
2. Carefully lift the tabletop slightly to relieve pressure on the pins.
3. Pull out the adjustment pins and slide the inner leg section up or down to the desired height.
4. Ensure the pins fully re-engage into the corresponding holes at the new height. Verify both sides are adjusted evenly and securely before placing items on the table.
