SETUP AND ASSEMBLY

Assembly is designed to be straightforward. Follow these general steps, referring to the detailed diagrams in your

1. **Unpack and Organize:** Lay out all components on a clean, soft surface to prevent scratches. Verify all parts against the parts list in your manual.
2. **Assemble Drawers First:** It is recommended to assemble the storage drawers before the main bed frame, especially if working in a confined space. This allows for easier handling of smaller components.
3. **Finger-Tighten Bolts:** When attaching components, initially finger-tighten all bolts. This allows for minor adjustments and ensures proper alignment before fully tightening. Once all parts are in place, go back and fully tighten all connections.
4. **Construct Bed Frame:** Assemble the main bed frame structure according to the manual's diagrams.
5. **Install Support Slats:** Place the wooden support slats evenly across the bed frame. Ensure they are securely seated in their designated positions.
