Model: Monteer 12000

[Introduction](#) [Safety](#) [Contents](#) [Setup](#) [Operation](#) [Maintenance](#) [Troubleshooting](#) [& Support](#) [Specifications](#)

## 1. INTRODUCTION

This manual provides essential instructions for the safe and effective use of your Magicshine Monteer 12000 High-Lumen MTB Light. Please read this manual thoroughly before operating the product and retain it for future reference.

Image 1.1: The Monteer 12000 light unit with its wireless remote control.

## 2. SAFETY INFORMATION

- Do not look directly into the light beam when the light is on, as it can cause temporary vision impairment.
- Keep the light and battery pack away from children.
- Ensure the light is securely mounted before riding.
- Do not disassemble or modify the light or battery pack. This voids the warranty and may cause damage or injury.
- The light unit can become hot during extended use at high output settings. Avoid direct contact with skin when hot.

- Use only the provided charging cable and battery pack.

### 3. PACKAGE CONTENTS

Verify that all items are present in your package:

### 4. SETUP

## 4.1 Mounting the Light

The Moneteer 12000 offers versatile mounting options for handlebars and helmets.

### 4.1.1 Handlebar Mount Installation

1. Select the appropriate nylon shims for your handlebar diameter.
2. Attach the two-sided handlebar mount to your handlebars using the provided hex key.  
Ensure it is tightened securely.
3. Slide the Moneteer 12000 light unit onto the mount until it clicks into place.
4. Adjust the light head angle as needed using the tool-free mechanism to prevent blinding oncoming traffic.

Image 4.1: Moneteer 12000 light unit securely mounted on handlebars.

### 4.1.2 Helmet Mount Installation

1. Attach the helmet mount to your helmet using the helmet mounting straps. Thread the straps through the helmet vents and secure them.
2. Slide the Moneteer 12000 light unit onto the helmet mount until it clicks into place.
3. Adjust the light head angle to ensure optimal illumination of your path.

## IPX6 Waterproof

The aluminum housing makes the light sturdy, durable, and stunning, with an IPX6 waterproof rating to effortlessly withstand the elements

Image 4.2: Monteer 12000 light unit attached to a helmet for versatile lighting.

### 4.2 Connecting the Battery Pack

1. Secure the MJ-6398 battery pack to your bike frame using the provided battery mounting straps. Ensure it is positioned safely and does not interfere with cycling.
2. Connect the power cable from the light unit to the battery pack. Ensure the connection is firm.
3. If needed, use the extension cable for optimal battery placement.

# Turn Darkness Into Day

Illuminates your path with a jaw-dropping 12,000-lumen beam that outshines anything in its class

## 5. OPERATING INSTRUCTIONS

### 5.1 Power On/Off and Mode Selection

The Montere 12000 features a main power button on the light unit for basic control.

- **Power On:** Press and hold the main power button for 1 second.
- **Change Brightness/Mode:** Short press the main power button to cycle through available brightness levels and modes.
- **Power Off:** Press and hold the main power button for 1 second.

### 5.2 Wireless Remote Control

The MJ-6508 wireless remote control provides convenient access to light functions without removing your hands from the handlebars.

1. Attach the remote control to your handlebars using its strap in an easily accessible position.
2. The remote allows for simple operation, including changing modes and activating full output mode with a single click.

## Wireless Remote Control

Control the light with a wireless remote and jump to full output mode at the press of a button

