### 3. INSTALLATION GUIDE

Proper installation is crucial for the functionality and safety of your car stereo. It is recommended that installation be performed by a qualified professional.

#### 3.1 Wiring Diagram

Refer to the following diagram for correct wiring connections. Ensure all connections are secure to prevent malfunctions.

Image 3.1: Detailed wiring connections for the car stereo.

### 3.2 Reversing Camera Installation

Follow these steps to install the reversing camera:

1. Connect the red cable (A) to the positive pole of the car reversing light cable.
2. Connect the black cable (B) to the negative pole of the car reversing light cable.
3. Connect the reversing trigger wire cable (D, pink color) to the red cable (A). This is an extension of the video input wire.
4. Connect the video input wire from the camera to the designated input on the car stereo.

## 4. OPERATING INSTRUCTIONS

This section details the operation of your Hodozzy car stereo's various functions.

### 4.1 Power On/Off

The unit powers on automatically with the vehicle's ignition. To manually power off or on, press and hold the power button located on the front panel.

### 4.2 Wireless CarPlay & Android Auto

Connect your smartphone wirelessly via Wi-Fi and Bluetooth to access navigation, music, and messaging apps directly on the car stereo display.

- Ensure Bluetooth and Wi-Fi are enabled on your smartphone.
- Pair your phone with the car stereo via Bluetooth.
- Follow the on-screen prompts to initiate Wireless CarPlay or Android Auto.

Image 4.1: Wireless CarPlay and Android Auto connectivity.

### 4.3 Mirror Link

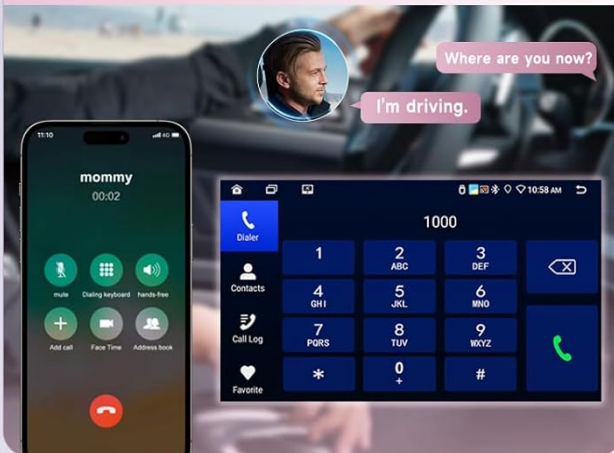

The Wireless Mirror Link function allows you to display your smartphone's screen directly on the car stereo. This feature supports most applications on your phone.

### 4.4 Audio Settings (DSP, HIFI, FM/RDS)

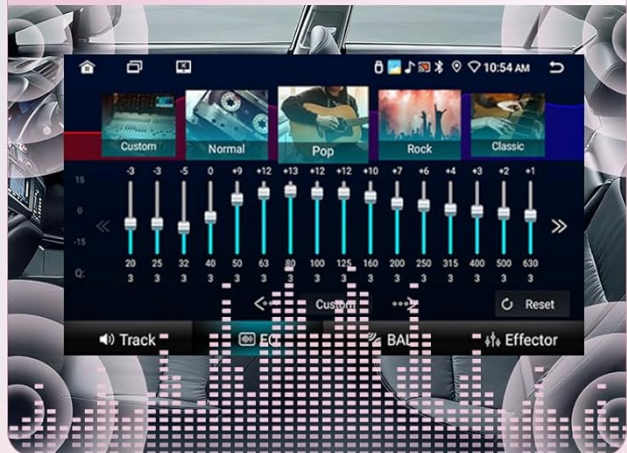

The integrated Digital Signal Processor (DSP) and HIFI audio technology allow for precise sound customization. Access the audio settings menu to adjust equalizer presets, balance, fader, and other sound parameters. The FM/RDS radio provides clear reception and displays station information where available.

## HIFI Lossless Music

## FM/RDS Radio

Image 4.2: Audio control interface including DSP and radio functions.

## 4.5 Navigation (GPS, Offline Maps)

The unit includes a built-in GPS antenna for navigation. You can download offline maps for use without an internet connection. Access navigation applications through the main menu.

## 4.6 Personalized Features (Split Screen, UI Themes)

Customize your user experience with various features:

- **Split Screen:** View two applications simultaneously, such as navigation and music playback.
- **Theme UI Library:** Select from a range of user interface themes to personalize the display.

# Personalized Features

Image 4.3: Split screen mode and customizable interface.

## 4.7 360° Panoramic View (Optional Camera)

When connected to compatible 360-degree cameras (sold separately), the car stereo can display a panoramic view around your vehicle, assisting with parking and maneuvering by eliminating blind spots.

## 4.8 Steering Wheel Control (SWC)

The unit supports integration with your vehicle's factory steering wheel controls. This allows you to manage audio, calls, and other functions without taking your hands off the wheel. Configuration may be required in the system settings.

# Reversing Video & SWC

## 6. MAINTENANCE

To ensure the longevity and optimal performance of your car stereo, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to clean the screen and exterior. Avoid abrasive cleaners or solvents.
- **Temperature:** Avoid exposing the unit to extreme temperatures, both hot and cold, for extended periods.
- **Software Updates:** Periodically check for and install available software updates to ensure system stability and access to new features.
- **Connections:** Ensure all cables and connections remain secure. Loose connections can lead to intermittent issues.

## 7. TROUBLESHOOTING

If you encounter issues with your Hodozzy car stereo, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Unit does not power on	Incorrect wiring, blown fuse, vehicle power issue	Check power cable connections, inspect vehicle fuses, consult a professional installer.
Screen freezes or is unresponsive	Software glitch, temporary system error	Perform a soft reset (refer to device settings for reset option) or disconnect and reconnect power to the unit.
Backup camera not displaying image	Loose camera connection, faulty camera, incorrect wiring	Verify all camera wiring connections (refer to Section 3.2), test with a known working camera if possible.
GPS signal is weak or unavailable	GPS antenna obstruction, damaged antenna, poor satellite reception	Ensure GPS antenna is placed in an unobstructed location, check antenna connection, replace antenna if damaged.
Wireless CarPlay/Android Auto not connecting	Bluetooth/Wi-Fi off on phone, incorrect pairing, software issue	Ensure phone's Bluetooth and Wi-Fi are active, delete previous pairings and re-pair, restart both phone and car stereo.
