OYLUS CE0241

OYLUS 4-in-1 Portable Glass Air Fryer

MODEL: CE0241 - USER MANUAL

1. Introduction

Thank you for choosing the OYLUS 4-in-1 Portable Glass Air Fryer. This versatile appliance is designed to simplify your cooking experience, offering Max Crisp, Bake, Air Fry, and Recrisp functions. With its innovative glass construction and dual container system, you can enjoy healthier, crispy meals with ease and confidence.

This manual provides essential information for the safe and efficient operation of your new air fryer. Please read it thoroughly before use and keep it for future reference.

2. Important Safety Instructions

- Always place the appliance on a flat, stable, heat-resistant surface.
- Ensure all packaging materials are removed before first use.
- Clean glass pots, shelves, and all other accessories with hot water, dish soap, or a soft cloth before initial use.
- Wipe the glass pot dry with a soft cloth.
- **Overheat Protection:** The system is equipped with overheat protection. If the internal temperature exceeds 464°F (240°C), the appliance will automatically shut off as a safety measure.
- **Auto Pause Protection:** Cooking automatically pauses when the lid is removed, and resumes when the lid is securely re-attached.
- **Caution: Hot Surface.** Do not use with small containers. Allow the adapter plate to cool completely before handling.

3. Package Contents

Your OYLUS 4-in-1 Portable Glass Air Fryer package includes:

- Main Air Fryer Unit (1500W)
- 4.2QT Glass Container with Base and Rack
- 1.6QT Glass Container with Base and Rack

- Snap-lock Lids for both containers
- User Instruction Manual

Image: All components of the OYLUS 4-in-1 Portable Glass Air Fryer, including the main unit, two glass containers with bases and racks, and lids, are displayed on a countertop.

4. Setup and Assembly

The OYLUS Air Fryer features dual glass containers (4.2QT and 1.6QT) for flexible cooking. Both containers are designed for easy assembly and disassembly for cleaning.

4.1 Assembling the Glass Containers

1. Place the desired glass container (1.6QT or 4.2QT) into its corresponding plastic base. Ensure it clicks securely into place.

2. Insert the cooking rack into the glass container.
3. To remove the glass container from its base, locate the small lever on the side of the base and pull it back to release the glass.

Multiple Safty Protection

Image: The OYLUS Air Fryer main unit is shown alongside both the 1.6QT and 4.2QT glass containers, complete with their bases, racks, and snap-lock lids, demonstrating the full accessory set.

4.2 Attaching the Main Unit

1. Once the glass container is assembled with its base and rack, place it on a stable surface.
2. Carefully align the main air fryer unit (the heating element and control panel) with the top of the assembled glass container.
3. Gently lower the main unit until it clicks securely into place. The power button on the control panel will illuminate when properly seated.

Image: A visual guide illustrating the simple four-step process: 'Snap It' (assemble), 'Cook It' (place main unit), 'Enjoy It' (serve), and 'Store It' (use sealed lid).

5. Operating Instructions

5.1 Powering On/Off

- After the power cord is connected, the machine will emit a sound, and the display screen and indicator light will flash on and off. The power symbol will light up, indicating that the power is on.
- In standby state, press the power button to enter the function menu.
- The machine will automatically shut down after 60 seconds without any operation in standby mode.

5.2 Selecting Cooking Functions

The OYLUS Air Fryer offers four primary cooking functions: Max Crisp, Bake, Re crisp, and Air Fry.

- Press the **MENU** button to cycle through the available functions. The selected function's indicator light will flash.
- Press the **START/STOP** button to enter the working mode.

4-in-1 Functionality

Max Crisp, Bake, Air Fry, & Recrip

Image: Close-up of the OYLUS Air Fryer's digital touch control panel, highlighting the four cooking functions: Max Crisp, Bake, Recrip, and Air Fry.

5.3 Adjusting Time and Temperature

Each function has default time and temperature settings, which can be manually adjusted.

- To adjust the cooking temperature, press the **TIME/TEMP** button. The temperature number on the display will flash. Adjust using the + and - keys.
- Press the **TIME/TEMP** button again. The digital screen time number will flash. Increase or decrease the cooking time using the + and - keys.

5.4 Cooking Time and Temperature Settings Overview

Function	Default Temperature	Default Time	Temperature Range	Time Adjustable Range
----------	---------------------	--------------	-------------------	-----------------------

Function	Default Temperature	Default Time	Temperature Range	Time Adjustable Range
BAKE	400 °F	12 min	140-400 °F	1-60 min
RECRISP	360 °F	3 min	140-400 °F	1-60 min
MAX CRISP	400 °F	15 min	140-400 °F	1-60 min
AIR FRY	400 °F	20 min	140-400 °F	1-60 min

BAKE: For making delicious baked goods and desserts.

RECRISP: To restore the crisp taste of leftovers by gently heating them.

MAX CRISP: Use high heat to fry your food to get the final crispness, best for pre-packaged frozen foods.

AIR FRY: Used to make food crispy with little to no oil.

Note: The larger the portion of baked food, the longer and hotter it takes to cook, depending on the situation.

5.5 Visual Monitoring

The transparent glass containers allow you to monitor your food's progress without opening the lid, ensuring perfect results every time.

Compact Size, Mighty Power

Full-Sized 1500-Watt Power – Now Ultra-Compact

Image: The OYLUS Air Fryer in operation, cooking a whole chicken in its transparent glass container, demonstrating the compact size and powerful 1500W heating.

5.6 Dual Container Usage

Easily switch between the 1.6QT container for personal meals or reheating, and the 4.2QT container for family-sized portions.

Multiple Options, Your Choice

4.2QT for
Family Feasts

1.6QT for
Personal Meals