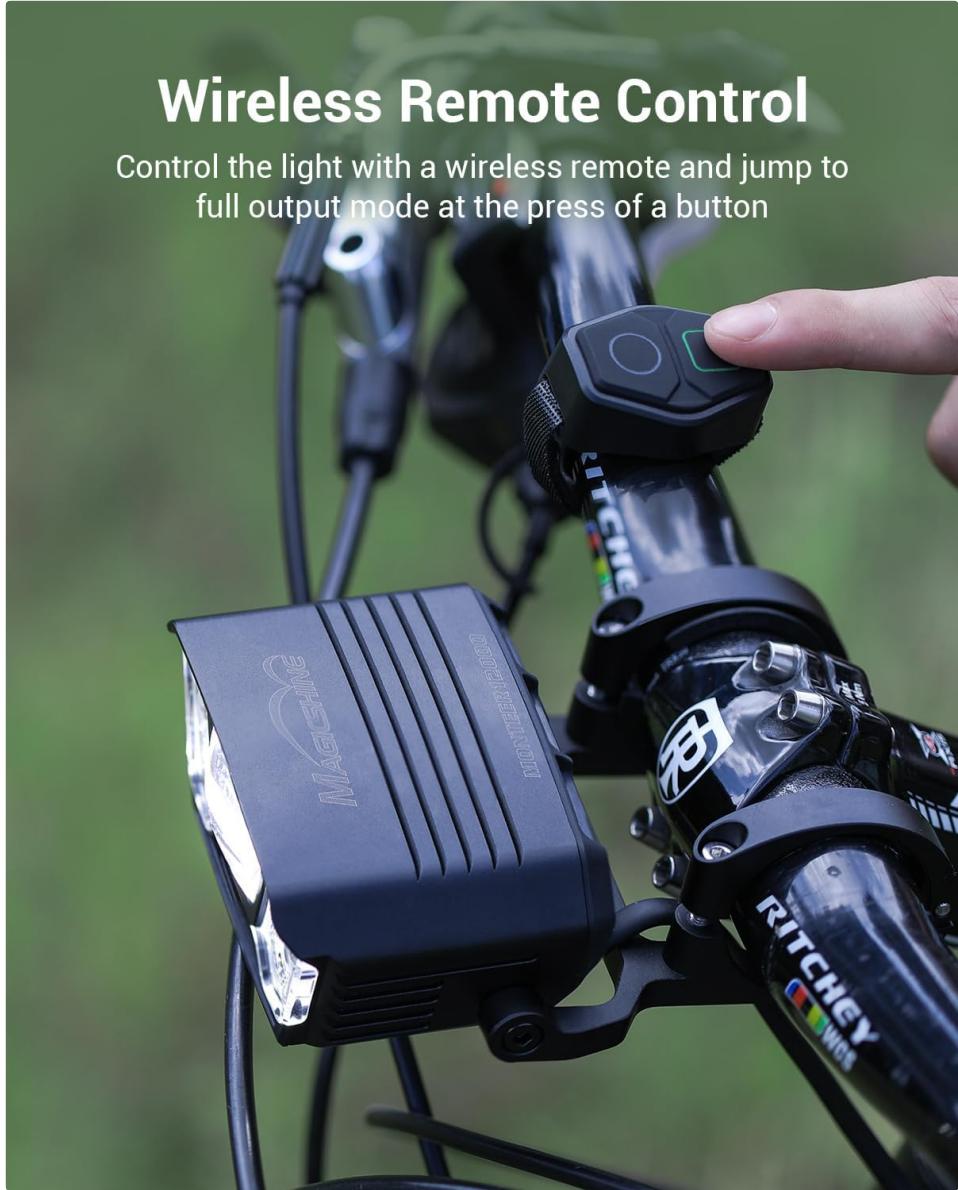

Image 5.1: Using the wireless remote control for convenient light adjustment.

### 5.3 App Customization

Customize lighting settings for different cycling scenarios through the Magicshine APP.

1. Download the Magicshine APP from your device's app store.
2. Connect your Monteer 12000 light via Bluetooth as per the app instructions.
3. Utilize the app to fine-tune brightness levels, beam patterns, and other settings to suit your preferences.

Image 5.2: The Magicshine app allows for personalized light settings.

## 6. CHARGING AND BATTERY MANAGEMENT

### 6.1 Charging the Battery Pack

The MJ-6398 battery pack features a USB-C port for charging and discharging.

1. Connect the provided USB-C charging cable to the battery pack's USB-C port.
2. Connect the other end of the cable to a compatible USB power adapter (not included).
3. The battery indicator lights will show the charging status.

Image 6.1: The battery pack can also serve as a power bank for other devices.

## 6.2 Battery Indicator

The Monteer 12000 light unit, battery pack, and remote control all feature easy-to-read power indicators to monitor battery status.

Image 6.2: Power indicators on the light, battery, and remote for easy monitoring.

## 7. MAINTENANCE

### 7.1 Cleaning

- Wipe the light unit and battery pack with a soft, damp cloth.
- Do not use abrasive cleaners or solvents.
- Ensure all ports are dry before charging or connecting.

### 7.2 Storage

- Store the light and battery in a cool, dry place when not in use.
- For long-term storage, charge the battery to approximately 50-70% every 3-6 months to maintain battery health.

