Bekrvio JD-206

Bekrvio 26 inch Counter Height Bar Stools Instruction Manual

Model: JD-206

INTRODUCTION

This manual provides detailed instructions for the assembly, operation, and maintenance of your Bekrvio 26 inch Counter Height Bar Stools. Please read all instructions carefully before assembly and use to ensure safe and proper functioning of the product. Keep this manual for future reference.

SAFETY INFORMATION

Maximum Weight Recommendation: 300 pounds. Do not exceed this weight limit to ensure the stability and safety of the stool.

- Always supervise children when using the stool.
- Bolts may loosen during normal everyday use. They should be periodically inspected and tightened to prevent damage or injury. Always check to be sure that all hardware is kept tightened.
- Avoid direct sunlight exposure.
- Keep away from heat sources and sharp objects to prevent damage to the upholstery.

PACKAGE CONTENTS

Verify that all components are present before beginning assembly. If any parts are missing or damaged, please contact customer support.

- Counter Stools (Set of 2)
- Hardware Set (for 2 stools)

CHOOSING THE RIGHT STOOL HEIGHT

These 26-inch seat height bar stools are designed for counters or bars with a height between 35 and 39 inches. Follow these guidelines to ensure a proper fit:

1. Measure the height of your counter or bar.
2. Leave a gap of about 10 to 12 inches between the top surface of the counter and the seat of the stool.
3. Subtract this gap from the counter or bar height to determine the ideal stool height.

ASSEMBLY INSTRUCTIONS

Your set of 2 bar stools arrives with all necessary hardware and clear instructions for quick assembly. Follow the steps below:

1. **Unpack Components:** Carefully remove all parts from the packaging and lay them out on a soft, clean surface to prevent scratches. Identify all hardware components.
2. **Assemble Legs:** Attach the footrest ring to the four wooden legs using the provided screws and Allen wrench. Ensure all connections are secure but do not overtighten initially.
3. **Attach Swivel Mechanism:** Secure the 360-degree swivel plate to the top of the assembled leg frame using the appropriate screws. Ensure the plate is centered and firmly attached.
4. **Attach Seat:** Align the seat cushion with the swivel mechanism and attach it using the remaining screws. Tighten all screws evenly.
5. **Final Tightening:** Once the stool is fully assembled, carefully place it upright. Gently rock the stool to ensure it is stable. Then, fully tighten all screws.

We Care, We Upgrade 2.0

Solid Wood Leg with Reinforced Finger Joint

OPERATING INSTRUCTIONS

The Bekrvio Counter Height Bar Stools feature a smooth 360-degree swivel function for ease of movement and conversation. To operate, simply rotate the seat in any direction. The ergonomic design, including a wide, thick seat and high backrest, provides comfortable seating for extended periods.

Sturdy Solid Wood Chair Legs

Reinforced Metal Footrest
Higher load capacity, resists bending/breaking, stays stable under long-term use

Adjustable Foot Pads
Individually adjusts to uneven floors (gaps/slopes) for four-leg level contacts

MAINTENANCE

- **Cleaning:** Dust with a clean, soft cloth. For spills or stains on the linen fabric, use a professional mild cleaner. Avoid harsh chemicals.
- **Hardware Check:** Periodically inspect and tighten all bolts and screws to maintain stability and prevent loosening during normal use.
- **Protection:** To protect floors, ensure the non-slip pads on the legs are intact and properly positioned.

TROUBLESHOOTING

- **Stool Wobbles:** Check that all leg connections are securely tightened. Adjust the individual foot pads on the legs to level the stool on uneven floors.
- **Squeaking Noise:** If the stool develops a squeak, inspect the swivel mechanism and leg joints. Ensure all bolts are tightened. Applying a small amount of silicone lubricant to the swivel plate may help.
- **Difficulty Swiveling:** Ensure no obstructions are present around the swivel mechanism. Check for any loose components that might impede smooth rotation.
