Setup Instructions

1. **Connect the Device:** Plug the LEXXSON Car Video Box into your car's original USB port using one of the provided data cables.
2. **Initial Boot-up:** Wait approximately 1 to 2 minutes for the device to initialize.
3. **Select CarPlay:** On your car's multimedia system menu, select the "CarPlay" option. This will seamlessly switch your car's display to the LEXXSON Android system.
4. **Insert SIM Card (Optional):** If you wish to use 4G cellular data, carefully insert a local carrier's Micro SIM card into the designated slot on the side of the device.
5. **Connect to Wi-Fi (Optional):** The device supports 2.4GHz/5GHz Wi-Fi. You can connect to your phone's hotspot or a local Wi-Fi network for internet access.

Operating Instructions

1. Wireless CarPlay & Android Auto

After pairing your phone via Bluetooth, click the "SpeedPlay" icon on the device's interface. It will automatically switch to the corresponding mobile phone system (Wireless CarPlay or Wireless Android Auto).

4. Bluetooth and Wi-Fi

- **Bluetooth:** Stay connected for hands-free calls and audio streaming. Use voice assistants like Siri for convenience.
- **Wi-Fi:** Supports 802.11a/b/g/n/AC for 2.4GHz/5GHz Wi-Fi transmission. The device can also function as a mobile Wi-Fi router (MIFI) to provide hotspots for other devices.

5. 4G Cellular Network

With an inserted SIM card, the device provides 2G/3G/4G network support, enabling local phone calls and mobile data access. This allows for continuous internet connectivity for navigation, streaming, and app usage on the go.

6. Split Screen Function

Enhance your driving experience with the split-screen feature, allowing you to run two different applications simultaneously on the car's display.

7. Ambient Light

The Carplay Ai Box includes ambient lighting, allowing you to customize the mood for each journey.

Maintenance

- Keep the device clean by wiping it with a soft, dry cloth. Avoid using harsh chemicals or abrasive cleaners.
- Ensure proper ventilation around the device to prevent overheating.
- Regularly check for software updates to ensure optimal performance and security.

Troubleshooting

Problem	Possible Cause	Solution
Device does not power on or switch on consistently.	Loose USB connection; car's USB port power issue; temporary software glitch.	Ensure the USB cable is securely connected to both the device and the car's USB port. Unplug the device from the USB port and plug it back in. Try a different USB port in your car, if available. Restart your car's multimedia system.
System feels laggy or slow.	Too many applications running in the background; low network signal; temporary software performance issue.	Close unnecessary applications running in the background. Ensure a strong 4G or Wi-Fi signal for internet-dependent tasks. Restart the device by unplugging and re-plugging it. Check for and install any available system updates.
Cannot connect to Wireless CarPlay/Android Auto.	Bluetooth not paired; incorrect phone settings; compatibility issue.	Ensure your phone's Bluetooth is on and paired with the device. Verify your phone meets the minimum OS requirements (iOS 10+ for CarPlay, Android 11.0+ for Android Auto). Confirm your car has original wired CarPlay.
No internet access.	No SIM card inserted; invalid SIM card; no Wi-Fi connection; poor signal.	Insert a valid Micro SIM card with an active data plan. Connect to a stable Wi-Fi network or your phone's hotspot. Check the signal strength for 4G or Wi-Fi.
