Maintenance

Proper care will extend the life and appearance of your sofa:

- **Regular Cleaning:** Vacuum the upholstery regularly using a soft brush attachment to remove dust and debris.
- **Spot Cleaning:** For spills, blot immediately with a clean, dry cloth. Do not rub, as this can spread the stain. For stubborn stains, use a mild fabric cleaner designed for polyester, testing on an inconspicuous area first.
- **Avoid Direct Sunlight:** Prolonged exposure to direct sunlight can cause fabric fading. Position your sofa away from direct sun or use curtains/blinds.
- **Fluff Cushions:** Regularly fluff and rotate cushions to maintain their shape and even out wear.
- **Check Connections:** Periodically check all bolts and connections to ensure they remain tight.

Troubleshooting

- **Squeaking Noises:** If you hear squeaking, check all frame connections and tighten any loose bolts.
- **Pull-out Bed Sticks:** Ensure no obstructions are blocking the trundle mechanism. Check that the wheels are clean and free of debris.
- **USB Ports Not Working:** Verify that the sofa is properly plugged into a functional power outlet. Check the connection of the internal wiring if accessible and safe to do so, or contact customer support.
- **Cushions Losing Shape:** Regularly fluff and rotate cushions. If significant deformation occurs, contact customer support for advice.
