GLACIER FRESH Z092

GLACIER FRESH FPPWFU01 Refrigerator Water Filter User Manual

Model: Z092 | Compatible with Frigidaire PurePour FPPWFU01, Electrolux EPPWFU01, PureAdvantage PurePour PWF-1

1. Product Overview

The GLACIER FRESH FPPWFU01 water filter (Model Z092) is designed to provide clean, fresh-tasting water by reducing various contaminants. This filter is certified by NSF International against NSF/ANSI Standard 42 for materials and structural integrity requirements, ensuring reliable performance.

Image: GLACIER FRESH FPPWFU01 water filter with NSF certification logo. This filter is tested and certified by NSF International against NSF/ANSI Standard 42 for materials and structural integrity requirements.

Key Features:

- **NSF 42 Certified:** Reduces 97.9% of chlorine, improving water taste and odor.
- **Long-Lasting Performance:** Recommended replacement every 6 months or 200 gallons, whichever comes first.
- **Safe Materials:** Constructed with BPA-free, lead-free, and food-grade materials.
- **Easy Installation:** Designed for tool-free setup and leak-proof installation.

2. Installation Instructions

Follow these steps to properly install your GLACIER FRESH FPPWFU01 water filter. Ensure the refrigerator's water supply is turned off before beginning installation.

Step-by-Step Guide:

1. **Remove the Old Filter:** Locate your current water filter. Depending on your refrigerator model, you may need to push on the end/face of the filter to release it, then slide it straight out of the housing. Discard the old filter responsibly.
2. **Prepare the New Filter:** Before inserting the new GLACIER FRESH filter, check the buckle on top. If it is open or separated, the filter will not fit correctly. Gently squeeze both sides inward until the latch is fully closed. This ensures proper sealing and installation.
3. **Insert the New Filter:** Align the new filter with the filter housing. Using the alignment guide, slide it gently into the filter housing until it stops against the snap-in connector at the back of the housing.
4. **Secure the Filter:** Push the filter firmly until it clicks into place. Ensure it is securely seated to prevent leaks.
5. **Flush the System:** Turn on the refrigerator's water supply. Dispense approximately 2-3 gallons of water through the dispenser to flush out any air and carbon fines from the new filter. This is normal and ensures optimal performance.
6. **Reset Filter Indicator:** Refer to your refrigerator's user manual for specific instructions on how to reset the 'Change Filter' indicator light. Typically, this involves pressing and holding a specific button for a few seconds.

3. Operation and Filtration

Once installed, the GLACIER FRESH FPPWFU01 filter begins purifying your water immediately. The filter utilizes an advanced multi-stage filtration system to effectively reduce impurities.

Filtration Technology:

- **Coconut Shell Activated Carbon:** High-quality activated carbon effectively absorbs chlorine, odors, and tastes.
- **Multi-Layer Filtration:** Designed to capture various contaminants, from larger particles to microscopic impurities.

4. Maintenance and Replacement

Regular replacement of your water filter is crucial for maintaining optimal water quality and filter performance.

Filter Replacement Schedule:

It is recommended to replace your GLACIER FRESH FPPWFU01 water filter every **6 months or after filtering 200 gallons** of water, whichever comes first. This ensures consistent water quality and prevents potential issues from an expired filter.

5. Troubleshooting

If you encounter any issues with your water filter, refer to the common troubleshooting tips below.

- **Slow Water Flow:** This often indicates a clogged filter. If the filter has been in use for close to 6 months or 200 gallons, it may be time for a replacement. Ensure the new filter is properly seated and flushed.
- **Leaking:** Check that the filter is fully inserted and securely locked into the housing. Ensure the O-rings on the filter are not damaged or missing. Re-install the filter, ensuring the top buckle is closed before insertion.
- **Unpleasant Taste/Odor:** If the taste or odor of the water does not improve after flushing, or if it returns before the recommended replacement period, the filter may be exhausted or defective. Replace the filter.
- **Filter Indicator Light Remains On:** After replacing the filter, ensure you have reset the filter indicator light according to your refrigerator's specific instructions.

6. Specifications

Attribute	Detail
Model Number	Z092
Compatible Models	Frigidaire PurePour FPPWFU01, Electrolux EPPWFU01, PureAdvantage PurePour PWF-1, FRSS2623AS, GRBN2012AF, GRMC2273CF
Material	Carbon Fiber
Product Dimensions	2.13"D x 1.85"W x 9.44"H
External Testing Certification	NSF 42
Filter Life	6 months or 200 gallons
Unit Count	2.0 Count (per pack)

7. Warranty and Support

GLACIER FRESH is committed to providing high-quality products and customer satisfaction. For any inquiries or support needs, please contact us.

Contact Information:

For order inquiries, after-sales service, technical support, or complaint handling, please contact us through the Amazon messaging system. We aim to respond within 24 hours and ensure your issue is fully resolved.
