Hodozzy A4077

Hodozzy 1 DIN Car Stereo with 10.1-inch Rotatable Touchscreen, Wireless CarPlay & Android Auto User Manual

Model: A4077

INTRODUCTION

This manual provides comprehensive instructions for the installation, operation, and maintenance of your Hodozzy 1 DIN Car Stereo. This unit features a 10.1-inch rotatable touchscreen, wireless CarPlay and Android Auto compatibility, MirrorLink, Bluetooth connectivity, FM/RDS radio, customizable EQ settings, multiple interface options including USB and AUX, rear camera input, and steering wheel control support. Please read this manual thoroughly before using the product to ensure proper function and safety.

PRODUCT FEATURES OVERVIEW

- **10.1-inch Rotatable Touchscreen:** The display can be adjusted horizontally and vertically, and moved left or right for optimal viewing angles.
- **Wireless CarPlay & Android Auto:** Seamlessly integrate your smartphone for navigation, music, calls, and more.
- **MirrorLink Support:** Wired connection for mirroring your smartphone screen.
- **Bluetooth Connectivity:** Hands-free calling and wireless audio streaming.
- **FM/RDS Radio:** Access your favorite radio stations with real-time information display.
- **EQ Sound Customization:** Built-in equalizer settings to tailor your audio experience.
- **Multiple Interfaces:** Includes USB ports for charging and data transfer, AUX audio input, and TF card slot for media playback.
- **Rear Camera Input:** Supports connection to a reversing camera for enhanced safety during parking.
- **Steering Wheel Control:** Compatible with existing steering wheel controls for convenient operation.
- **Colorful Backlight:** Enhances visibility and usability in various lighting conditions.

SETUP AND INSTALLATION

Package Contents

Before installation, verify that all components are present in the package:

- Car Stereo Unit
- Power Cable
- Horn Cable
- D-BUS Cable
- Mounting Brackets
- Microphone (MIC)

- User Manual
- 12LED Rear Camera (if included in your specific model)