### 7.3 Water Resistance

The Monteer 12000 has an IPX6 waterproof rating, making it resistant to heavy rain and splashes. However, it is not designed for submersion.

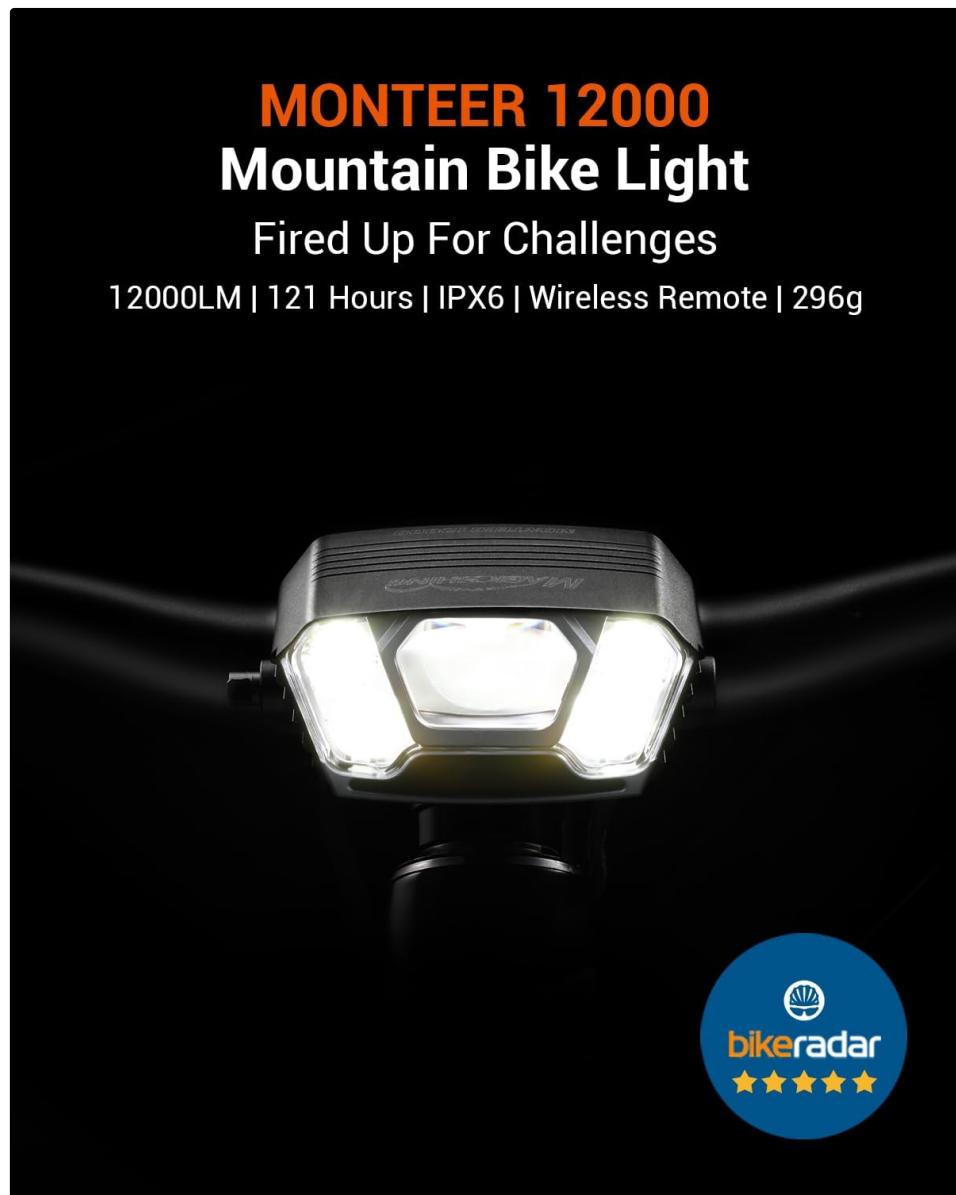

Image 7.1: The Monteer 12000 is designed to withstand challenging weather conditions.

### 7.4 Heat Dissipation

The light features a physical air duct cooling system, internal thermal management, and cooling fins to ensure optimal performance and prevent overheating during operation.

## Light For Helmets

A versatile helmet mount is available to fix the light firmly to your helmet. Adjust the light head to cover all of your angles

Image 7.2: The light's effective heat dissipation system.
