## 4. Assembly Instructions

Follow these steps carefully for proper assembly. It is recommended to have two adults for assembly.

1. **Unpack Components:** Carefully unpack all parts and lay them out on a soft, clean surface to prevent damage. Identify all components against the package contents list.
2. **Attach Support Legs:** Securely attach the four support legs to the designated points on the upholstered bed frame sections using the provided hardware. Ensure they are tightened firmly.

## 5. Usage and Care

---

### 5.1 Proper Usage

- **Mattress Placement:** Place your twin-sized mattress directly onto the wooden slats. A box spring is not strictly required but can be used for additional height or support if desired.
- **Even Weight Distribution:** Distribute weight evenly across the bed frame to prevent stress on individual slats or frame components.
- **Regular Inspection:** Periodically inspect the bed frame for any loose connections or signs of wear.

### 5.2 Maintenance

- **Cleaning Fabric:** For general cleaning, gently vacuum the fabric upholstery using a soft brush attachment to remove dust and debris.
- **Spot Cleaning:** For spills, blot immediately with a clean, dry cloth. For stubborn stains, use a mild fabric cleaner following the product instructions, testing on an inconspicuous area first. Avoid harsh chemicals.
- **Frame Cleaning:** Wipe the non-fabric parts of the frame with a damp cloth and mild soap if necessary. Dry immediately.
- **Avoid Direct Sunlight:** Prolonged exposure to direct sunlight may cause the fabric color to fade.

## 6. Troubleshooting

---

Refer to the table below for common issues and their solutions:

Problem	Possible Cause	Solution
Bed frame is wobbly or unstable.	Loose fasteners; uneven floor.	Check and tighten all bolts and screws. Ensure the bed is on a level surface.
Squeaking noises.	Loose connections; friction between parts.	Re-tighten all fasteners. Apply a small amount of lubricant (e.g., silicone spray) to contact points if necessary.
Slats falling out of place.	Improper slat placement; excessive weight.	Ensure slats are fully seated in their supports. Verify weight distribution and avoid exceeding capacity.