Packing List & Wiring Instructions

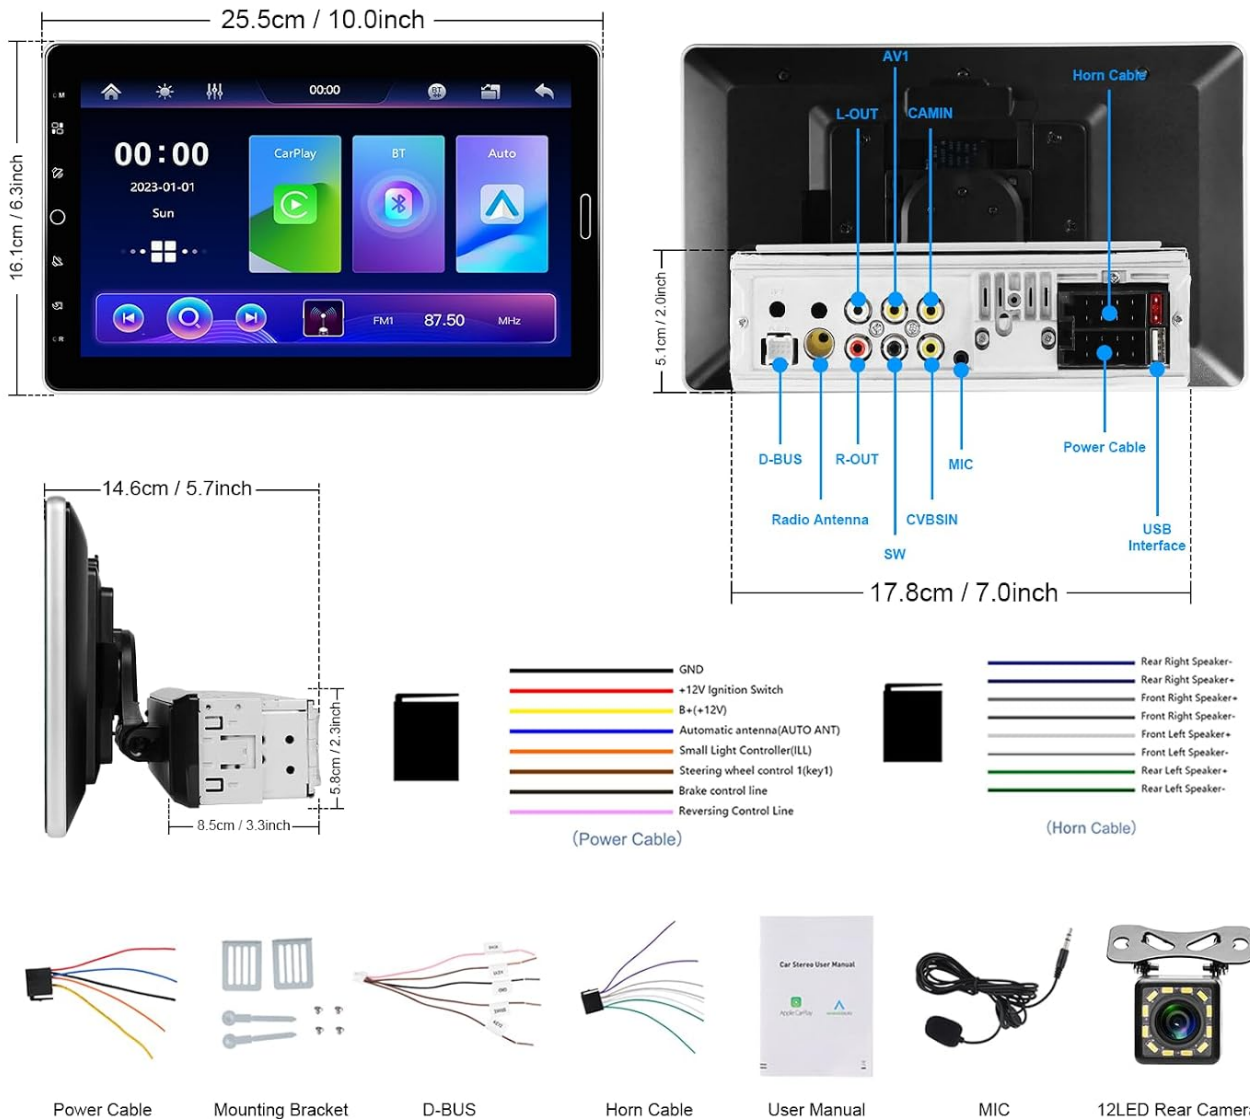

Image: Diagram showing the dimensions of the car stereo unit, the rear panel connections, and the included accessories such as power cables, mounting brackets, microphone, user manual, and rear camera.

Wiring Instructions

Refer to the wiring diagram provided in the package and below for correct connections. Incorrect wiring can damage the unit or your vehicle's electrical system. If you are unsure, consult a professional installer.

- **Power Cable:** Connect to your vehicle's power supply (ACC, B+, GND).
- **Horn Cable:** Connect to the vehicle's horn system if applicable.
- **D-BUS:** For specific data communication.
- **Radio Antenna:** Connect your car's radio antenna.
- **CVBSIN:** Video input for rear camera.
- **SW (Steering Wheel Control):** Connect to your vehicle's steering wheel control wires.

- **USB Interface:** Connect external USB devices.
- **L-OUT/R-OUT:** Audio output for external amplifiers.
- **MIC:** External microphone input.

Important: Ensure the vehicle's battery is disconnected before beginning installation to prevent electrical shorts.

OPERATING INSTRUCTIONS

Screen Rotation and Movement

The 10.1-inch display can be rotated and moved to optimize your viewing experience. Gently adjust the screen to your desired horizontal or vertical orientation. The screen can also be moved left and right to reduce glare or improve accessibility.

Wireless CarPlay and Android Auto

To use Wireless CarPlay or Android Auto, ensure your smartphone's Bluetooth and Wi-Fi are enabled. On the car stereo, select the CarPlay or Android Auto icon. Follow the on-screen prompts to pair your device. Once connected, you can access navigation, music, messages, and other compatible apps directly from the car stereo display.

MirrorLink (Wired Connection)

For MirrorLink functionality, connect your smartphone to the car stereo using a USB cable. Select the MirrorLink option on the stereo. Your phone's screen will be mirrored on the car stereo display, allowing you to interact with your phone's content.

Bluetooth Operation

To pair a Bluetooth device:

1. Go to the Bluetooth menu on the car stereo.
2. Enable Bluetooth on your smartphone and search for available devices.
3. Select "Hodozzy" (or similar device name) from the list on your phone.
4. Confirm the pairing code on both devices.

Once paired, you can make hands-free calls and stream audio wirelessly.

Bluetooth

Image: The car stereo displaying the Bluetooth calling interface, an equalizer adjustment screen, and the FM/RDS radio interface with station information.

FM/RDS Radio

Select the "Radio" icon to access the FM/RDS tuner. You can scan for stations, save presets, and view RDS information (if available) such as station name and song title.

Audio Equalizer (EQ)

Navigate to the "EQ" settings to customize the audio output. Adjust bass, treble, and other frequency bands to match your preferences. Pre-set equalizer modes may also be available.

USB, AUX, and TF Card Media Playback

Insert a USB drive, TF card, or connect an external audio device via the AUX input. The stereo will automatically detect the media and allow you to browse and play audio or video files.

Multiple Interface

Image: Close-up view of the car stereo's multiple interface options, highlighting the TF card slot, AUX input, and dual USB ports for connectivity and media playback.

Rear Camera Input

When a compatible rear camera is connected and the vehicle is shifted into reverse gear, the car stereo display will automatically switch to the rear camera view, providing a clear view of the area behind your vehicle for safer parking and maneuvering.

Reversing Camera

Image: The car stereo screen displaying the rear camera feed with parking guidelines, alongside an interface for configuring steering wheel controls.

Steering Wheel Control

If your vehicle supports steering wheel controls and they are correctly wired, you can program the stereo to respond to these controls. This allows you to adjust volume, change tracks, or answer calls without taking your hands off the steering wheel.

MAINTENANCE

- **Screen Cleaning:** Use a soft, lint-free cloth to gently wipe the touchscreen. Do not use abrasive cleaners or solvents.
- **General Cleaning:** Keep the unit free from dust and debris. Use a dry cloth for cleaning the main body.
- **Software Updates:** Check the manufacturer's website periodically for any available software or firmware updates to ensure optimal performance and compatibility.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Unit does not power on.	Incorrect wiring; Blown fuse; Vehicle battery issue.	Check power cable connections (ACC, B+, GND). Inspect vehicle fuses. Verify vehicle battery charge.
No sound.	Volume too low; Mute activated; Speaker wiring issue.	Increase volume. Check if mute is active. Verify speaker connections.
Bluetooth not connecting.	Bluetooth not enabled on device/stereo; Device out of range; Interference.	Ensure Bluetooth is on for both devices. Move devices closer. Try re-pairing.
CarPlay/Android Auto not starting.	Incorrect phone settings; USB cable issue (for wired); Wi-Fi/Bluetooth issue (for wireless).	Check phone settings for CarPlay/Android Auto. Use a certified USB cable. Ensure Wi-Fi/Bluetooth are active and stable.
Rear camera not displaying.	Camera not connected; Incorrect wiring; Reverse trigger not detected.	Verify camera connection to CVBSIN. Check reverse trigger wire. Ensure camera is powered.
